4K Clip Import Guide

In the case of 4K clip import from [P2] folder of Source Browser window:

The screenshot displays the EDIUS Source Browser window. The left pane shows a folder tree with 'P2' selected. The right pane shows a list of clips with columns for Clip Name, User Clip Name, Video, and Status. A context menu is open over the clips, showing options like 'Add to Bin', 'Add and Transfer to Bin', and 'Add and Transfer to Bin(Proxy)'. Annotations include numbered callouts (1-5) and text boxes explaining the steps.

1 Select Source Browser tab.

2 Click

3 Right-Click

4

5

Direct import from from P2 card:
A drive is automatically recognized.
Please click the drive to access clips.

Import from a hard disk drive:
Please right-click [P2] folder, and select [Open folder...] then select a specific folder.
When you select any parent folder of [CONTENTS] folder, the selected folder path is added.

Add clips to a bin without copy

Select either option.

Add clips to a bin while copying.

Add to Bin

Add and Transfer to Bin

Add and Transfer to Bin(Proxy)

Source Browser

You can confirm the imported clips when clicking Bin tab.

EDIUS8 new

In the case of 4K clip import from [GV Browser] folder of Source Browser window:

The screenshot shows the EDIUS8 Source Browser window. The 'Source Browser' tab is selected at the bottom, indicated by a green circle with the number 5 and a red callout box. The left sidebar shows a folder tree with 'GV Browser' highlighted in red, and its sub-folder 'All Clips' also highlighted in red with a green circle 2 and a 'Double-click' callout. The main area displays a list of clips under the 'GV Browser/All Clips (0/5)' folder. A clip is selected, and a right-click context menu is open, with a green circle 3 and a 'Right-click' callout. The menu options include 'Add to Bin', 'Add and Transfer to Bin', and 'Add and Transfer to Bin(Proxy)'. Red callout boxes provide instructions: 'Add clips to a bin without copy' points to 'Add to Bin', 'Select either option.' points to 'Add and Transfer to Bin' and 'Add and Transfer to Bin(Proxy)', and 'Add clips to a bin while copying.' points to 'Add and Transfer to Bin(Proxy)'. A green circle 4 is placed over the 'Add and Transfer to Bin' option. A blue text box titled 'EDIUS8 new function, GV Browser' explains that clips are automatically recognized and provides instructions to right-click or double-click and then add to a bin. A green circle 1 and a callout 'Select Source Browser tab.' point to the 'Source Browser' tab. A final red callout box at the bottom states 'You can confirm the imported clips when clicking Bin tab.' and points to the 'Bin' tab at the bottom left.

Clip Name	Type	Duration	Resolution
393VX400	Video	00:00:00:00	4K 122
401IQ300	Video	00:11:57:12	Ultra 4K 122
01340001	Video	00:00:15:00	H.264
01340002	Video	00:00:15:00	H.264
00000	Video	00:00:43:00	H.264

EDIUS8 new function, GV Browser
