

Guide for UX Series clip import on Adobe Premiere Pro CC2017.0.1~0.2

The screenshot displays the Adobe Premiere Pro interface. The **Project** panel at the top left shows a table of media items:

Name	Video Info	Frame Rate	Media Start	Media End
00000.MTS	1920 x 1080 (1.0)	29.97 fps	05:00:00:00	05:00:19:14

A red box highlights this row. A blue box highlights the **Project:** label. A blue arrow points from the **Media Browser** to the Project panel.

The **Media Browser** at the bottom left shows a file tree with folders **DCIM** and **PRIVATE**. A red box highlights the **DCIM** folder, with a blue box labeled **MOV/MP4** pointing to it. Another red box highlights the **PRIVATE** folder, with a blue box labeled **AVCHD** pointing to it. A red circle highlights a list of files in the **DCIM** folder:

Name	File Path
03560001.MOV	H:\DCIM\03560001.MOV
03560002.MOV	H:\DCIM\03560002.MOV
03560003.MOV	H:\DCIM\03560003.MOV
03560004.MOV	H:\DCIM\03560004.MOV
03560005.MOV	H:\DCIM\03560005.MOV
03560006.MOV	H:\DCIM\03560006.MOV

The **Video Monitor** on the right shows a video preview of a person in a room. The **Timeline** at the bottom right shows a sequence with a duration of 00:00:00:00.

Text overlay: "Drag and drop files to import."
