ACHIEVE YOUR VISION

Panasonic

Cinema VariCam
A New Vision and Revolution in Filmmaking — Cinema VariCam
The Cinema VariCam line of cameras has been used on a wide variety of movies, commercials, and TV programs, and is renowned for its color reproduction, look, and for bringing progressive workflows to the production industry. This technology and know-how are now invigorating a new lineup — VariCam Pure*, VariCam 35 and VariCam LT.

* Codex V-RAW Recorder of the VariCam Pure is a product of Codex.
My initial interest in the VariCam 35 was the claim of 5000 ASA equivalent being a usable proposition. With the aid of a few friends I was able to do comparison tests with the potential alternatives. These tests verified the claim of a totally usable result that was able to be intercut with the 800 ASA standard. These tests also produced another advantage of the VariCam. It was obvious to all of us doing these tests that the VariCam sustained better color rendition in the lowlight conditions. Also when viewing the more normal 800 result I assessed the VariCam appeared to have a wider and more acceptable color response.

I believe using this camera enabled me to achieve a very professional result enhanced by the camera’s true 14 stop latitude, it’s amazing color response and of course the 2.6 stops of speed amazingly enhanced by shooting in 4K raw. I have done some test timing and I am exhilarated with what is available.

Don McAlpine, ACS, ASC

I couldn’t believe it because in order to achieve such a low light sensitivity of 5000 ISO, you have to give up something – whether it’s dynamic range, resolution or color. I looked at the camera image on a 4K monitor and thought, ‘Wow, this is unbelievable. So I did a test and I was blown away. Not only because of almost no noise. But specifically, because in this high sensitivity, there were all color still there. In fact, it was much colorful than what our eye see. I don’t know where we are going. We’re showing the beginning of digital revolution. It’s not stopping like film, not slowing down. It’s still speeding up.’

Theo Van de Sande, ASC
I’ve worked with the VariCam for a few years now so I feel confident on where I can push its limits and the latitude. If we have a solid “negative”, we can really go in a lot of directions. We’re accentuating the highlights but we’re also shifting where skin tones are. A lot of times, we’re pulling information out of the negative where some of the saturation might have fallen flat because we shot on overcast days. We were still able to pull the color information out, as well as accentuate it.”

Gareth Paul Cox (Siesta Key)

The ability to use so much less light changes everything. I’ve always liked the VariCam color science – I think it looks the most like film but the 5000 ISO is absolutely staggering. It has changed my approach to how I light, and has cut my overall lighting package by about 2/3. Working with these latest generation VariCam suits my style of going for a natural look, not a ‘movie’ feel. I never have to worry about lighting for exposure. I can light for effect.”

William Wages, ASC

You can get a lot of saturation from different cameras. The VariCam is no exception – you can certainly get a lot of color out of it as well. On Just Add Magic, I tested the VariCam thoroughly before both seasons, and instead of focusing on saturation, we pursued the most pleasing and natural looking color palette. The camera excelled at this, as well as delivering clean 4K images with natural dynamic range.”

Mark Doering-Powell, ASC

We wanted The Letdown to have more of a raw and authentic look. My challenge was to find a format that could work in the schedule that we needed to work in, but also give them the results they desired. The VariCam LT is a light camera that can be quickly switched between production mode, handheld, or Steadicam easily, so it was great to work with.”

Judd Overton (The Letdown)

I was extraordinarily pleased with the way everything looked. It’s like learning a new film stock – you do the work to best achieve the look you’re going for with the tools you have. That takes practice and experience. After shooting with VariCam for six months, I’m confident I can go into any project knowing how to make it look exactly the way I want.”

Bobby Shore (Anne with an E)

The VariCam has a special thing going on where it is quite sharp but still has a very pleasing look. It doesn’t feel like it necessarily needs to be dumbed down with vintage glass. I feel aesthetically, the VariCam does that better than other digital camera systems. I think it has a fresh and different look, which I’m excited about.”

Joshua Galler (Manhunt: Unabomber)

The most exciting thing about VariCam is the flexibility with ISO settings. Once you experience that freedom it’s hard to go back. VariCam is the only camera on the market today able to offer such flexibility and that’s why it’s my camera of choice right now.”

Vanja Cernjul, ASC, HFS
Super 35mm Native 4K Sensor
The super 35mm sensor is developed especially for the Cinematic VariCam Look. All models of Cinema VariCam series are equipped with the same sensor. This sensor won The Hollywood Post Alliance Engineering Excellence Award 2015.

14+ Stops of Wide Latitude
The dynamic range is 14+ stops on “V-Log”. This wide dynamic range assures accurate image rendering, particularly from the critical shadow to highlight areas. Transition into highlights is remarkable.

Natural Color Pallet
Color separation filter is well optimized to get Cinematic VariCam look. It offers natural color & accurate color linearity. New color space “V-Gamut” encompasses the entire BT. 2020 color space.

HDR and BT.2020 Compatible
“V-Log” with “V-Gamut” has enough latitude and color space for HDR. HDR and BT.2020 grading output is available for post production.

“IT is important here to note that the VariCam 35 forfeits one stop of light sensitivity in high-speed mode. For 100 fps this means then that the two native sensitivities of 400 and 2500 ISO can be chosen. Although we were filming daytime/indoor shots, the exposure at 2500 ISO was precisely on the edge owing to recording with 100 fps and in combination with the rather gloomier light set-up and the zooms used. I was particularly pleased that day not to have to illuminate the bar further. The filming day was tight, involved various viewing angles, five lead characters, various stunt, SFX and VFX shots and therefore also went on into the evening twilight. It was extremely handy for me that we could work throughout the entire shooting day with one defined lighting set-up and only had to fine-tune details shot-by-shot.”

Matthias Bolliger, DoP Hamburg/Germany

Don't be afraid of the Dark

Dual Native ISO, 800 & 5000

Dual Native ISO of 800/5000

It’s very unique, this sensor has two native ISO settings: 800 and 5000. This means you can have two film stocks in one camera. Especially native 5000 ISO offers very high sensitivity with low noise.

In order to achieve this function two dedicated analog circuits are implemented on each pixel of the imager of the VariCam for two native ISO before gain processing. This allows the camera to achieve much higher sensitivity without increased noise. Normally noise is introduced in the gain process of rating ISO in digital cameras.

The Game Changing Native 5000 ISO

- Capture with very low available light with rich color
- Get DoF even in dark situation
- Eliminate amount of additional lighting
- Eliminate time to change lighting for slow motion
- May extend "Magic Hour"

One word to describe the Panasonic VariCam is WOW! This is the camera we've all been waiting for. There is no lighting situation it can’t handle. It has two ISO’s to choose from, ISO 800 and an incredible looking ISO 5000 (and all the ISO’s in between.) It has a real "Filmic" look with all the textures, and dynamic range of the best film stocks available.

The VariCam is the most versatile camera out there. It fits so beautifully with all the new lighting technology and styles of today’s shooting.

My film “It’s a Mess” could not have been shot nearly as well with the budget, crew and equipment that I had available without use of the VariCam. The film was shot using night exteriors exclusively, relying on existing light and small lighting gear.

The icing on the cake is the impeccable service and attention Panasonic provides. I just love this camera!"

Frank Prinzi, ASC

Shooting with ISO 5000. (Short Film “It’s a Mess” by Frank Prinzi, ASC)

Frank Prinzi, ASC
In-Camera Color Grading

In-camera color grading function enables color decision on set with 3rd party application. Grading information such as 3D LUT files and CDL files can be recorded together with the master clip, allowing you to provide the same vision you created on set to the post-production. This process does not require an external BOX. In addition the applied CDL/LUT will be recorded in the recording media for each clip with same name as master clip. This easy to manage in the post-production.

4K Master and HD Graded Simultaneous Recording

In addition to main recorder up to 4K, you can have one more recorder up to 2K. This feature lets you record an ungraded 4K master with V-Log while simultaneously recording HD graded. The file name and time code of each file will match exactly. You can use HD graded for viewing or off-line editing immediately. Dailies that had been created after shooting can now be produced on-set and with only the camera.

“...the sensor of the VariCam is very clean. There is very little noise even on a very high ISO setting, which is really important for HDR. Noise is one of the most challenging things in HDR, it becomes very visible quickly because of the increased dynamic range and increased brightness. On another note, this camera is so modern and advanced in terms of the color management implementation in camera. We can load look-up tables and CDLs in camera and it will create all necessary metadata. All of that work can be performed wirelessly. It just works exactly the way you would want it to work.”

Dado Valentic, Warner Bros. colorist and color scientist
Uncompressed RAW

VariCam has "uncompressed RAW" option for Best Quality & Best Capability in post.

V-RAW for VariCam Pure
The Codex V-RAW2.0 Recorder supports uncompressed 4K resolution RAW recording with a frame rate up to 120 fps.

Cinema DNG for VariCam LT
VariCam LT can output the uncompressed RAW from SDI output terminals and external recorder records it as Cinema DNG format.

Supported Recorders
- Convergent Design: Odyssey7Q+/7Q
- Atomos: Shogun Inferno, Shogun Frame

ProRes RAW

Apple ProRes RAW is a powerful new tool for recording and creating stunning images that preserves quality while maintaining performance.

ProRes RAW for VariCam LT
Uncompressed RAW signal from SDI is captured and compressed to ProRes RAW by external recorders.

Supported Recorders
- Atomos: Shogun Inferno, Sumo19

AVC-ULTRA

AVC-Intra 4K is H.264 base codec and 4K-compatible version of the AVC-Intra. AVC-Intra 4K offers high picture quality and manageable file size and is suitable for cinema production.

ProRes*

Apple ProRes is industry standard codec and works well with your current workflow. ProRes 4444XQ/4444/422HQ/422/422LT is supported.

* ProRes is licensed from Apple Inc.

Best in Class EVF
Large-Diameter OLED Viewfinder

Accurate Viewing
Newly developed 1080p OLED panel shows very clear & accurate image, no lag, low latency, very sharp, accurate color. You can check the exposure, color and focusing on this VF correctly.

Creature Comforts
Wide field angle with viewfinder magnification of 0.78x and large-diameter 38 mm eyepiece lens offer comfortable viewing with minimum vignetting. Optical zoom adjusts image size to personal preference, and wide range locking diopter with index marks gives you your best position.

Assist Tools
This viewfinder assists you to expose properly with the Y-Get (spot meter), waveform, false color and zebra. It is capable of 2x, 3x and 4x expand focus. What is more, by color peaking and focus squares it is easily focused with just a touch.

Versatility for Creative Shooting
Extension Module

Extension Module
VariCam Pure & VariCam 35 are modular design. Extension module can be docked between camera module and recording module, and the camera module and recording module can be positioned at separate locations and connected with the AU-VCBL05G/20G (5m/20m length) Extension Cable. This lets you mount only the camera head to a crane, thus adding flexibility to your camera work.

Tag My VariCam
Custom Splash Screen and Owner Information

The camera will have 2 visible and indelible marks of ownership.
1. Custom Splash Screen
   You can personalize your flash screen with any logo, text, or graphics.
2. Owner Information
   You can input the name, address, and contact information of the equipment’s owner.

*Change of 1 and 2 requires password if CSS/Owner Info data in camera is password protected.
VariCam ROP App

VariCam ROP is a control application that enables the remote control of VariCam series. It can provide a GUI that is close to the control panel on the camera. It is designed the users to control the camera without feeling uncomfortable.

* Note: For wireless LAN connection with the camera, AJ-WM30 or AJ-WM50 wireless module needs to be purchased separately.

Incredibly Fast Offload, expressP2 x Thunderbolt™ 3

The expressP2 card B series has 10 Gbps data offload speed. The AU-XPD3 expressP2 drive, equipped with “Thunderbolt™ 3” interface, brings out the best of expressP2 card B series.

**Single drive performance**

**VariCam Line-Up**

Three VariCam models are available to meet user needs. These models fully cover the diverse applications required for cinema production. Whichever one you choose, you’ll receive the “VariCam Look” of high-quality images based on the Super 35mm Image Sensor.

---

**VariCam Pure**

**Uncompressed 4K V-RAW Cinema Camera with Codex**

Uncompressed RAW offers the best possible images today and future-proofing their content. You can capture “Pure” image quality. VariCam Pure outputs V-RAW files to Codex’s ultra-reliable Capture Drives. And that’s just the gateway to a complete dailies, review and archiving system with Codex’s Production Suite. One workflow, you won’t need anything else.

---

**VariCam 35**

**Excellent System Expansion and Operating Ease**

This high-end model provides the highest level of picture quality. Combining the 4K camera module, featuring a PL lens mount and super 35mm image sensor, with the recording module enables AVC-Intra4K444/30p, 4K422/60p, 4K-LT/120p acquisition.

---

**VariCam LT**

**Compact All Rounder**

Cinematic VariCam Look is integrated into compact and lightweight camera recorder. This invites flexibility in the form of shoulder mounting, gimbal, and drone applications. An EF lens* mount comes as standard equipment, and can be exchanged with a PL mount (optional).

---

* Panasonic does not guarantee the compatibility or performance of all EF lenses. Details will be updated on the Panasonic website.
VariCam Pure

Uncompressed 4K V-RAW Cinema Camera, Directly Record “PURE” image of VariCam 35

Super 35mm Native 4K sensor brings “VariCam Look”
- Native 4K resolution
- Cinematic VariCam Look
- Dual Native ISO (ISO 800/ISO 5000).

Uncompressed 4K/120p V-RAW Recording with Codex
Codex’s “V-RAW 2.0” recorder captures uncompressed V-RAW data to Codex’s Capture Drive 2.0 at 4K up to 120 fps.
And that’s just the gateway to a complete dailies, review and archiving system with Codex’s Production Suite.

Modular Design
VariCam Pure is a package of the VariCam 35 camera module and the Codex’s “V-RAW2.0” recorder and works completely as one system. You can use extension module to minimize camera head & operate separately.

Other Features
- Dailies in Camera
  - In-camera color grading function.
  - Best VF(AU-VCVF1) is available
- Separate Operation
  - Extension module
  - VariCam ROP app

Support with Apple ProRes and Avid DNxHR
Using Codex’s Production Suite, recorded data can be offloaded as a wide range of file formats including Panasonic V-RAW, Apple ProRes and Avid DNxHR. This ensures wide-ranging support for existing workflows.

* Customers who have already purchased the VariCam 35 camera module can also connect to the V-RAW 2.0 recorder AU-VCXRAW2. V-RAW 2.0 is manufactured by Codex and sold by Panasonic. Jointly developed with Codex Digital.
**VariCam 35**

Super 35mm 4K MOS Sensor with 4K/120-fps Compatibility in a 4K Cinema Camera.

Super 35mm Native 4K sensor brings "VariCam Look"
- Native 4K resolution
- Cinematic VariCam Look
- Dual Native ISO (ISO 800/ISO 5000).

Multiple Codec Recording up to 4K/120p
- AVC-ULTRA
  - 4K/UHD: up to 120p (4:4:4 up to 30p)
  - 2K/HD: up to 120p (4:4:4 up to 30p)
- Apple ProRes
  - 2K/HD: up to 120p (4:4:4 up to 60p)

Double Recorder
In addition to main recorder up to 4K/120p, you can have one more recorder up to 2K/60p. This feature lets you record an ungraded 4K master with V-Log while simultaneously recording graded HD files. The file name and time code of each file will match exactly. You can use HD files for viewing or off-line editing.

Modular Design
VariCam 35 is a package of the VariCam 35 camera module and the AVC-ULTRA recorder and works completely as one system. You can use extension module to minimize camera head & operate separately.

Other Features
- Dailies in Camera
- In-camera color grading function.
- Color Baked in SUB recording
- Best VF(AU-VCVF1) is available
- Separate Operation
  - Extension module
  - VariCam ROP app

* ProRes is licensed from Apple Inc.
VariCam LT
Lightweight, Compact 4K Cinema Camera Offering Many of The Features of VariCam 35

Super 35mm Native 4K sensor brings "VariCam Look"
- Native 4K resolution
- Cinematic VariCam Look
- Dual Native ISO (ISO 800/ISO 5000).

Multiple Codec Recording up to 4K/60p
- AVC-ULTRA
  - 4K/UHD: up to 60p
  - 2K/HD: up to 60p (4:4:4 up to 30p)
  - 2K/HD: up to 240p (center cropped)
- Apple ProRes
  - 2K/HD: up to 60p (4:4:4 up to 30p)

Exchangeable Lens Mount
VariCam LT has the EF lens* mount which offers a wide array of lens choices. The EF mount* can be removed by an end user and replaced with an optional PL mount. This allows for even greater versatility in lens selection when shooting with the VariCam LT.

Infrared (IR) Cinematography
The VariCam LT is equipped with a detachable IR cut filter. This feature allows 4K infrared images capturing. This offers you not only to capture subjects such as nocturnal wildlife in extreme darkness but also to achieve unique image effects in daylight as a creative tool.

RAW Output
VariCam LT supports RAW solution with external 3rd party’s recorder.* RAW data can be output from the SDI output terminals, and external RAW recorder records data as Cinema DNG files or ProRes RAW files. Equipped with two SDI output terminals, it allows 4K/60p and crop-2K/240p output.

Other Features
- Dailies in Camera
  - In-camera color grading function
  - Color Baked in sub recording
- Separate Operation
  - VariCam ROP app

* Panasonic does not guarantee the compatibility or performance of all EF lenses. For more details, to be updated on the Panasonic website.

* For details of compatibility, please check the website of each RAW recorder manufacturer.

* ProRes is licensed from Apple Inc.
