

Box-style Camera Application Example Reception / Party

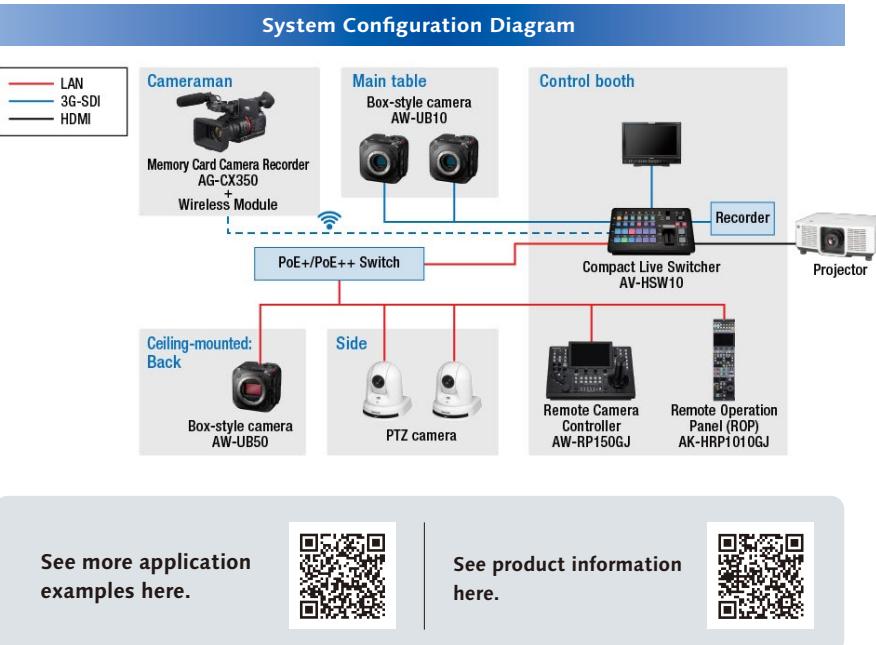

Panasonic

As of December 2025

By utilizing both a cameraman and a PTZ camera, a greater variety of angles can be achieved, enhancing the sense of immersion.

Production and Effects

In addition to the shots captured by the cameraman on-site, using remotely operated PTZ cameras adds variety to camera angles and enhances the sense of immersion. Furthermore, for cinematic-style end-roll movies, which have been increasingly in demand in recent years, filming with a box-style camera equipped with an interchangeable lens enables the production of high-quality footage. Additionally, by combining handheld cameras with PTZ cameras and box-style cameras, backup footage can be secured in case of any unexpected filming issues.

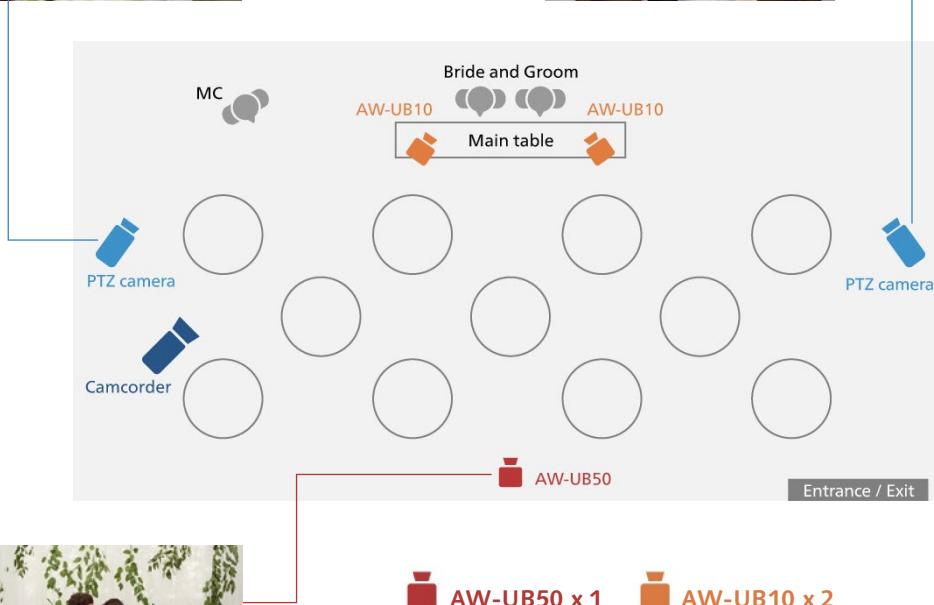

AW-UB50/UB10 +
Camcorder + PTZ Camera

Equipment Configuration and Installation Location

* The image is for illustrative purposes only.

AW-UB50 x 1 AW-UB10 x 2

One camera is positioned at the center rear to capture the couple together, while two additional cameras are placed at each end of the table.

PTZ Camera x 2

Two cameras are positioned on both sides of the main table for streaming and recording entrances, exits, and performances.

Camcorder x 1

Used as a freely movable recording camera, allowing flexibility to capture irregular angles.
