The screenshot shows the Avid Media Composer interface. The Source Browser is open to the path: DESKTOP-MTVJA5N > A051 (G:/) > PRIVATE > PANA_GRP > 001RFQAM. The 'AVCHD' folder is highlighted with a yellow box, and the '001RFQAM' folder is highlighted with an orange box. Three MOV files are visible in the top right, with the first one highlighted by a green box. The 'Link' button in the bottom right is also highlighted by a green box.

<Import AVCHD>

- ① Select [PRIVATE¥STREAM] folder in a SD card on Source Browser to display thumbnails.

<Import MOV>

- ② Select [PRIVATE¥PANA_GRP¥subfolder (e.g. 001RFQAM)] in a SD card on Source Browser to display thumbnail.
- ③ Select clips.
- ④ Click [Link] button.
