AK-HC3800
Studio Handy Camera
AK-HC3800G (Tajimi connector model)
AK-HC3800GS (LEMO connector model)
A Studio and EFP Camera System for Broadcast Use That Delivers High-End Image Quality and Enables Long-Distance Optical Fiber Transmission at Low Cost.

This cost-effective HD camera system with optical fiber transmission capability meets the high-end TV program production needs of broadcast studios. The developed AK-HC3800 Studio Handy Camera is equipped with a high-sensitivity, high-quality 2/3 type 2.2 megapixel 3CCD and a high-precision 16 bit A/D image processing circuit. The advanced digital functions such as Chromatic Aberration Compensation (CAC), Digital Extender, Film Rec Gamma, Dynamic Range Stretch (DRS) and etc. realize high image quality and versatile operations. By using the AK-HC3800 together with the AK-HCU200 Camera Control Unit, AK-HRP200G Remote Operation Panel and AK-HVF70G 17.8 cm (7 inches) LCD Color Viewfinder, an optical fiber transmission studio camera system that achieves high image quality, uncompressed and long-distance transmission, can be configured at a low cost. The camera and camera control unit can be connected for long-distance transmission of video signals over approximately 1,200 m (1,312 yards) when power is supplied from the camera control unit. The camera control unit and remote operation panel are connected either by a dedicated cable or an IP connection. Overall, the system offers excellent cost-performance and easy set-up.

* The photo shows a system example of the AK-HC3800GS (LEMO connector model).
* For studio zoom lens use, the lens support devices recommended by each lens manufacturer are required. The AK-HBU3500 build-up unit is not supported.
3CCD with High Sensitivity, Low Noise and Low Smear
The 2/3 type 2.2 megapixel 3CCD enables the standard sensitivity of F11 (2,000 lx/59.94 Hz) which is one of the highest sensitivity in this range of cameras. A high S/N ratio of 60 dB (at 59.94 Hz) produces high quality images with low noise and low smear. Panasonic’s single-channel transfer system and spatial-offset processing technologies also improve signal modulation depth and reduce moire.

Digital Extender (2x)
This function expands the image by 2x in the digital signal processing circuit, allowing powerful shooting even with a low-magnification lens. HD images retain their superior resolution even with zooming, and — unlike when a lens extender is used — brightness is not reduced.

Dynamic Range Stretch (DRS)
The DRS function automatically suppresses blocked shadows and blown highlights. A gamma curve and knee slope are estimated to match the contrast of each pixel, and applied in real time. When dark, bright, and intermediate shades are all contained in the same scene, this produces excellent gradation for each shade. The images that result are enhanced by a visually wide dynamic range.

Other Advanced Digital Functions
- 12-axis color correction, linear matrix, and other color correction functions.
- Selectable EBU or NTSC preset matrix.
- A skin tone detail function with two skin tone settings.
- A lens file function (for up to 32 files) to save flare and shading values.
- Camera settings, such as VF settings, can be saved on an SD memory card. SD memory cards can also be used for firmware upgrades.
- Various information, including the color temperature setting, is displayed in the viewfinder.
High-Definition, Long-Distance, Optical Digital Transmission
By connecting the CCU and the AK-HC3800 Studio Handy Camera by optical fiber cable, uncompressed digital signals can be transmitted with high quality. The cable between the camera and the CCU can be extended up to approximately 1,200 m (1,312 yards).*1

*1: When power is supplied from the CCU.

HD Multi-Format Supported
The AK-HCU200 is 59.94 Hz/50 Hz switchable, and supports 1080/59.94i, 1080/50i, 1080/29.97PsF,*2 1080/25PsF,*2 1080/23.98PsF,*2 720/59.94p, and 720/50p HD formats.

*2: The 1080/29.97PsF, 1080/25PsF and 1080/23.98PsF formats must be selected at the camera.

Prompter Supported
Two SDI channels and one VBS channel are provided for RET input, and prompter input (analog video signal input) is included as standard. Prompt signals input to the CCU can be output from the prompter terminal on the camera side.

HD/SD Simultaneous Operation
Two SDI OUT and two SDI OUT (PM) lines are provided. In addition to HD video signal output, SD downconverted video signal output (SDI, analog composite) comes as standard. SD monitoring is also possible.

IP Connection Camera Remote
Multiple AK-HRP200G Remote Operation Panels and up to 19 AK-HCU200 Camera Control Units can be routed through a hub with IP connection. Camera control units on a LAN can be freely controlled by the remote operation panels for highly versatile operation.

Compatibility with ROP/MSU
The AK-HRP935 Remote Operation Panel or AK-MSU935 Master Setup Unit can also be used for serial remote control of the AK-HCU200 camera control unit.*3

*3: Only functions that are supported by the CCU can be controlled by the AK-MSU935 or AK-HRP935.

2U Rack Mounting Size
The 2U height of this compact, lightweight unit allows 2U rack mounting.

Setting Up CCU with a PC
When connecting a CCU and PC by IP connection, the CCU set-up menu can be displayed and changed on the PC’s web browser.

Bar ID Display Output
Text can be superimposed onto the color bar output signal. Displaying the video source and other information in this way is convenient during system set-up and standby.

SD Memory Cards Supported
The SD memory card slot allows CCU setting data to be saved on an SD memory card. Firmware updates can also be handled by SD memory card.

System Configuration and Interface
**Control of up to 19 Cameras with IP Connection**

The AK-HRP200 supports both serial (1:1) and IP connection.**1** IP connection enables up to 19 cameras to be controlled by a single remote operation panel.

**Support a Variety of Cameras**

Four connection modes — CCU Serial, CCU IP, Remote Camera Serial, and Remote Camera IP — enable single or combined remote control of studio handy cameras, multi-purpose cameras, HD convertible cameras, and HD integrated cameras.

**ROP Menu Setting**

The menu can be displayed on a monitor connected to the Camera Control Unit, so detailed camera settings can be made by operating the Remote Operation Panel.

**Joystick Control Lever**

The joystick control lever enables fine manual iris/pedestal operation.

**SD Memory Card Slot**

Scene files and user files can be saved with the SD memory card slot. SD memory cards can also be used for firmware upgrades.

**Compact 6U Size**

The unit is compact, with a width of 92 mm and a 6U height for easy rack mounting.

AK-HVF70G
17.8 cm (7 inch) LCD Color Viewfinder

Light Weight, Low Power Consumption, and High Resolution Plus Versatile Assist Functions

LCD Viewfinder with Light Weight and Low Power Consumption
The compact, lightweight viewfinder weighs only about 1.6 kg (3.5 lb) (excluding hood, hood weights approx. 200 g (0.44 lb)). Thanks to the LCD panel, the power consumption is only 10W.

High-Resolution WSVGA Monitor
This high-resolution, 17.8 cm (7 inches) color LCD panel displays 1024 pixel x 600 pixel (WSVGA) images. Its wide viewing angle extends to 130 degrees vertically and 160 degrees horizontally (contrast > 10:1). Displays approximately 16,200,000 colors.

Focus Assist Functions
The Focus-in-Red function emphasizes the image parts that are in focus by marking their edges in red, and the Pixel-to-Pixel function displays an enlarged image without resizing.

Tilt/Pan
Mounted on the AK-HC3800, the viewfinder can be tilted upward as far as 90 degrees, downward 60 degrees, and panned horizontally 90 degrees.

Other Specifications
• Three function switches can be allocated to various functions.
• Contrast, bright, peaking adjustment dials
• Tally lamps (front/rear)
Specifications

**AK-HC3800 Studio Handy Camera**

**Power Supply:** 12 V DC (during external power supply operation)

**Power Consumption:**
- 25 W (during external power supply operation, camera only)
- 55 W (maximum power during external power supply operation, when maximum power supplied for each output connector while all accessories are connected)
- 60 W (maximum power when CCU is connected and maximum power supplied for each output connector while all accessories are connected)

**Operating Temperature:**
- –10°C to 45°C (14°F to 113°F)
- Preheating required at temperatures below 0°C (32°F)

**Storage Temperature:**
- –20°C to 60°C (-4°F to 140°F)

**Operating Humidity:**
- 10% to 85% (no condensation)

**Weight:** Approx. 3.7 kg

**Preheating required at temperatures below 0°C (32°F)**

**AK-HCU200 Camera Control Unit (CCU)**

**Power Supply:** 100 W to 240 V AC, 50Hz/60 Hz

**Power Consumption:** 170 W (Without CAMERA connected: 32 W)

**Capacity for Supplying Power to a Camera:** 190 V DC, 0.6 A

**Operating Temperature:**
- 0°C to 40°C (32°F to 104°F)

**Operating Humidity:**
