Operating Instructions

4K Integrated Camera

Model No. AW-UE150WP
Model No. AW-UE150KP
Model No. AW-UE150WE
Model No. AW-UE150KE

Before operating this product, please read the instructions carefully and save this manual for future use. Please carefully read the “Read this first!” (pages 2 to 5) of this Manual before use.
WARNING:
• To reduce the risk of fire or electric shock, do not expose this equipment to rain or moisture.
• To reduce the risk of fire or electric shock, keep this equipment away from all liquids. Use and store only in locations which are not exposed to the risk of dripping or splashing liquids, and do not place any liquid containers on top of the equipment.

WARNING:
Always keep the main unit mounting screw, bracket mounting screws and drop-prevention wire mounting screw out of the reach of infants and small children.

CAUTION:
Do not remove panel covers by unscrewing. To reduce the risk of electric shock, do not remove the covers. No user serviceable parts inside. Refer servicing to qualified service personnel.

CAUTION:
In order to maintain adequate ventilation, do not install or place this unit in a bookcase, built-in cabinet or any other confined space. To prevent risk of electric shock or fire hazard due to overheating, ensure that curtains and any other materials do not obstruct the ventilation.

CAUTION:
To reduce the risk of fire or electric shock and annoying interference, use the recommended accessories only.

CAUTION:
Check the installation at least once a year. An improper installation could cause the unit to fall off resulting in personal injury.

CAUTION:
Do not pick up and move the unit while the tripod is attached. The fitting may break under the weight of the tripod, which may result in injury.

FCC NOTICE (USA)
Supplier’s Declaration of Conformity
Model Number: AW-UE150WP/AW-UE150KP
Trade Name: Panasonic
Responsible Party: Panasonic Corporation of North America
Two Riverfront Plaza, Newark, NJ 07102
Support contact: 1-800-524-1448

This device complies with part 15 of the FCC Rules.
Operation is subject to the following two conditions:
(1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

CAUTION:
This equipment has been tested and found to comply with the limits for a class A digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference when the equipment is operated in a commercial environment. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instruction manual, may cause harmful interference to radio communications. Operation of this equipment in a residential area is likely to cause harmful interference in which case the user will be required to correct the interference at his own expense.

FCC Warning:
To assure continued FCC emission limit compliance, follow the attached installation instructions and the user must use only shielded interface cables when connecting to host computer or peripheral devices. Also, any unauthorized changes or modifications to this equipment could void the user’s authority to operate this device.

NOTIFICATION (Canada)
CAN ICES-3 (A)/NMB-3(A)
**WARNING:**
- To reduce the risk of fire or electric shock, do not expose this equipment to rain or moisture.
- To reduce the risk of fire or electric shock, keep this equipment away from all liquids. Use and store only in locations which are not exposed to the risk of dripping or splashing liquids, and do not place any liquid containers on top of the equipment.

**WARNING:**
Always keep the main unit mounting screw, bracket mounting screws and drop-prevention wire mounting screw out of the reach of infants and small children.

**WARNING:**
This equipment is compliment with Class A of CISPR 32. In a residential environment this equipment may cause radio interference.

**CAUTION:**
Do not remove panel covers by unscrewing. To reduce the risk of electric shock, do not remove the covers. No user serviceable parts inside. Refer servicing to qualified service personnel.

**CAUTION:**
In order to maintain adequate ventilation, do not install or place this unit in a bookcase, built-in cabinet or any other confined space. To prevent risk of electric shock or fire hazard due to overheating, ensure that curtains and any other materials do not obstruct the ventilation.

**CAUTION:**
To reduce the risk of fire or electric shock and annoying interference, use the recommended accessories only.

**CAUTION:**
Check the installation at least once a year. An improper installation could cause the unit to fall off resulting in personal injury.

**CAUTION:**
Do not pick up and move the unit while the tripod is attached. The fitting may break under the weight of the tripod, which may result in injury.

---

**Turkey Only**
AEEE Yönetmeliğine Uygundur.
AEEE Complies with Directive of Turkey.
EMC NOTICE FOR THE PURCHASER/USER OF THE APPARATUS

1. Pre-requisite conditions to achieving compliance with the above standards
   <1> Peripheral equipment to be connected to the apparatus and special connecting cables
      • The purchaser/user is urged to use only equipment which has been recommended by us as peripheral equipment to be connected to the apparatus.  
      • The purchaser/user is urged to use only the connecting cables described below.
   <2> For the connecting cables, use shielded cables which suit the intended purpose of the apparatus.
      • Video signal connecting cables
         Use double shielded coaxial cables, which are designed for 75-ohm type high-frequency applications, for SDI (Serial Digital Interface).
         Coaxial cables, which are designed for 75-ohm type high-frequency applications, are recommended for analog video signals.
      • Audio signal connecting cables
         If your apparatus supports AES/EBU serial digital audio signals, use cables designed for AES/EBU.
         Use shielded cables, which provide quality performance for high-frequency transmission applications, for analog audio signals.
      • Other connecting cables (IEEE1394, USB)
         Use double shielded cables, which provide quality performance for high-frequency applications, as connecting cables.
         When connecting to the DVI signal terminal, use a cable with a ferrite core.
         If your apparatus is supplied with ferrite core(s), they must be attached on cable(s) following instructions in this manual.

2. Performance level
   The performance level of the apparatus is equivalent to or better than the performance level required by these standards.
   However, the apparatus may be adversely affected by interference if it is being used in an EMC environment, such as an area where strong electromagnetic fields are generated (by the presence of signal transmission towers, cellular phones, etc.). In order to minimize the adverse effects of the interference on the apparatus in cases like this, it is recommended that the following steps be taken with the apparatus being affected and with its operating environment:
      1. Place the apparatus at a distance from the source of the interference.
      2. Change the direction of the apparatus.
      3. Change the connection method used for the apparatus.
      4. Connect the apparatus to another power outlet where the power is not shared by any other appliances.
Disposal of Old Equipment

Only for European Union and countries with recycling systems

This symbol on the products, packaging, and/or accompanying documents means that used electrical and electronic products must not be mixed with general household waste.

For proper treatment, recovery and recycling of old products, please take them to applicable collection points in accordance with your national legislation.

By disposing of them correctly, you will help to save valuable resources and prevent any potential negative effects on human health and the environment. For more information about collection and recycling, please contact your local municipality, dealer or supplier. Penalties may be applicable for incorrect disposal of this waste, in accordance with national legislation.

Note on grounding

• Ground the unit via the <SIGNAL GND> ground connector.

![Grounding diagram]

Trademarks and registered trademarks

• Microsoft®, Windows®, Windows® 7, Windows® 10, Microsoft Edge, Internet Explorer®, ActiveX® and DirectX® are either registered trademarks or trademarks of Microsoft Corporation in the United States and other countries.
• Apple, Mac, macOS, OS X, iPhone, iPad, and Safari are registered trademarks of Apple Inc., in the United States and other countries.
• Android™ and Chrome™ browser are trademarks of Google LLC.
• Intel® and Intel® Core™ are trademarks or registered trademarks of Intel Corporation in the United States and other countries.
• Adobe® and Reader® are either registered trademarks or trademarks of Adobe Systems Incorporated in the United States and/or other countries.
• The terms HDMI and HDMI High-Definition Multimedia Interface, and the HDMI Logo are trademarks or registered trademarks of HDMI Licensing Administrator, Inc. in the United States and other countries.
• NDI® is a registered trademark of NewTek, Inc.
• Other names of companies and products contained in these Operating Instructions may be trademarks or registered trademarks of their respective owners.

Abbreviations

The following abbreviations are used in this manual.
• Microsoft® Windows® 7 Professional SP1 32/64-bit is abbreviated to “Windows 7”.
• Windows® Internet Explorer® 11 32/64-bit is abbreviated to “Internet Explorer”.

For the purposes of this manual, the model numbers of the units are given as listed in the table below.

Illustrations and screen displays featured in the manual

• What is shown in the manual’s illustrations and screen displays may differ from how it is actually appears.
• Functions which can be used by Windows Internet Explorer 11 only are indicated using the Windows IE 11 mark.
• The screenshots are used in accordance with the guidelines of Microsoft Corporation.

About copyright and licence

Distributing, copying, disassembling, reverse compiling, reverse engineering, and also exporting in violation of export laws of the software provided with this unit are expressly prohibited.
Before use

Overview

• This product is an all-in-one pan-tilt head remote camera that supports 4K/12G-SDI and is also compatible with 4K/60p format.

• Equipped with an optical 20x zoom lens and 4K-compatible MOS sensor, it is possible to record high-quality images with a high degree of realism with the horizontal resolution of 1600 lines. With its high sensitivity and built-in image-shake correction and night-mode functions, the unit can record in a wide range of environments.

• This product is compatible with NDI|HX technology of NewTek, Inc.

• The unit supports transmission of video to NewTek NDI|HX compatible software applications and hardware devices over a network.

• When a controller is connected, camera operations can be performed smoothly via IP control or serial control.

• The unit features a night mode that exposes subjects to infrared rays, making it possible to shoot even under low-light conditions.

• When the unit is connected to a personal computer via an IP network, it can be operated via a web browser.

• With a variety of 4K interfaces, there are individual outputs for HD and SDI, so the unit can be used flexibly in a wide range of situations as a 4K-compatible remote camera.

• Connection with a Panasonic camera controller is also possible via Panasonic's proprietary serial communication format.

• The unit is available in white (AW-UE150WP/AW-UE150WE) or black (AW-UE150KP/AW-UE150KE) to suit your intended application and environment.

Before use (continued)

**IMPORTANT**
- Failure to provide the required personal computer environment may slow down the delineation of the images on the screen, make it impossible for the web browser to work and cause other kinds of problems.

**<NOTE>**
- Depending on the software version of the unit, an update may be necessary.
- For the latest information on compatible operating systems and web browsers, visit the support desk at the following website.
  https://pro-av.panasonic.net/

**Disclaimer of warranty**

IN NO EVENT SHALL Panasonic Corporation BE LIABLE TO ANY PARTY OR ANY PERSON, EXCEPT FOR REPLACEMENT OR REASONABLE MAINTENANCE OF THE PRODUCT, FOR THE CASES, INCLUDING BUT NOT LIMITED TO BELOW:

1. Any damage and loss, including without limitation, direct or indirect, special, consequential or exemplary, arising out of or relating to the product;
2. Personal injury or any damage caused by inappropriate use or negligent operation of the user;
3. Unauthorized disassembly, repair or modification of the product by the user;
4. Inconvenience or any loss arising when images are not displayed, due to any reason or cause including any failure or problem of the product;
5. Any problem, consequential inconvenience, or loss or damage, arising out of the system combined by the devices of third party;
6. Any demands for compensation, claims, etc., occasioned by the infringement of privacy by individuals or organizations whose images were shot by the user because these images (including the recordings made) were made available by the user because in the public domain for some reason or other or because the images ended up being used for purposes other than the one described above;
7. Loss of registered data caused by any failure.

**Network security**

As the unit intended to be used while connected to a network, the following security risks exist.

1. Leakage or theft of information through the unit
2. Unauthorized operation of the unit by persons with malicious intent
3. Interference with or stoppage of the unit by persons with malicious intent

It is your responsibility to take precautions, such as those described below, to protect yourself against the above network security risks. Panasonic does not accept any responsibility for damage of this type.

- Use the unit in a network secured by a firewall, etc.
- If the unit is connected to a network that includes personal computers, make sure that the system is not infected by computer viruses or other malicious programs (using a regularly updated antivirus program, anti-spyware program, etc.).
- Protect your network against unauthorized access by restricting users to those who log in with an authorized user name and password.
- After accessing the unit as an administrator, be sure to close all web browsers.
- Change the administrator password periodically.
- To avoid passwords that can be guessed easily by third parties, set a password of at least 8 characters in length, including at least 3 different types of characters, such as upper case, lower case, numbers, and symbols.
- Restrict access to the unit by authenticating the users, for example, to prevent setting information stored on the unit from leaking over the network.
- Do not install the unit in locations where the unit, cables, and other parts can be easily damaged or destroyed by persons with malicious intent.
- Avoid connections that use public lines.

**<NOTE>**

**Notes on user authentication**

- User authentication on the unit can performed via digest authentication or basic authentication. If basic authentication is used without the use of a dedicated authentication device, password leaks may occur.
- We recommend using digest authentication or host authentication.

**Usage restrictions**

- We recommend connecting the unit, controller, and any computers to the same network segment.
- Events based on settings inherent to the network devices, for example, may occur in connections that include different segments, so be sure to perform checks prior to operation.
**Features**

**Multi-format support**
- You can switch between the following formats via the camera menus or a web browser.

[**4K format**]
2160/59.94p, 2160/50p, 2160/29.97p, 2160/25p, 2160/24p, 2160/23.98p

[**HD format**]
1080/59.94p, 1080/50p, 1080/29.97p, 1080/25p, 1080/23.98p, 1080/24p, 1080/23.98p

*1 Native output
*2 OVER 59.94i output (your monitor may recognize the signal as 59.94i).

**1-type 4K MOS sensor and high-performance 20x zoom lens featured**
- A newly developed 1-type 4K MOS sensor and DSP (digital signal processor) are incorporated. High-quality pictures are obtained by video processing in many different kinds of ways.
- In addition to its optical 20x zoom lens, the unit comes with a 10x digital zoom to achieve high-quality images that overflow with ambiance.
- A dynamic range stretcher (DRS) function that compensates for overexposure and loss of dark detail and a digital noise reduction (DNR) function for minimizing image lag even in dark locations and shooting scenes clearly are incorporated to produce clean and clear images in a wide range of applications.

**Easy operation of unit enabled by its integration with a high-performance pan-tilt head unit**
- Operations at the high speed of 60°/s
- Wide rotational angles with a panning range of ±175° and a tilting range from –30° to 210°
- Quiet operation with noise levels of NC35
- Storage of up to 100 positions in the preset memory (The number of preset memories that can be used varies from one controller to another.)

**Built-in night mode**
- The unit supports infrared shooting. By exposing subjects to infrared rays, shooting under ordinarily difficult low-light conditions is possible. (Image output will be in black and white.)
- The iris will be fixed at open.

**IP image output functions**
- The unit is equipped with image compression and IP transmission LSI capabilities. Output in 4K quality at up to 60 fps.
- Operation with IP control allows for a wide range of applications, such as controlling the camera from remote locations.

**High degree of compatibility with Panasonic’s currently available controllers, enabling a flexible system to be put together**
- A maximum of five units can be operated by serial control from one of Panasonic’s currently available controllers (AW-RP150). The unit can also be used together with the cameras and pan-tilt head unit systems currently available from Panasonic Corporation so that an existing system can be used to advantage to put together a system that is even more flexible.

**Easy construction of systems thanks to integrated design used for pan-tilt head, camera and lens**
- By integrating the camera, lens and pan-tilt head into a single unit, it is now easier to construct systems.

**Use of easy-to-operate wireless remote control (optional accessory) is possible**
- A wireless remote control capable of operating up to four units can be used. It can easily be used to set the various functions or switch between them while viewing the menu screens.

**Flexible camera layout enabled by simple connection and installation**
- This unit features excellent connectivity and installability thanks to the IP control; a lightweight main unit, and the turn-lock mechanism, which enables the user to install it on his or her own (only when used indoors).

**Easy connections and settings courtesy of IP control**
- Up to two hundred units can be operated by IP connection from a Panasonic controller (AW-RP150).
- The unit maintains the compact installation footprint of previous models.

**PoE++ *3 eliminates need for camera power configurations**
- Configurations for camera’s power supply are not necessary when the unit is connected to a network device that supports the PoE++ standard (IEEE 802.3bt compliant)*4. Software authentication (LLDP) is also supported, but it may be necessary to make settings on the network device (IEEE P802.3bt compliant)*4.

**<NOTE>**
- It may be necessary to upgrade the version of the controllers other than AW-RP150 in order to support the unit. For details on upgrading, visit the support page on the following website. https://pro-av.panasonic.net/
- The maximum distances between the units and controller is 1000 meters (3280 ft). (when serial control is exercised)
- Use of an external device or some other means must be provided separately in order to extend the video signal connections.

**While including a larger 4K lens and pan/tilt mechanism, the unit still has the same installation footprint as previous models.**
- The unit maintains the compact installation footprint of previous models.

**<NOTE>**
- Bear in mind that this unit is designed to be used indoors only: It cannot be used outdoors.

**Power over Ethernet Plus Plus. Referred to as “PoE++” in this manual.**

**For details on PoE++ power supply devices for which operation has been verified, consult your local dealer.**

<NOTE>
- It is now easier to construct systems.
- It cannot be used outdoors.
Accessories

Check that the following accessories are present and accounted for.

- After removing the product from its container, dispose of the power cable cap (if supplied) and packing materials in an appropriate manner.

<table>
<thead>
<tr>
<th>Mount bracket for installation surface (Hanging/Desktop) (1)</th>
<th>Main unit mounting screw (with flat washer, spring washer) M3×6 mm (1/4 inches) (1)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Drop-prevention wire (1) Drop-prevention wire mounting screw (1) (comes attached to the unit)</td>
<td>Bracket mounting screws (bind-head) M4×10 mm (13/32 inches) (4)</td>
</tr>
</tbody>
</table>

Optional accessories

● Wireless remote control AW-RM50G (Size “AA” dry battery x 2, obtained separately)
● Direct ceiling mount bracket WV-Q105A
● Fiber module

<NOTE>
- For details on optional accessories, refer to the catalog or consult your local dealer.
Operating precautions

- **Shoot under the proper lighting conditions.**
  To produce pictures with eye-pleasing colors, shoot under the proper lighting conditions. The pictures may not appear with their proper colors when shooting under fluorescent lights. Select the proper lighting as required.

- **To ensure a stable performance in the long term**
  Using the unit for prolonged periods in locations where the temperature and humidity levels are high will cause its parts to deteriorate, resulting in a reduction of its service life.
  (Recommended temperature: Max. 35 °C (95 °F))
  Ensure that a cooling unit or heating unit will not blow any air directly toward the installation location.

- **Do not point the camera at strong lights.**
  When parts of the MOS sensor are exposed to spotlights or other strong lights, blooming (a phenomenon where the edges of strong lights become blurred) may occur.

- **What happens with high-brightness subjects**
  Flare may occur if an extremely bright light source is pointed at the lens. In a case like this, change the angle or take some other remedial action.

- **When using the automatic functions**
  - In the [Scene] such as the camera menu, the initial settings on some items has been set to auto, making it impossible for these items to be operated manually. To operate them manually, switch from the auto settings to the manual settings as required.
  - When using the ATW (auto tracking white adjustment) function under fluorescent lights, the white balance may vary.
  - In some situations, it may be hard to focus at the auto setting. In cases like this, select the manual setting, and focus manually.

- **Zooming and focusing**
  When the focus is set manually, out-of-focusing may occur during zooming. After zooming, if necessary, either adjust the focus or set the focus to auto.
  When using the focus at the manual setting, proceed with zooming after setting the focus position at the Tele end where the focusing accuracy is higher. (However, if the distance from the unit to the subject is less than 1.5 meters (4.92 ft), the subject may shift out of focus at the Wide end.) If zooming is performed to the Tele end after having adjusted the focus at the Wide end, out-of-focusing may occur.

- **Operation of the lens when the power is turned on**
  When the unit’s power is turned on, the zoom, focus and iris are adjusted automatically.

- **The unit comes with the safe mode.**
  The safe mode is function designed to protect the unit from damage. For details, refer to “Concerning the safe mode” (→ page 147).

- **Operating temperature range**
  Avoid using the unit in cold locations where the temperature drops below 0 °C (32 °F) or hot locations where the temperature rises above 40 °C (104 °F) since these temperatures downgrade the picture quality and adversely affect the internal parts.

- **Concerning the MONI OUT signal**
  It is anticipated that MONI OUT is used in applications such as for outputting images to be cropped from 4K to HD and for monitoring images.

- **Concerning the HDMI interface standard**
  This unit has been certified as HDMI-compatible, but on rare occasions images may not be displayed depending on the HDMI device which has been connected to the unit.

- **Color bars**
  Color bars are used to adjust the color phase, and the widths and positions of these bars may differ from other models.

- **H.264/H.265 patent pool licensing**
  This product is licensed based on the AVC Patent Portfolio License, and the license does not extend beyond uses by users, who engage in the acts described below, for their own personal and non-profit applications.
  (i) Recording of image information in compliance with the AVC standard (hereafter, “AVC videos”)
  (ii) Playing of AVC videos recorded by consumers engaging in personal activities or AVC videos acquired from licensed providers
  For details, visit MPEG LA, LLC website (http://www.mpegla.com).

- **Concerning PoE++ power supply**
  The unit complies with the IEEE 802.3bt.
  Use a compatible Ethernet hub and PoE++ injector to use a PoE++ power supply.
  Software authentication (LLDP) complies with IEEE P802.3bt, but it may be necessary to make settings on the network device.
  For details on Ethernet hubs and PoE++ injectors for which operations have been verified, consult your local dealer.

- **Turn off the power before connecting or disconnecting the cables.**
  This unit is not equipped with a power switch.
  Turn off the DC 12 V power supply or PoE++ power supply device before connecting or disconnecting cables.

- **Handle the unit carefully.**
  Do not drop the unit or subject it to strong impact or vibration. Failure to obey may cause the unit to malfunction.

- **When the unit is not in use**
  Turn off the unit’s power when it is not in use.
  When the unit is no longer going to be used, do not leave it lying around, but be absolutely sure to dispose of it properly.
Operating precautions (continued)

■ Do not touch the optical system parts.
The optical system parts are vital to the operation of the camera. Under no circumstances must they be touched. In the unlikely event that they have become dusty, remove the dust by using a camera blower or by wiping them gently with a lens cleaning paper.

■ Do not point the camera directly at the sun or a laser beam no matter whether it is turned on or not.
Taking images of the sun, laser beams, or other brightly lit subjects for prolonged periods of time may damage the CCD.

■ Personal computer used
If the same image is displayed for a prolonged period on a personal computer's monitor, the monitor may be damaged. Use of a screen saver is recommended.

■ Concerning the IP address setting
Do not run the Easy IP Setup Software on a multiple number of personal computers for a single camera and set the IP address at the same time. Otherwise, you will be unable to complete the proper procedure and set the IP address correctly.

■ Do not allow foreign matter to make contact with the rotating parts.
Failure to obey may cause the unit to malfunction.

■ Do not get close to the moving parts of the camera head.
Do not put your fingers or body close to the unit while it is in operation. Doing so may result in injury or cause the unit to malfunction. Furthermore, if the unit hits a person or obstacle, during the panning or tilting operation, the unit will enter into the safe mode. For details, refer to the page 147.

■ Keep the unit away from water.
Avoid all direct contact with water. Failure to obey may cause the unit to malfunction.

■ Maintenance
Turn off the unit’s power before proceeding with maintenance. Failure to obey may result in injuries. Wipe the surfaces using a soft dry cloth. Avoid all contact with benzine, paint thinners and other volatile substances, and avoid using these substances. Otherwise, the casing may become discolored.

■ Do not turn the camera head by hand.
Turning the camera head by hand may cause the unit to malfunction.

■ Use the unit in an environment with minimal moisture and dust.
Avoid using the unit in an environment with high concentration of moisture or dust since these conditions will damage the internal parts.

■ About the lens/pan-tilt head
If the lens, pan-tilt head, and other parts are not operated for a long period of time, the viscosity of the grease applied inside them may increase and operation may become no longer possible. Move the lens and pan/tilt head regularly.

■ Concerning consumables
The following parts are consumables. Replace them using the lifespans as a guide. The lifespans may vary depending on the operating environment and operating conditions. The lifespans are a guide for when the unit is used at 35 °C (95 °F).
• Cooling fan: Approx. 15000 hours
Contact your dealer regarding replacements.

■ Disposal of the unit
When the unit has reached the end of its service life and is to be disposed of, ask a qualified contractor to dispose of the unit properly in order to protect the environment.

Information on software used with this product
This product includes GNU General Public License (GPL) and GNU Lesser General Public License (LGPL) licensed software, and the customer is entitled to obtain, modify, or redistribute the source code for the software.
This product includes MIT Licensed software.
This product includes BSD Licensed software.
For details on obtaining the source codes, visit the following website. https://panasonic.biz/cns/sav/
However, do not contact Panasonic for questions regarding obtained source codes.
This unit can be operated by remote control using a wireless remote control (model number: AW-RM50G) purchased separately. Check out the following points before using the wireless remote control.

- Point the wireless remote control at the unit’s wireless remote control signal light-sensing area (front panel or back panel), and operate it within a range of 10 meters (32.8 ft) from these areas.

- Refer to <Layout of wireless remote control signal light-sensing areas> on the right.

- The signal sensing distance is reduced if the angle at which the wireless remote control signals are sensed is increased.
  The light-sensing sensitivity is reduced to about one-half when the wireless remote control is pointed at an angle of 40 degrees from each position in front of a wireless remote control signal light-sensing area (front panel or back panel).
  If the remote control is operated from the behind the unit, it may be either difficult or impossible to perform the desired operations.

- If the unit is installed near fluorescent lights, plasma monitors or other such products or if the unit is exposed to sunlight, the effects of the light may make it impossible for the unit to be operated using the wireless remote control.
  Be sure to follow the steps below for installation and use.
  • Take steps to ensure that the wireless remote control signal light-sensing area will not be exposed to the light from fluorescent lights, plasma monitors or other such products or from the sun.
  • Install the unit away from fluorescent lights, plasma monitors and other such products.

- For about 10 minutes even after the batteries have been removed from the wireless remote control, the selection of the operation to be performed (the <CAM1>, <CAM2>, <CAM3> or <CAM4> button which was pressed last) will remain stored in the memory.
  When a longer period of time elapses, however, the selection is reset to the status established when the <CAM1> button was pressed.

**<Layout of wireless remote control signal light-sensing areas>**

**<NOTE>**
- The arrows in the figure below show the light-sensing directions in which the wireless remote control signals travel.

**<Wireless remote control signal light-sensing area (back panel, 1 place)>**

**<Wireless remote control signal light-sensing area (front panel, 2 places)>**

**Top view**

**Rear panel view**
1. **Mount bracket for installation surface (supplied accessory)**
   Mount this bracket onto the installation surface, and then attach the camera main unit to the bracket.

2. **Drop-prevention wire**
   This wire is screwed down to the bottom panel of the camera main unit. Loop the circle part of the wire around the hook of the mount bracket.

3. **Status display lamp**
   This lights in the following way depending on the status of the unit.
   - **Orange**
     - Light up: When the standby status is established
     - Blink twice: When a signal not matched by the remote control ID has been received from the wireless remote control (optional accessory) while the power is on
   - **Green**
     - Light up: When the power is on
     - Blink twice: When a signal matched by the remote control ID has been received from the wireless remote control (optional accessory) while the power is on
     - Blinking rapidly: When the initialization process is complete
   - **Red**
     - Light up: When trouble has occurred in the unit
     - Blinking slowly: Firmware being updated
     - Blinking rapidly: When a PoE++ software authentication error has occurred

4. **Tilt head**
   This rotates in the right and left direction.

5. **Wireless remote control signal light-sensing area**
   The light-sensing area is provided in three places, on the front panel of the camera pedestal and at the top of the rear panel.

6. **Hole for securing the camera pedestal**
   This hole is provided in the bottom panel of the camera pedestal.

7. **Camera head**
   This rotates in the up and down direction.

8. **Tally lamp**
   This comes on or goes off in response to the control from the controller but only when “On” has been selected as the tally lamp use setting. The tally lamp is red or green.

9. **LAN connector for IP control <LAN LINK/ACT>**
   This LAN connector (RJ-45) is connected when exercising IP control over the unit from an external device. Use a LAN cable (category 5e or better, maximum 100 m (328 ft)) for connection.
10. RS-422 connector <RS-422>

This RS-422 connector (RJ-45) is connected when exercising serial control over the unit from an external device. Use a cable with the following specifications for the connection to this connector. Furthermore, by shorting the R-TALLY signal (2-pin) with the GND (1-pin), it is possible to light the tally lamp (red) in the camera head section of the unit.

**<NOTE>**
- Do not connect PoE cable to the RS-422 port.
- Do not apply a voltage to the R_TALLY_IN signal pin.
- Menu settings enable the output to pin 7 and pin 8 of the red tally and green tally signals received by the unit. Output is by contact output, and normally is “OPEN”, then it becomes “MAKE” for output. (→ page 65)

**LAN cable**¹ (category 5e or above, straight cable), max. 1000 m (3280 ft)

¹ Use of an STP (shielded twisted pair) cable is recommended.

<tr>
<td>SW4</td>
<td>OFF</td>
</tr>
</tbody>
</table>

**Initialization 1**
- Reset the user authentication settings and host authentication settings for network connection.
  (This will delete all the registered user information (IDs/passwords) and host information (IP addresses).
- With the IR ID switches and service switches set as shown below, turn on the power of the unit.

**<NOTE>**
- When initialization is complete, the status display lamp on the front of the unit blinks green. Set the service switches back to their original positions (SW1 to SW4 all OFF), then restart the unit.

**Initialization 2**
- The unit is reset to the state it was in at the time of purchase. (All camera menu setting values and network setting values are reset.)
- With the IR ID switches and service switches set as shown below, turn on the power of the unit.

**<NOTE>**
- When initialization is complete, the status display lamp on the front of the unit blinks green. Set the service switches back to their original positions (SW1 to SW4 all OFF), then restart the unit.

12. HDMI connector <HDMI>

This is the HDMI video output connector.

13. 3G SDI OUT connector <3G SDI OUT>

This is the 3G SDI video signal output connector.
### G/L IN connector <G/L IN>
This is the external sync signal input connector. This unit supports BBS (Black Burst Sync) and tri-level synchronization. Supply to this connector the signals that correspond to the video signal format which has been set.

**Frequency:** 59.94 Hz, 29.97 Hz

### IR ID switches <IR ID>
These are used to select the ID of the wireless remote control (optional accessory). (→ page 24)

### Ground connector
Connects to the ground connector on a wall outlet, ground bar, etc. for grounding. (→ page 6)

### AUDIO IN connector <AUDIO IN>
Inputs external audio (microphone, line).

### Ventilation holes
Blocking the ventilation holes may cause a malfunction. Make sure there is sufficient space around the ventilation holes.

### MONITOR OUT connector <MONI OUT>
This is an SDI video signal output connector. Use it in applications such as displaying the crop position when cropping from 4K to HD and for monitoring images.

### 12G SDI OUT connector <12G SDI OUT>
This is a 12G-SDI video signal output connector.

### Optical connector <OPTICAL>
This is the connector for the SFP+ optical fiber module. By connecting the optional fiber module, it is possible to output signals converted to optical signals from SDI signals. Select the fiber module that suits the signal band*1 for each format.

*1
- 4K (59.94p, 50p): 12G
- 4K (other than 59.94p, 50p): 6G
- HD (59.94p, 50p): 3G
- HD (other than 59.94p, 50p): 1.5G

**NOTE**
- This unit does not support input by optical signals.

### Tripod screw holes
(1/4-20 UNC, ISO 1222 [6.35 mm (1/4 inches)])
Use these screw holes when securing the unit to a tripod, etc.

### When “Streaming mode” is set to “NDI|HX”

| Settings | NDI|HX | JPEG(1) |
|----------|-----|--------|
| Resolution | 1920×1080 | 1280×720 | 640×360 | 320×180 |
| System frequency 59.94Hz | 60fps | 30fps | 15fps | 5fps |
| System frequency 50Hz | 50fps | 25fps | 12.5fps | 5fps |
| System frequency 29.97Hz | 30fps | 15fps | 5fps |
| System frequency 25Hz | 25fps | 12.5fps | 5fps |
| System frequency 24/23.98Hz | 24fps | — | — | — |

- It is not possible to select NDI|HX mode when the system frequency is 24/23.98Hz.
- The transmission mode (Transmission priority) cannot be selected.
1. **ON/STANDBY button** <ON/STANDBY>
   Each time this is pressed for 2 seconds, operation switches between turning on the unit’s power and establishing the standby status.

2. **Signal transmission window**

3. **MENU button** <MENU>
   Each time this is pressed for 2 seconds, operation switches between displaying the unit’s camera menu and exiting the camera menu. When it is pressed quickly (for less than 2 seconds) while a camera menu is displayed, the setting change is canceled. Furthermore, the pan and tilt movement range limits (limiters) are set and released by operating the <MENU> button, <PRESET/LIMIT> button and the pan/tilt buttons (<< up> << right> << down> << left>).
   For details, refer to “Setting/releasing the limiters” (→ page 146).
   <NOTE>
   • It is not possible to switch the 12G SDI/OPTICAL, 3G SDI, HDMI output camera menu displays in the factory settings. Switch the setting to [On] with the camera menu. (→ page 54)

4. **CAM1 to CAM4 buttons**
   <CAM1> <CAM2> <CAM3> <CAM4>
   Selects a camera to be operated. Once a button has been selected, the unit corresponding to the selected button can be operated.

5. **SET button** <SET>
   If this button is held down for 2 seconds when the [AWB A] memory or [AWB B] memory has been selected for the white balance adjustment, the black balance is adjusted automatically and registered in the memory selected.
   When this button is pressed for under 2 seconds, only the white balance is adjusted automatically.

6. **MODE button** <MODE>
   This is used to select the video signals which are output from the unit. Each time it is pressed, the signals are switched between the color bar signals and camera video signals.
   <NOTE>
   • When [Audio] is set to [On] and the color bar is displayed, a test sound (1 kHz) is output. Be cautious of the volume on external devices.

7. **GAIN button** <OFF> <LOW> <HI> <AUTO>
   These are used to set the gain. The gain increase can be set in three steps using the <OFF>, <LOW> and <HI> buttons. <LOW> is set to 9 dB, and <HI> is set to 18 dB.
   When the <AUTO> button is pressed, the AGC function is activated, and the gain is adjusted automatically depending on the light quantity. The maximum gain of the AGC function can be set using the camera menu.

8. **Preset memory call buttons** <1> to <12>
   These are used to call the information on the unit’s directions and other settings, which have been registered in the unit’s preset memories No.1 to No.12, and reproduce those settings.
   Settings in preset memories No.13 and above cannot be called from the wireless remote control.

9. **PRESET/LIMIT button** <PRESET/LIMIT>
   This is used to register the settings in the preset memories or set or release the limiters.
   When a preset memory call button is pressed while the <PRESET/LIMIT> button is held down, the information on the unit’s current direction and other settings is registered in the call button. Preset memory call buttons <1> to <12> correspond to the unit’s No.1 to No.12 preset memories.
   Furthermore, the pan and tilt movement range limits (limiters) are set and released by operating the <PRESET/LIMIT> button, <MENU> button and the pan/tilt buttons (<< up> << right> << down> << left>).
   For details, refer to “Setting/releasing the limiters” (→ page 146).
10. Pan-tilt buttons and menu operation buttons
10.1) These are used to change the unit’s direction.
   The unit is tilted in the up/down direction using the <▲> and <▼> buttons and panned in the left/right direction using the <←> and <→> buttons.
   The <←> button does not work during tilting and panning. When the <▲> or <▼> and <←> or <→> buttons are pressed at the same time, the unit moves diagonally.
2) The buttons are used for menu operations when the unit displays the camera menus.
   Use the <▲>, <▼>, (<←>, <→>) buttons to select the menu items. When a selected item has a sub-menu, the sub-menu will be displayed by pressing the <→> button.
   When the cursor is aligned with a particular item and the <→> button is pressed on the setting menu at the bottom hierarchical level, the setting of the selected item blinks.
   When the <→> button is pressed after the setting has been changed using the <▲> and <▼> (<←> and <→>) buttons, the setting stops blinking, and the new setting is entered.
   A setting for a regular menu item is reflected immediately if it is changed while it is still flashing.
   If the <MENU> button is pressed quickly (for less than 2 seconds) while the setting is in the blinking status, the change will be canceled, and the setting selected prior to the change will be restored.
   <NOTE>
   • To prevent malfunctioning, there are a number of menu items ([Scene], [Format] and [Frequency]) whose setting is not reflected immediately even if it is changed while it is still flashing.
   • White balance adjustment is not possible in night mode.
   • ND filter switching is not possible in night mode.

11. FOCUS button <F> <N>
   These are used to adjust the lens focus manually when the manual setting is established for the lens focus.
   The focus is adjusted in the far using the <F> button and in the near using the <N> button.

12. A/FOCUS button <A/FOCUS>
   This is used when automatically adjusting the lens focus.

13. M/FOCUS button <M/FOCUS>
   This is used when manually adjusting the lens focus.
   The FOCUS buttons (<F> and <N>) are used when performing the actual adjustment.

14. OPT button <ON> <OFF>
   Turn night mode on/off.
   <NOTE>
   • In night mode, video output will be in black and white. In addition, the iris will be forcibly opened.
   • White balance adjustment is not possible in night mode.
   • ND filter switching is not possible in night mode.

15. HOME button <HOME>
   When this is pressed for 2 seconds, the unit’s direction (panning or tilting) returns to the reference position.

16. ZOOM button <T> <W>
   These are used to adjust the lens zoom.
   The zoom is adjusted in the wide-angle using the <W> button in the telephoto using the <T> button.

17. FAST button <FAST>
   This is used to change the movement speed at which the panning, tilting, zooming and focusing operations are performed to the high speed.
   When the button is tapped, the movement speed can be set to the normal high-speed operation. When the button is held down, it can be set to an even faster high-speed operation. Tap the button to return the movement speed to the normal high-speed operation.
   <NOTE>
   • The operating speed for panning and tilting when the preset memory settings have been called can be changed using the “Preset Speed” item of the camera menu.

18. SLOW button <SLOW>
   This is used to change the movement speed at which the panning, tilting, zooming and focusing operations are performed to the low speed.
   When the button is tapped, the movement speed can be set to the normal low-speed operation. When the button is held down, it can be set to an even slower low-speed operation. Tap the button to return the movement speed to the normal low-speed operation.

19. A/IRIS button <A/IRIS>
   This establishes the setting for adjusting the lens iris automatically in line with the light quantity.

20. M/IRIS button <M/IRIS>
   This establishes the setting for adjusting the lens iris manually.
   The <IRIS +> and <IRIS –> buttons are used when performing the actual adjustment.

21. IRIS + button <IRIS +>
   This is used to adjust the lens iris in the opening direction.

22. IRIS – button <IRIS –>
   This is used to adjust the lens iris in the closing direction.
Setting the remote control IDs

The wireless remote control (optional accessory) is capable of operating up to four units. IDs are used to set which units are selected when the <CAM1>, <CAM2>, <CAM3> and <CAM4> buttons on the wireless remote control have been pressed.

- When operating a multiple number of these units using wireless remote controls, set a different remote control ID for each control.
- When using one unit, set the remote control ID to "CAM1" unless the setting needs to be changed.

Setting procedure

Operate the IR ID switches on the unit's rear panel, and select "CAM1", "CAM2", "CAM3" or "CAM4" as the remote control ID. (→ page 17)

The IR ID switch settings "CAM1" to "CAM4" correspond to the <CAM1> to <CAM4> buttons on the wireless remote control.

(The factory setting is "CAM1".)
Use the Easy IP Setup Software to establish the unit’s settings

The settings related to the unit’s network can be established using the Easy IP Setup Software.
You can obtain Easy IP Setup Software (EasyIPSetup.exe) by downloading it from the following website.
https://pro-av.panasonic.net/

To establish the settings for a multiple number of units, the settings must be selected for each camera involved.
If the settings cannot be established using the Easy IP Setup Software, select the settings separately for the unit and personal computer on the Network setup screen [Network] of the setting menu. (→ page 124)

<NOTE>
• If, after the network settings have been established, another device in the same network has the same IP address, the network operations will not be performed properly.
Set the IP address in such a way that it does not duplicate an existing IP address.
• Do not establish network settings from a multiple number of Easy IP Setup Software programs at the same time for a single camera. Similarly, do not perform the “Auto IP setting” operation of the AW-RP150 remote camera controller at the same time.
The IP address settings may no longer be recognized as a result.
• To enhance the security of the Easy IP Setup Software, it will not be possible to make network settings for the target camera once about 20 minutes or more have elapsed after turning the power of the camera on. (When the [Easy IP Setup accommodate period] setting is [20min] → page 126)
• The Easy IP Setup Software cannot be used from a different subnet via a router.
• Use Easy IP Setup Software ver. 4.25R00 or newer.

1. Start the Easy IP Setup Software.

2. Click the [Search] button.

3. Click the MAC address/IPv4 address of the camera to be set, and click the [Network Settings] button.

<NOTE>
• When a DHCP server is being used, the IP address allocated to the unit can be checked by clicking the [Search] button of the Easy IP Setup Software.
• If the same IP address is used for any additional cameras, the numbers of the additional cameras will be displayed in the [IPv4 overlap] column of the cameras concerned.
• When the [Access Camera] button is clicked, the Live screen of the selected camera is displayed.
• This unit supports an IPv4/IPv6 switching function.

4. Input the network items, and click the [Save] button.

<NOTE>
• When a DHCP server is being used, [DNS] of the Easy IP Setup Software can be set to [Auto].
• After the [Save] button is clicked, it takes about 1 minute for the settings in the unit to be completed. If the external DC power supply or LAN cable is disconnected before the settings are completed, the settings will be canceled. In this case, repeat the steps to establish the settings.
• When a firewall (including software) has been introduced, enable access to all the UDP ports.
## Setting the initial account

### 1. Set the initial account.

In the initial state, the initial account setting screen is displayed when
the web screen is displayed.
Set a user name and password. (→ page 81)

<NOTE>

- Do not set character strings that can be easily guessed by third
  parties.
- Change the password at regular intervals.
- The password must use at least 3 of the following 4 character types
  and be 8 characters or longer.
  - Alphabet upper cases
  - Alphabet lower cases
  - Numerals
  - Symbols ( ! # $ % ‘ ( ) * + , - . / ? @ [ ] ^ _ ` ~ )
- When a password is set that does not adhere to the above policy,
  take responsibility for use of the device with due consideration for
  the security risks in the installation environment, etc.
- A warning is displayed if the set password goes against the
  recommended setting policy. When changing the password, click
  the [Back] button and set the password again.
- If you forget the account information that was set, use the switches
  for initialization of service switches to reset the user information
  used for connecting to the network. (→ page 16)

### 2. Completing registration of the initial account

After completing registration of the initial account, the following
registration completed screen is displayed.
The live screen [Live] is automatically displayed after about
10 seconds elapse after the completed screen is displayed.
If the live screen [Live] is not displayed after 10 seconds elapse,
manually move to the live screen [Live] by clicking the "please click
here" link.

This completes the process of registering the initial account.

<NOTE>

- Network connection with AW-RP150 requires setup of an initial
  account.
  When an initial account is not set up, AW-RP150 can detect but
  cannot control this unit.

## Installing the plug-in viewer software

To view IP images from the unit on Windows Internet Explorer 11, the
"Network Camera View 4S" plug-in viewer software (ActiveX®) must be
installed.
The plug-in viewer software can be installed directly from the unit.

<NOTE>

- [Automatic installation of viewer software] is set to [On] at the time of
  purchase, allowing you to install directly from the unit. If a message
  appears in the web browser's information bar, see page 156.
- When you display the Live screen [Live] on the personal computer for
  the first time, the installation screen for the plug-in viewer software
  (ActiveX) appears. Follow the instructions on the screen to perform
  installation. (only when using Windows Internet Explorer 11)
- If the plug-in viewer software (ActiveX) installation screen continues
to appear when switching screens, even after it is installed, restart the
personal computer.
- A license is required for the plug-in viewer software for each personal
  computer on which it is installed. You can view the number of times
  the plug-in viewer software was automatically installed in the [Product
  info.] of the Maintenance screen [Maintenance] (→ page 138). For
details on licenses, consult your local dealer.
- To uninstall the plug-in viewer software, select [Control Panel] -
  [Programs] - [Uninstall a program] in Windows, and remove "Network
  Camera View 4S".
Basic shooting operations

1. Set the subject brightness to the appropriate level.

2. Turn on the power of all the units and devices in the system.

3. Select the unit to be operated.
   Even when using only one unit, it must still be selected from the wireless remote control or controller.

4. Select the shooting mode.
   One of four shooting modes (Scene1, Scene2, Scene3 or Scene4) — whichever one will best suit the shooting conditions — can be selected.
   The shooting modes are set by the user.
   For details of the factory settings, refer to pages 74 to 80.
   Select the mode that satisfies the shooting conditions and suits your preferences.
   When continuing to shoot in the same circumstances, there is no need to select another mode.

5. Start shooting.
   (After shooting, turn off the power of all the units and devices in the system.)

<NOTE>
• Some of the initial settings are auto settings and cannot be operated manually. To operate them manually, switch from the auto settings to the manual settings as required.

If the settings have already been changed and the original settings are to be restored, refer to the “What to do when encountering problems in the basic shooting operations” (→ page 32) and “Camera screen” (→ page 43) in “Camera menu items”.

### How to turn the power on and off

#### Turning the power on

**When performing operations from a wireless remote control**

1. Set all the power switches of the units and devices connected in the system to **ON**.
   - This unit does not have a power switch.
     When power is supplied to it, the status display lamp will light orange, and the unit is set to the Standby mode.
   <NOTE>
   - Under factory default conditions, the unit will be in Standby mode when power is supplied for the first time. (Status display lamp: Lit orange)
   - When the power supply is cut off while the unit is in Standby mode, the unit will be in Standby mode the next time power is supplied. (Status display lamp: Lit orange)
   - When the power supply is cut off while the unit is in Power ON mode, the unit will be in Power ON mode the next time power is supplied. (Status display lamp: Lit green)

2. Press one of the <CAM1> to <CAM4> buttons on the wireless remote control to select the unit.

3. Press the <ON/STANDBY> button on the wireless remote control for about 2 seconds.
   The Power ON mode is established, images are output, and control can be exercised.
   - The unit's status display lamp now lights up green.
   <NOTE>
   - It takes maximum 30 seconds per unit for the initial settings operation to be completed. During this period, the unit cannot be operated. (Status display lamp: Lit orange)

4. If a multiple number of units are going to be used, repeat steps 2 and 3 as required.
   The unit’s status display lamp blinks green when a signal matched by the remote control ID has been received, and it blinks orange when a signal that is not matched by the remote control ID has been received.
   <NOTE>
   - When operation is transferred to the Standby mode:
     The current zoom, focus and iris positions are stored in the memory (Power ON preset).
   - When operation is transferred to the Power ON mode:
     The zoom, focus and iris are adjusted to the positions which were stored in the memory (Power ON preset) when operation was transferred to the Standby mode.

**When performing operations from a controller**

When using an AW-RP150
For details, refer to the operating instructions for the controller.

When using a commercially available controller
For details, refer to the operating instructions for the controller.

#### Turning the power off

**When performing operations from a wireless remote control**

1. Press one of the <CAM1> to <CAM4> buttons on the wireless remote control to select the unit.

2. Press the <ON/STANDBY> button on the wireless remote control for about 2 seconds.
   The unit enters Standby mode.
   - The unit’s status display lamp now lights up orange.

3. If a multiple number of units are going to be used, repeat steps 1 and 2 as required.

4. Set all the power switches of the units and devices connected in the system to **OFF**.
   - This unit does not have a power switch.
   <NOTE>
   - When operation is transferred to the Standby mode:
     The current zoom, focus and iris positions are stored in the memory (Power ON preset).
   - When operation is transferred to the Power ON mode:
     The zoom, focus and iris are adjusted to the positions which were stored in the memory (Power ON preset) when operation was transferred to the Standby mode.

**When performing operations from a controller**

When using an AW-RP150
For details, refer to the operating instructions for the controller.

When using a commercially available controller
For details, refer to the operating instructions for the controller.
Select the unit (or units) to be operated from the wireless remote control or controller.
Even when using only one unit, it must still be selected.

When performing operations from a wireless remote control

Up to four units can be operated using one wireless remote control.
To select the unit using the wireless remote control, the IR ID switches on the unit’s back panel must be set.
For details of the IR ID switch settings, refer to page 17 and page 24.

1. Press the <CAM1>, <CAM2>, <CAM3>, or <CAM4> button.
The unit’s status display lamp blinks green when a signal matched by the remote control ID has been received, and it blinks orange when a signal that is not matched by the remote control ID has been received.

When performing operations from a controller

A maximum of five units can be operated by one controller when using serial control.

When using an AW-RP150
For details, refer to the operating instructions for the controller.
- Network connection with AW-RP150 requires setup of an initial account. (→ page 26)
  When an initial account is not set up, AW-RP150 can detect but cannot control this unit.
- When operating the camera on a network with a controller, such as the AW-RP150, and [Serial] or [IP] of [Tracking Data Output] is set to [On], the tracking data output may be delayed or the value may not be updated. (→ page 58)
Types of shooting modes

One of four shooting modes (Scene1, Scene2, Scene3 or Scene4) — whichever one will best suit the shooting conditions — can be selected. The shooting modes are set by the user. For details of the factory settings, refer to pages 74 to 80. Select the mode that satisfies the shooting conditions and suits your preferences. The settings can be changed by menu operations.

- The results of the white balance and other adjustments are stored in the memory separately by shooting mode. Be absolutely sure to select the shooting mode before making any adjustments.

<NOTE>
- Some of the initial settings are auto settings and cannot be operated manually. To operate them manually, switch from the auto settings to the manual settings as required.

How to select the shooting mode

When performing operations from a wireless remote control

1. Press the <CAM1>, <CAM2>, <CAM3> or <CAM4> button to select the unit.

2. Press and hold the <MENU> button for about 2 seconds. The Top Menu is displayed.

3. Press the <▲> or <▼> button to bring the cursor to [Camera].

4. Press the <→> button. The [Camera] menu is displayed on the monitor.

5. Press the <▲> or <▼> button to bring the cursor to [Scene].

6. Press the <→> button. The shooting mode blinks.

7. Press the <▲> or <▼> button to select the shooting mode (Scene1, Scene2, Scene3 or Scene4) to be used, and press the <→> button to enter the selection.

8. Press and hold the <MENU> button for about 2 seconds. The camera menu display is exited.

When performing operations from a controller

When using an AW-RP150
For details, refer to the operating instructions for the controller.
When performing operations from a wireless remote control

- **Changing the camera’s direction**
  - Moving the camera toward the left or right (panning):
    Press the < or > button.
  - Moving the camera up or down (tilting):
    Press the ↑ or ↓ button.
  - Moving the camera diagonally:
    Press the < or > button and < or > button at the same time.
  - Returning the camera to the reference position:
    Press the <HOME> button for about 2 seconds.

- **Using the zoom function**
  - Zooming in (the subject becomes magnified in size):
    Press the T button of <ZOOM>.
  - Zooming out (the subject becomes reduced in size):
    Press the W button of <ZOOM>.

- **Switching the panning/tilting and lens operation speed**
  - Changing the direction or zoom at high speed:
    Press the <FAST> button.
    When this button is held down, the speed can be set to an even higher speed.
    When it is tapped, the normal speed (high speed) is restored.
  - Changing the direction or zoom at low speed:
    Press the <SLOW> button.
    When this button is held down, the speed can be set to an even lower speed.
    When it is tapped, the normal speed (low speed) is restored.

The speeds at which the pan, tilt, zoom, focus and iris are controlled are now switched.

When performing operations from a controller

- **Changing the camera’s direction**
  - Moving the camera toward the left or right (panning):
    Tilt the <PAN/TILT> lever toward L or R.
  - Moving the camera up or down (tilting):
    Tilt the <PAN/TILT> lever toward UP or DOWN.
  - Moving the camera diagonally:
    Tilt the <PAN/TILT> lever diagonally.

- **Using the zoom function**
  - Zooming in (the subject becomes magnified in size):
    Tilt the <ZOOM> lever toward the TELE direction.
  - Zooming out (the subject becomes reduced in size):
    Tilt the <ZOOM> lever toward the WIDE direction.

- **Switching the panning/tilting and lens operation speed**
  - When using an AW-RP150
    For details, refer to the operating instructions for the controller.
If the trouble is not resolved by taking the action suggested below, refer to “Troubleshooting” (→ page 148).

When performing operations from a wireless remote control

The unit does not move.
• Press the <CAM1>, <CAM2>, <CAM3> or <CAM4> button to select the unit which is to be operated.
  If only one unit is being used, it is normally selected using the <CAM1> button.
• Check that the IR ID switches have been set correctly. (→ page 17, page 24)
• If the unit’s status display lamp is off or lights up orange, it means that the unit’s power is not on.
  Refer to “Turning the power on” (→ page 28), and turn on the power.
• If the unit’s status display lamp does not blink even when the wireless remote control is operated near the unit’s wireless remote control signal light-sensing area, it means that the wireless remote control’s batteries have run down.
  Replace the batteries.

Multiple color bands (color bars) are displayed.
Switch to the camera image by pressing the <MODE> button.

The menu screen is displayed.
Press the <MENU> button for 2 seconds to exit the camera menu.

The lens focus is not adjusted automatically.
Press the <A/FOCUS> button to switch to auto focusing.

The camera picture is too light or too dark.
• Press the <A/IRIS> button to switch the lens iris adjustment to auto.
• Press the <AUTO> button of <GAIN> to switch the gain adjustment to auto.

Something is wrong with the coloring of the camera pictures.
Refer to “Auto tracking white adjustment (ATW)” (→ page 37), and switch to [ATW].

The camera menus are not displayed.
Restart the camera and open any of the camera menus within about a minute, the menus will be displayed in all the outputs.
Check [OSD Mix] (→ page 64) on the camera menu [Output 6/8] screen.

When performing operations from a controller

The unit does not move.
• Select the unit to be operated by following the procedure below.

When using an AW-RP150
For details, refer to the operating instructions for the controller.

• If the unit’s status display lamp is off or lights up orange, it means that the unit’s power is not on.
  Refer to “Turning the power on” (→ page 28), and turn on the power.
• Check that the account settings for this unit have been set correctly. (→ page 82)
• Network connection with AW-RP150 requires setup of an initial account. (→ page 26)
  When an initial account is not set up, AW-RP150 can detect but cannot control this unit.

Multiple color bands (color bars) are displayed.
Switch to the camera image by pressing the <BARS> button.

The lens focus is not adjusted automatically.
Press the <AUTO> button of <FOCUS> to switch to auto focusing.

The camera picture is too light or too dark.
• Press the <AUTO> button of <IRIS> to switch the lens iris adjustment to auto.
• Press the <AUTO> button of <GAIN> to switch the gain adjustment to auto.

Something is wrong with the coloring of the camera pictures.
Refer to “Auto tracking white adjustment (ATW)” (→ page 37), and switch to [ATW].

The camera menus are not displayed.
Restart the camera and open any of the camera menus within about a minute, the menus will be displayed in all the outputs.
Check [OSD Mix] (→ page 64) on the camera menu [Output 6/8] screen.
More advanced operations

Manual shooting (→ page 34)
• Manually adjusting the focus
• Manually adjusting the iris
• Manually adjusting the shutter speed
• Manually adjusting the gain

Preset memories (→ page 35)
• Up to 100 settings for the camera direction (panning and tilting), zoom, focus, iris, gain up and white balance can be registered in the preset memories, and called.
• The number of settings that can be registered and called depends on the type of wireless remote control (12 settings) or controller that is used for operation.

White balance adjustment (→ pages 36 to 37)
• This adjustment is performed to express the white accurately. Its setting also has an effect on the color tones of the entire screen.
• It must be performed when using the unit for the first time or when the unit has not been used for a prolonged period.
• Perform adjustment when the lighting conditions or brightness changes.
• Once the white balance has been attained, no further adjustment is required provided that the unit is going to be used under the same conditions.
• White balance adjustment is not possible in night mode.

Black balance adjustment (→ page 38)
• This adjustment is performed to express the black accurately. Its setting also has an effect on the color tones of the entire screen.
• It must be performed when using the unit for the first time or when the unit has not been used for a prolonged period.
• It must be performed when the ambient temperature has changed significantly and at the change of the seasons.
• Once the black balance has been attained, no further adjustment is required provided that the unit is going to be used under the same conditions.

Black level (master pedestal) adjustment (→ page 39)
• This adjustment is performed to align the black level (pedestal level) of a multiple number of cameras.
• Ask your dealer to perform this adjustment.

Genlock adjustment (→ page 40)
• This adjustment is performed to achieve phase alignment by applying external synchronization (genlock) when a multiple number of cameras will be used or when the unit will be used in combination with other devices.
• Ask your dealer to perform this adjustment.
Manually adjusting the focus

The lens focus can be adjusted manually.

When performing operations from a wireless remote control

1. Press the <M/FOCUS> button to switch the focus to manual adjustment.

2. Press the <F> or <N> button of <FOCUS> to adjust the focus.
   When the <F> button is pressed, the focus moves further away (far); conversely, when the <N> button is pressed, it moves nearer (near). The speed of focusing and other adjustments can be switched to fast or slow by pressing the <FAST> or <SLOW> button, respectively.

3. If necessary, press the <A/FOCUS> button to return the focus to the automatic adjustment.

When performing operations from a controller

When using an AW-RP150
For details, refer to the operating instructions for the controller.

<NOTE>
• When the focus is set to manual, the subject may go out of focus during panning, tilting and zooming. Therefore, the unit comes with a function which compensates for this. (Focus Adjust With PTZ.) If the function has been set to [Off], either adjust the focus, as required, after zooming or set the focus to auto. (→ page 67, page 91, page 118)
• When switching between focus modes (Manual/Auto), and [Serial] or [IP] of [Tracking Data Output] is set to [On], the tracking data output may be delayed or the value may not be updated. (→ page 58)

Manually adjusting the iris

The lens iris can be adjusted manually.

When performing operations from a wireless remote control

1. Press the <M/IRIS> button to switch the iris to manual adjustment.

2. Press the <IRIS +> or <IRIS –> button to adjust the iris.
   Press the <IRIS +> button to adjust the lens iris in the opening direction; conversely, press the <IRIS –> button to adjust the lens iris in the closing direction.
   The speed of the iris and other adjustments can be switched to fast or slow by pressing the <FAST> or <SLOW> button, respectively.

3. If necessary, press the <A/IRIS> button to return the iris to the automatic adjustment.

When performing operations from a controller

When using an AW-RP150
For details, refer to the operating instructions for the controller.

<NOTE>
• In the night mode, the iris is set to open as a measure to prevent video spying. Adjust the brightness at the light source.
• When switching between iris modes (Manual/Auto), and [Serial] or [IP] of [Tracking Data Output] is set to [On], the tracking data output may be delayed or the value may not be updated. (→ page 58)

Manually adjusting the shutter speed

The shutter speed can be set using two methods. One is a method that specifies the time (where a time such as 1/250 sec. is designated), and the other is a method that specifies the frequency (where synchro scan, 60.15 Hz, etc. is designated).

When shooting a TV screen or personal computer’s monitor screen, the horizontal noise generated when the screen is shot can be minimized by adjusting the frequency to the screen frequency using synchro scan.

When performing operations from a wireless remote control

Perform the adjustments on the Camera menu. For details, refer to the [Shutter Mode] (→ page 44) and [Step/Synchro] (→ page 44).

When performing operations from a controller

When using an AW-RP150
For details, refer to the operating instructions for the controller.

Manually adjusting the gain

There are two ways to adjust the gain. One way involves using the buttons on the wireless remote control or controller; the other way involves using the Camera menu or Web setup screen [Setup]. The gain can be adjusted more precisely using the Camera menu or Web setup screen [Setup).
For details, refer to the [Gain] (→ page 44, page 109).

<NOTE>
• When adjusting the gain, the light quantity may change suddenly (causing the image output to be subjected to a shock).

When performing operations from a wireless remote control

1. Press one of the <GAIN> buttons (<OFF>, <LOW> or <HI>). These buttons enable the gain increase to be selected in three steps. The <LOW> button is used to select 9 dB; the <HI> button is used to select 18 dB.

2. If necessary, press the <AUTO> button of <GAIN> in order to return the gain to the automatic adjustment (AGC).

When performing operations from a controller

When using an AW-RP150
For details, refer to the operating instructions for the controller.

In any case, the maximum gain of the automatic adjustment (AGC) can be set by the camera menu or Web setup screen [Setup]. For details, refer to the [AGC Max Gain] (→ page 44, page 109).
This unit enables up to 100 settings for the camera direction (panning and tilting), zoom, focus, iris, gain and white balance to be registered in its preset memories, and called. However, the number of settings that can be registered and called depends on the type of wireless remote control or controller that is used for operation.

- The focus and iris operating modes (manual and auto settings) are neither registered nor recalled. The current focus and iris values are registered.
- The focus and iris values can be recalled only when the manual settings are applicable.
- For the white balance, the current White Balance Mode adjustment values are registered. If a preset value is recalled when AWB A or AWB B is selected, the adjustment value selected when it was registered as a preset will be recalled. The R Gain and B Gain values return to 0 in such cases.

<NOTE>
- When there is a large difference in the environmental temperature between the time of registration and the time the setting is called, displacement of the preset position may occur.
- If displacement occurs, perform registration again.
- When a manual operation is performed for pan, tilt, zoom, focus or iris during preset recall, the preset operation for the pan, tilt, zoom, focus or iris operation concerned will be aborted.
- If another preset has been recalled during an ongoing preset recall, the preset being recalled is aborted, and operation for the preset called last is performed instead.
- When recalling the preset memory during an ongoing preset memory recall (the first preset memory recall is aborted and performing the subsequent preset memory recall), and [Serial] or [IP] of [Tracking Data Output] is set to [On], the tracking data output may be delayed or the value may not be updated. (→ page 58)

### When performing operations from a wireless remote control

Twelve settings (preset No.1 to No.12) can be registered and called using the wireless remote control. The <1> to <12> buttons correspond to the unit’s preset memories No.1 to No.12.

#### Registering the settings in the preset memories

1. Display the picture to be shot on the monitor.
   Operate the pan, tilt or zoom buttons to determine the camera angle. Adjust the focus, iris, gain and white balance if they need to be adjusted.

2. While holding down the <PRESET> button, press the button corresponding to the preset memory number.
   - If a preset memory number with an already registered setting has been selected, the existing setting will be erased and replaced with the new one.

### Calling the settings of the preset memories

1. Press the button in which the preset memory setting has been registered.

### When performing operations from a controller

**When using an AW-RP150**

Up to 100 entries can be registered/recalled.

For details, refer to the operating instructions for the controller.
White balance adjustment

Adjust the ratio between the three primary colors (RGB) to reproduce white accurately. If the white balance is out of adjustment, not only will white be reproduced poorly, but the color tones of the screen as a whole will also be degraded.

- Perform adjustment when using the unit for the first time or when the unit has not been used for a prolonged period.
- Perform adjustment when the lighting conditions or brightness changes.

Either “AWB” (automatic white balance adjustment) which initiates automatic adjustment when the <AWB> button on the controller has been pressed or “ATW” (automatic tracking white balance adjustment) which constantly adjusts the white balance can be selected for adjustment purposes.

The results of the AWB adjustment can be stored in two memories, A and B, when [AWB A] or [AWB B] has been selected for the white balance.

- Once the white balance values have been adjusted, their setup procedure will be completed simply by selecting them using the camera menus or Web setup screen [Setup], or by pressing the buttons on the controller, provided that they are going to be used under the same conditions as the ones established when the values were set. There is no need to set it again.
- Once a new setting is entered, the previous setting will be erased.
- White balance adjustment is not possible in night mode.
- The white balance cannot be adjusted during preset playback.

Use the two memories to store settings corresponding to different shooting conditions.

<NOTE>
- After adjusting the white balance, and [Serial] or [IP] of [Tracking Data Output] is set to [On], the tracking data output may be delayed or the value may not be updated. (→ page 58)

Automatic adjustment (AWB: AWB A or AWB B)

When performing operations from a wireless remote control

1. Shoot a white subject (such as a white wall or handkerchief) so that it fills the screen.
   - Do not shoot shiny or very bright objects.

- Steps 2 through 8 represent the procedure for selecting the [AWB A] or [AWB B] memory. They need not be taken if a selection has already been made.

2. Select [Scene1], [Scene2], [Scene3] or [Scene4] as the shooting mode by following the procedure in “Selecting the shooting modes (scene files)” (→ page 30).

3. Press the <▲> or <▼> button to bring the cursor to [Picture].

4. Press the <◄> button.
   The [Picture 1/8] screen is displayed.

5. Press the <▲> or <▼> button to bring the cursor to [White Balance Mode].

6. Press the <◄> button.

7. Press the <▲> or <▼> button to change the White Balance Mode to be used to [AWB A] or [AWB B], and press the <◄> button to enter the selection.

8. Press and hold the <MENU> button for about 2 seconds.
   The camera menu display is exited.
9. Press the <SET> button for about 2 seconds.
   The auto white balance adjustment (AWB) and auto black balance
   adjustment (ABB) are performed, and the white balance setting is
   entered.
   • When [On] has been selected as the [OSD Status] (→ page 65)
     setting, the “AWB OK” message will appear at the center of
     the screen when the white balance adjustment is completed
     successfully.
   When the black balance adjustment is completed successfully, the
   “ABB OK” message appears at the center of the screen.

   • Adjustment cannot be performed while the color bar is displayed.
   Switch to the camera image by pressing the <MODE> button.
   • The white balance cannot be adjusted during preset playback.

   <NOTE>
   • White balance may not be correctly set if the lighting of the object is
     too weak.
   • Since the unit has a built-in memory, the set white balance will
     remain in the memory even if power is turned off. Therefore, it is
     not necessary to reset the white balance if the color temperature of
     those objects remains unchanged. However, it must be reset if the
     color temperature changes, such as when you move from indoors to
     outside, or vice versa.

   Auto tracking white adjustment (ATW)
   When the white balance adjustment is set to [ATW], the white
   balance continues to be adjusted automatically all the time, and it is
   automatically corrected even when the light source or color temperature
   has changed to produce completely natural pictures.

   This function works when [ATW] is selected instead of [AWB A] or [AWB
   B] by following the steps for “Automatic adjustment” in “White balance
   adjustment” (→ page 36).

   <NOTE>
   • ATW might not function properly when high brightness light (ex.
     fluorescent lamp) beams into a screen.
   • White balance may not be accurately set if there is no white object in
     the scene being shot.
   • The white balance may shift out of adjustment when different kinds of
     light sources such as sunlight and fluorescent lighting are applied.

3200K and 5600K presets

When [3200K] or [5600K] is selected for the white balance, the white
balance is set using a color temperature of 3200 K (equivalent to
halogen light) or 5600 K (equivalent to daylight), respectively.
This function works when [3200K] or [5600K] is selected instead of
[AWB A] or [AWB B] by following the steps for “Automatic adjustment” in
“White balance adjustment” (→ page 36).

VAR

When [VAR] is selected for the white balance, you can select a color
temperature between 2000K and 15000K.

   <NOTE>
   • The displayed [VAR] value does not guarantee an absolute value. Use
     the value as a reference.
Adjust the zero levels of the three primary colors (RGB) to reproduce black accurately. If the black balance is out of adjustment, not only will black be reproduced poorly, but the color tones of the screen as a whole will also be degraded. Readjustment of the black balance is not required under normal circumstances but is necessary in the following situations.

- Perform adjustment when using the unit for the first time or when the unit has not been used for a prolonged period.
- Perform adjustment when the ambient temperature changes significantly, such as during changes of the season.

<NOTE>
- After adjusting the black balance, and [Serial] or [IP] of [Tracking Data Output] is set to [On], the tracking data output may be delayed or the value may not be updated. (→ page 58)

Automatic adjustment

When performing operations from a wireless remote control

The procedure is identical to that of “Automatic adjustment” (→ page 36) in “White balance adjustment”. The black balance can be configured by performing automatic white balance adjustment (AWB) and automatic black balance adjustment (ABB).

- The white balance will also be configured, so be sure to prepare the conditions for white balance adjustment before performing the procedure.
- Adjustment cannot be performed while the color bar is displayed. Switch to the camera image by pressing the <MODE> button.
- The black balance cannot be adjusted during preset playback.

When performing operations from a controller

When using an AW-RP150

For details, refer to the operating instructions for the controller.
Black level (master pedestal) adjustment

The black level can be adjusted when using a multiple number of cameras including the unit. Ask your dealer to perform this adjustment. (Use an oscilloscope or waveform monitor for the adjustment.) Adjust the black level in accordance with the units and devices used.

When performing operations from a wireless remote control

1. Press the <M/IRIS> button.
   Set the iris to the manual mode.

2. Press the <IRIS –> button.
   The lens iris is stopped down.

3. Press the <▲> or <▼> button to bring the cursor to [Picture].

4. Press the <●> button.
   The [Picture 2/8] screen is displayed.

<table>
<thead>
<tr>
<th>*** Picture 2/8 ***</th>
</tr>
</thead>
<tbody>
<tr>
<td>Chroma Level   0%</td>
</tr>
<tr>
<td>Chroma Phase    0</td>
</tr>
<tr>
<td>Master Pedestal 0</td>
</tr>
<tr>
<td>R Pedestal     0</td>
</tr>
<tr>
<td>G Pedestal     0</td>
</tr>
<tr>
<td>B Pedestal     0</td>
</tr>
<tr>
<td>Pedestal Offset Off</td>
</tr>
</tbody>
</table>

5. Press the <▲> or <▼> button to bring the cursor to [Master Pedestal].

<table>
<thead>
<tr>
<th>*** Picture 2/8 ***</th>
</tr>
</thead>
<tbody>
<tr>
<td>Chroma Level   0%</td>
</tr>
<tr>
<td>Chroma Phase    0</td>
</tr>
<tr>

</tr>
<tr>
<td>R Pedestal     0</td>
</tr>
<tr>
<td>G Pedestal     0</td>
</tr>
<tr>
<td>B Pedestal     0</td>
</tr>
<tr>
<td>Pedestal Offset Off</td>
</tr>
</tbody>
</table>

6. Press the <●> button to start the [Master Pedestal] value blinking.

7. Press the <▲> or <▼> button, change the [Master Pedestal] value, and press the <●> button to enter the selection.
   Adjust the value so that it matches the black level.
   The pedestal values can be adjusted finely using the [R Pedestal], [G Pedestal] and [B Pedestal] settings. (→ page 47, page 111)

8. Press and hold the <MENU> button for about 2 seconds.
   The camera menu display is exited.

9. If necessary, press the <A/IRIS> button to adjust the iris automatically.

When performing operations from a controller

When using an AW-RP150
For details, refer to the operating instructions for the controller.
Genlock adjustment

The genlock adjustment is performed to achieve phase alignment by applying external synchronization (genlock) when a multiple number of cameras will be used or when the unit will be used in combination with other devices. This unit supports BBS (Black Burst Sync) and tri-level sync external synchronization signals. Ask your dealer to perform this adjustment. (Use a dual-trace oscilloscope for the adjustment.)

Horizontal phase adjustment

Observe the waveforms of the external sync signal input (tri-level sync signal) and video signal output on the dual-trace oscilloscope, and use the wireless remote control or controller to bring the horizontal phase into alignment.

When performing operations from a wireless remote control

1. Follow the operation steps in “Basic setup operations” (→ page 41) to display the Top Menu.

2. Press the <▲> or <▼> button to bring the cursor to [System].

3. Press the ◄ button.
   The [System 1/2] screen appears.

4. Press the ◄ button to bring the cursor to [Genlock], and press the ◄ button.

   --- System 1/2 ---
   Frequency 59.94Hz
   Format 2160/59.94p
   Genlock
   Horizontal Phase 0
   Horizontal Phase Step 1

5. Press the ◄ button to bring the cursor to [Horizontal Phase], and press the ◄ button.
   The [Horizontal Phase] value starts blinking.

6. Press the ◄ button to change the [Horizontal Phase] value, adjust the value so that the horizontal phase is brought into alignment, and press the ◄ button.
   The extent of the phase adjustment can be selected using [Horizontal Phase Step].

7. Press and hold the <MENU> button for about 2 seconds.
   The camera menu display is exited.
Basic setup operations

Camera menus are displayed on the monitor when the unit's settings are to be selected. The monitor is connected to the video signal output connector. The basic camera menu operations involve displaying sub-menus from the Top Menu items, and selecting settings on the sub-menus. Some sub-menus have menu items for performing more detailed settings.

The camera menu operations are conducted using the wireless remote control.

Described below are the Basic setup operations for changing the camera menu item settings using the wireless remote control.

### Wireless remote control operations

<table>
<thead>
<tr>
<th>Camera menu operation</th>
<th>Wireless remote control</th>
</tr>
</thead>
<tbody>
<tr>
<td>Selecting a camera to operate</td>
<td>Press the &lt;CAM1&gt;, &lt;CAM2&gt;, &lt;CAM3&gt;, or &lt;CAM4&gt; button.</td>
</tr>
<tr>
<td>Displaying the Top Menu</td>

<td>Press the &lt;M&gt; button.</td>
</tr>
<tr>
<td>Returning to the previous menu</td>
<td>Place the cursor on [Return], and press the &lt;M&gt; button.</td>
</tr>
<tr>
<td>Changing settings</td>
<td>Place the cursor on the item you want to change, and press the &lt;M&gt; button to make the setting value blink. Change the value using the &lt;4&gt;, &lt;5&gt;, &lt;b&gt;, or &lt;a&gt; button, and press the &lt;M&gt; button to confirm.</td>
</tr>
<tr>
<td>Canceling setting changes</td>
<td>Press the &lt;MENU&gt; button (hold for less than 2 seconds) while the setting value is blinking.</td>
</tr>
<tr>
<td>Exiting camera menu operations</td>
<td>Press and hold the &lt;MENU&gt; button for about 2 seconds.</td>
</tr>
</tbody>
</table>

<NOTE>
- When AW-RP150 is connected, refer to the operating instructions for the controller.

---

When performing the operations using the wireless remote control

1. Press the <CAM1>, <CAM2>, <CAM3> or <CAM4> button to select the unit which is to be operated.
2. Press and hold the <MENU> button for about 2 seconds.
   The Top Menu is displayed.
3. Press the <a> or <v> button to bring the cursor to the item to be selected.
   Each time the <a> or <v> button is pressed, the cursor moves. The cursor can be moved in the same way using the <4> or <5> buttons.
4. Press the <s> button.
   The sub-menu of the selected item is displayed.
   (Some sub-menu items have a sub-menu of their own.)
5. Press the <a> or <v> button to bring the cursor to the item to be set.
   Each time the <a> or <v> button is pressed, the cursor moves. The cursor can be moved in the same way using the <4> or <5> button. With the cursor at the [Return] position, press the <s> button to return to the previous menu.
6. Press the <s> button.
   The value of the item to be set starts blinking.
7. Press the <a> or <v> button to change the setting.
   The setting can be changed in the same way using the <4> or <5> button.
8. Press the <s> button.
   The value of the item to be set is entered, and it stops blinking.
9. After the setting has been completed, press the <MENU> button for about 2 seconds.
   The camera menu display is exited.
Setting the camera menu items

Camera menus are displayed on the monitor when the unit’s settings are to be selected.
The monitor is connected to the MONITOR OUT connector <MONITOR OUT>.
The camera menu is only displayed from <MONITOR OUT> in the factory default settings, so the OSD menus are not displayed in <12G SDI>, <3G SDI>, <OPTICAL>, and <HDMI> outputs.
To output the OSD menus via these output connectors, change the settings for [OSD Mix] in [Output].
The basic camera menu operations involve displaying sub-menus from the Top Menu items, and selecting settings on the sub-menus.
Some sub-menus have menu items for performing more detailed settings.

The "*" and "##" marks in the menu titles indicate the hierarchical level of the menu currently displayed.
For instance, "* Top Menu *" indicates the first hierarchical level whereas "## Camera ##" and "## System ##" indicate that the second hierarchical level is now displayed.
Menu items accompanied by a "*" mark indicate data which is stored on a scene by scene basis; menu items accompanied by a "##" mark indicate data which is stored together for one camera regardless of the scenes.

For details on factory default settings, see “Camera menu item table” (→ page 74).

<NOTE>
• While the camera menu is displayed, and [Serial] or [IP] of [Tracking Data Output] is set to [On], the tracking data output may be delayed or the value may not be updated. (→ page 58)

Top Menu screen

Camera
Select this to open the camera menu relating to the camera images.

System
Select this to display the System menu used to set up system format of the camera or adjust the genlock (external synchronization) phase or establish the camera output image settings.

Output
Select this to display the Output menu used for setting video/audio output for the camera, OSD output, etc.

Pan/Tilt
Select this to display the Pan/Tilt menu used for various pan/tilt operations.

Preset
Select this to display the Preset menu used for various preset playback operations.

Maintenance
Select this to display the Maintenance menu used to check the camera’s firmware version or initialize its settings.

<NOTE>
• The Top Menu does not have a [Return].
## Camera menu items (continued)

**Camera screen**  
This menu is used for the camera image settings.

<table>
<thead>
<tr>
<th>**** Camera **</th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td>Scene Brightness Picture Matrix Lens</td>
<td></td>
</tr>
<tr>
<td>Return</td>
<td></td>
</tr>
</tbody>
</table>

### Scene [Scene1, Scene2, Scene3, Scene4]
Selected here is the shooting mode that matches the shooting situation. Select the mode which best suits the prevailing shooting conditions and the user’s preferences.

<table>
<thead>
<tr>
<th>Scene1</th>
<th>Scene2</th>
<th>Scene3</th>
<th>Scene4</th>
</tr>
</thead>
<tbody>
<tr>
<td>Modes that allow you to adjust detailed settings manually for various shooting conditions and preferences.</td>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

### Brightness
This menu item displays the Brightness screen on which to set the brightness of the images.

### Picture
This menu item displays the Picture screen on which to adjust the picture quality.

### Matrix
This menu item displays the Matrix screen on which to set the color matrix.

### Lens
This menu item displays the Lens screen for making lens settings.

### Return
Return to the previous menu level.

**Brightness 1/2 screen**  
This menu item is selected to set the brightness of the pictures.

<table>
<thead>
<tr>
<th>*** Brightness 1/2 ***</th>
</tr>
</thead>
<tbody>
<tr>
<td>Scene1 Brightness Picture Level</td>
</tr>
<tr>
<td>Iris Mode</td>
</tr>
<tr>
<td>Auto Iris Speed</td>
</tr>
<tr>
<td>Auto Iris Window</td>
</tr>
<tr>
<td>Shutter Mode</td>
</tr>
<tr>
<td>Step/Synchro</td>
</tr>
<tr>
<td>ELC Limit</td>
</tr>
<tr>
<td>Return</td>
</tr>
</tbody>
</table>

### Picture Level [–50 to +50]
This menu item is selected to set the target picture level for automatic exposure compensation. Its setting takes effect when [Auto] or [ELC] has been selected as the setting for any of the following automatic exposure compensation functions:
- When [Iris Mode] is set to [Auto]
- When [Shutter Mode] is set to [ELC]
- When [Gain] is set to [Auto]

### Iris Mode [Manual, Auto]
This menu item is used to select whether the iris is to be adjusted automatically or manually.

<table>
<thead>
<tr>
<th>Mode</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Manual</td>
<td>The iris is adjusted manually.</td>
</tr>
<tr>
<td>Auto</td>
<td>Auto exposure compensation is performed so that the target level which was set using [Picture Level] is reached.</td>
</tr>
</tbody>
</table>

### Auto Iris Speed [Slow, Normal, Fast]
Set the control speed of the auto iris function.

<table>
<thead>
<tr>
<th>Mode</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Slow</td>
<td>Control the iris at a slow speed.</td>
</tr>
<tr>
<td>Normal</td>
<td>Control the iris at a normal speed.</td>
</tr>
<tr>
<td>Fast</td>
<td>Control the iris at a fast speed.</td>
</tr>
</tbody>
</table>

### Auto Iris Window [Normal1, Normal2, Center]
Select the detection window for the auto iris.

<table>
<thead>
<tr>
<th>Mode</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Normal1</td>
<td>Window towards the center of the screen.</td>
</tr>
<tr>
<td>Normal2</td>
<td>Window towards the bottom of the screen.</td>
</tr>
<tr>
<td>Center</td>
<td>Spotted window in the center of the screen.</td>
</tr>
</tbody>
</table>
Camera menu items (continued)

Shutter Mode [Off, Step, Synchro, ELC]
Select for camera shutter mode.

<table>
<thead>
<tr>
<th>Mode</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Off</td>
<td>The shutter is set to OFF.</td>
</tr>
<tr>
<td>Step</td>
<td>The step shutter is set (the steps can be changed).</td>
</tr>
<tr>
<td>Synchro</td>
<td>The synchro shutter is set (the setting can be changed continuously).</td>
</tr>
<tr>
<td>ELC</td>
<td>The electronic shutter is controlled and the light quantity is adjusted automatically.</td>
</tr>
</tbody>
</table>

Step/Synchro
This is used to adjust the shutter speed in the mode which was selected as the [Shutter Mode] setting.
When a higher shutter speed is selected, fast-moving subjects do not become blurred easily but the images will be darker.

The shutter speeds that can be set are listed below.

<table>
<thead>
<tr>
<th>Mode</th>
<th>[Step] Settings (When selected)</th>
<th>[Synchro] Settings (When selected)</th>
</tr>
</thead>
<tbody>
<tr>
<td>59.94p/59.94i mode</td>
<td>1/60, 1/100, 1/120, 1/250, 1/500, 1/1000, 1/2000, 1/4000, 1/8000, 1/10000</td>
<td>60.0 Hz to 7200 Hz</td>
</tr>
<tr>
<td>29.97p mode</td>
<td>1/30, 1/60, 1/100, 1/120, 1/250, 1/500, 1/1000, 1/2000, 1/4000, 1/8000, 1/10000</td>
<td>30.0 Hz to 7200 Hz</td>
</tr>
<tr>
<td>23.98p/24p mode</td>
<td>1/24, 1/48, 1/60, 1/100, 1/120, 1/250, 1/500, 1/1000, 1/2000, 1/4000, 1/8000, 1/10000</td>
<td>24.0 Hz to 7200 Hz</td>
</tr>
<tr>
<td>50p/50i mode</td>
<td>1/60, 1/100, 1/120, 1/250, 1/500, 1/1000, 1/2000, 1/4000, 1/8000, 1/10000</td>
<td>50.0 Hz to 7200 Hz</td>
</tr>
<tr>
<td>25p mode</td>
<td>1/25, 1/50, 1/60, 1/100, 1/120, 1/250, 1/500, 1/1000, 1/2000, 1/4000, 1/8000, 1/10000</td>
<td>25.0 Hz to 7200 Hz</td>
</tr>
</tbody>
</table>

<NOTE>
• When [Shutter Mode] is set to [Off] in 29.97p, 23.98p/24p, or 25p mode, the shutter speed is set to [1/50].

ELC Limit [1/100, 1/120, 1/250]
Set the maximum shutter level when ELC is operating.

Return
Return to the previous menu level.

Brightness 2/2 screen

Gain
[When [Super Gain] is [Off]: Auto, 0dB to 36dB,
When [Super Gain] is [On]: Auto, 0dB to 42dB]
The image gain is adjusted here.
In locations which are too dark, adjust the gain upward; conversely, in locations which are too bright, adjust it downward.
When [Auto] is set, the light quantity is adjusted automatically.
The noise increases when the gain is increased.

Super Gain [Off, On]
Set the super gain (increased sensitivity) mode.

AGC Max Gain [6dB, 12dB, 18dB]
When [Auto] is selected as the [Gain] setting, the maximum gain-up amount can be set.

Frame Mix [Off, 6dB, 12dB, 18dB, 24dB]
Select for frame addition (gain-up using sensor storage) amount.
Its setting takes effect when [Off] has been selected as the [Shutter Mode] setting.
When frame addition is performed, it will appear as if the images are missing some frames.
This cannot be configured when the format is 2160/29.97p, 2160/23.98p, 2160/24p, 2160/25p, 1080/29.97p, 1080/23.98p(59.94i), 1080/23.98p, 1080/24p, 1080/29.97PsF, 1080/23.98PsF, 1080/25p or 1080/25PsF.

<NOTE>
• Under discharge tube illumination, such as fluorescent and mercury-vapor lights, the brightness may change synchronously, colors may change, and horizontal stripes may flow up and down the image.
ND Filter [Through, 1/4, 1/16, 1/64]
Set the transmittance of the lens’ built-in ND (neutral density) filter. The filter switches when the setting is fixed.

<table>
<thead>
<tr>
<th>Setting</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Through</td>
<td>Do not set ND filter.</td>
</tr>
<tr>
<td>1/4</td>
<td>Set ND filter transmittance to 1/4.</td>
</tr>
<tr>
<td>1/16</td>
<td>Set ND filter transmittance to 1/16.</td>
</tr>
<tr>
<td>1/64</td>
<td>Set ND filter transmittance to 1/64.</td>
</tr>
</tbody>
</table>

Day/Night
[Day, Night]
Switch between standard shooting and night-vision shooting (shooting with infrared light).

<table>
<thead>
<tr>
<th>Mode</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Day</td>
<td>Standard shooting (day mode)</td>
</tr>
<tr>
<td>Night</td>
<td>Night-vision shooting (night mode)</td>
</tr>
</tbody>
</table>

This cannot be set when the [Color Setting] is [V-Log].

<NOTE>
- In night mode, video output will be in black and white. In addition, the iris will be forcibly opened.
- White balance adjustment is not possible in night mode.
- ND filter switching is not possible in night mode.
- [Pedestal] cannot be performed properly in night mode.

Return
Return to the previous menu level.

White Balance Mode
[ATW, AWB A, AWB B, 3200K, 5600K, VAR]
Set the white balance mode.
Select the mode when the coloring is not natural because of the nature of the light source or other factors.
If the white color serving as the reference can be recognized, subjects can be shot with natural coloring.

ATW
In this mode, the white balance is compensated for automatically, even if changes occur in the light source or color temperature, by a process of continuous and automatic adjustment.

AWB A
When [AWB A] or [AWB B] is selected and the white balance is executed, the adjustment results obtained are stored in the memory selected. When [AWB A] or [AWB B] is then selected, the white balance stored in the selected memory can be recalled.

3200K
This is the white balance mode which is ideal when a 3200K halogen light is used as the light source.

5600K
This is the white balance mode which is ideal when 5600K sunlight or fluorescent lighting is used as the light source.

VAR
You can specify a color temperature between 2000K to 15000K.

Color Temperature [2000K to 15000K]
You can specify a color temperature between 2000K to 15000K. Its setting takes effect when [VAR] has been selected as the [White Balance Mode] setting.

R Gain [–200 to +200]
This enables the R gain to be adjusted. Its setting takes effect when [AWB A], [AWB B] or [VAR] has been selected as the [White Balance Mode] setting.

B Gain [–200 to +200]
This enables the B gain to be adjusted. Its setting takes effect when [AWB A], [AWB B] or [VAR] has been selected as the [White Balance Mode] setting.

Color TEMP. Setting
This opens the advanced setting screen when [White Balance Mode] is [AWB A] or [AWB B]. (→ page 46)

AWB Gain Offset [Off, On]
When auto white balance is performed by setting [White Balance Mode] to [AWB A] or [AWB B], set the values for Rch gain and Bch gain.

<table>
<thead>
<tr>
<th>Setting</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Off</td>
<td>Set the value of [R Gain] and [B Gain] to [0].</td>
</tr>
<tr>
<td>On</td>
<td>Maintain the value set in [R Gain] and [B Gain].</td>
</tr>
</tbody>
</table>
ATW Speed [Normal, Slow, Fast]
Set the control speed of the ATW function.

<p>| | |</p>
<table>
<thead>
<tr>
<th></th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td>Normal</td>
<td>Tracks at normal speed.</td>
</tr>
<tr>
<td>Slow</td>
<td>Tracks at a speed slower than [Normal].</td>
</tr>
<tr>
<td>Fast</td>
<td>Tracks at a speed faster than [Normal].</td>
</tr>
</tbody>
</table>

This is only enabled when [White Balance Mode] is set to [ATW].

ATW Target R [–10 to +10]
Make fine adjustments to the Rch output when converging with the auto tracking white balance operation.

ATW Target B [–10 to +10]
Make fine adjustments to the Bch output when converging with the auto tracking white balance operation.

Return
Return to the previous menu level.

Color TEMP. Setting screen

<table>
<thead>
<tr>
<th>White Balance Mode</th>
<th>AWB A</th>
</tr>
</thead>
<tbody>
<tr>
<td>Color Temperature</td>
<td>3200K</td>
</tr>
<tr>
<td>R Gain</td>
<td>0</td>
</tr>
<tr>
<td>B Gain</td>
<td>0</td>
</tr>
<tr>
<td>G Axis</td>
<td>0</td>
</tr>
</tbody>
</table>

Return

This displays the values for the [White Balance Mode] in the [Picture 1/8] screen.

<NOTE>
- This item only displays the setting value. You cannot change the setting value here.
  To change the setting value, go to [White Balance Mode] in the [Picture 1/8] screen.

Color Temperature [2000K to 15000K]
This displays the color temperature when [White Balance Mode] is [AWB A] or [AWB B].
Varying the output balance of Rch and Bch enables the varying of the color temperature.
Varying [R Gain] and [B Gain] in [Color TEMP. Setting] also enables color temperature adjustments.
Its setting takes effect when [AWB A] or [AWB B] has been selected as the [White Balance Mode] setting.

R Gain [–400 to +400]
This enables adjustments to R Gain when [White Balance Mode] is [AWB A] or [AWB B].
Varying the output of Rch enables the varying of the colors on the Rch axis.
Its setting takes effect when [AWB A] or [AWB B] has been selected as the [White Balance Mode] setting.

B Gain [–400 to +400]
This enables adjustments to B Gain when [White Balance Mode] is [AWB A] or [AWB B].
Varying the output of Bch enables the varying of the colors on the Bch axis.
Its setting takes effect when [AWB A] or [AWB B] has been selected as the [White Balance Mode] setting.

G Axis [–400 to +400]
This enables adjustments to G Axis when [White Balance Mode] is [AWB A] or [AWB B].
Varying the output of Rch and Bch enables the varying of the colors on the G axis.
Its setting takes effect when [AWB A] or [AWB B] has been selected as the [White Balance Mode] setting.

Return
Return to the previous menu level.
Chroma Level [Off, –99% to 99%]
Set here the color intensity (chroma level) of the images.
This cannot be set when the [Color Setting] is [V-Log].

Chroma Phase [–31 to +31]
Make fine adjustments to the hue of the colors in the images.
This cannot be set when the [Color Setting] is [V-Log].

Master Pedestal [–200 to +200]
This item is used to adjust the black level (adjust the pedestal).
These parts become darker when a negative setting is selected and,
conversely, lighter when a positive setting is selected.
This cannot be set when the [Color Setting] is [V-Log].
All of the following Master Pedestal items also cannot be set when
[Color Setting] is [V-Log].

R Pedestal [–100 to +100]
This enables the R pedestal to be adjusted.

G Pedestal [–100 to +100]
This enables the G pedestal to be adjusted.

B Pedestal [–100 to +100]
This enables the B pedestal to be adjusted.

Pedestal Offset [Off, On]
Set the pedestal level of the Rch, Gch, and Bch when the auto black
balance has been adjusted.

Off Set the pedestal level to [0] for [R Pedestal], [G Pedestal],
and [B Pedestal].

On Maintain the values set for each of [R Pedestal],
[G Pedestal], and [B Pedestal].

Return Return to the previous menu level.

Detail [Off, On]
Turn on/off the contour (sharpness of images) adjustment of images.
This cannot be set when the [Color Setting] is [V-Log].
All of the following Detail items also cannot be set when [Color
Setting] is [V-Log].

Master Detail [–31 to +31]
Adjust the contour correction level (master).
This is only enabled when [Detail] is set to [On].

Detail Coring [0 to 60]
Set the level of the signal (including noise) which makes the detail
effect not work.
This is only enabled when [Detail] is set to [On].

V Detail Level [–7 to +7]
Adjust the contour correction level in the vertical direction.
This is only enabled when [Detail] is set to [On].

Detail Frequency [–7 to +7]
Set the boost frequency of detail.

–7: Low frequency
to
+7: High frequency
When a high frequency is selected, the detail effect is added to
subjects with more definition.
This is only enabled when [Detail] is set to [On].

Level Depend. [–7 to +7]
When the detail of bright signals are emphasized, the detail of dark
parts are compressed.
The larger the [Level Depend.] setting, the more detail of bright parts
is compressed.
This is only enabled when [Detail] is set to [On].

Knee Aperture Level [0 to 5]
Set the detail level of very bright parts.
This is only enabled when [Detail] is set to [On].

Detail Gain(+) [–31 to +31]
Set the detail level of the plus direction (direction to be made
brighter).
This is only enabled when [Detail] is set to [On].

Detail Gain(–) [–31 to +31]
Set the detail level of the minus direction (direction to be made
darker).
This is only enabled when [Detail] is set to [On].

Return Return to the previous menu level.
Skin Detail [Off, On]
This function smooths skin and produces a more beautiful image. This cannot be set when the [Color Setting] is [V-Log]. All of the following Skin Detail items also cannot be set when [Color Setting] is [V-Log].

Skin Detail Effect [0 to 31]
The skin of human subjects appears smoother the larger the setting value. This is only enabled when [Detail] is set to [On] and [Skin Detail] is set to [On].

DownCon Detail [Off, On]
Turn on/off the contour (sharpness of images) adjustment of images down-converted from 4K to HD. This cannot be set when the [Color Setting] is [V-Log]. All of the following DownCon Detail items also cannot be set when [Color Setting] is [V-Log].

DC. Master Detail [–31 to +31]
Adjust the contour correction level (master) for images down-converted from 4K to HD. This is enabled when [Detail] is set to [On].

DC. Detail Coring [0 to 60]
Set the level of the signal (including noise) which makes the detail effect not work for images down-converted from 4K to HD. This is only enabled when [DownCon Detail] is set to [On].

DC. V Detail Level [–7 to +7]
Adjust the contour correction level in the vertical direction for images down-converted from 4K to HD. This is only enabled when [DownCon Detail] is set to [On].

DC. Detail Frequency [–2 to +2]
Set the boost frequency of detail for images down-converted from 4K to HD.

Return
Return to the previous menu level.
DC. Level Depend. [-7 to +7]
The larger the setting for images down-converted from 4K to HD, the
more detail of bright parts is compressed.
This is enabled when [Format] is the following.
• 2160/59.94p, 2160/29.97p, 2160/23.98p, 2160/24p, 2160/50p,
  2160/25p
This is only enabled when [DownCon Detail] is set to [On].

DC. Knee Aperture Level [0 to 5]
Set the detail level of very bright parts in images down-converted from
4K to HD.
This is enabled when [Format] is the following.
• 2160/59.94p, 2160/29.97p, 2160/23.98p, 2160/24p, 2160/50p,
  2160/25p
This is only enabled when [DownCon Detail] is set to [On].

Return
Return to the previous menu level.

<td>Cinema film gamma characteristic.</td>
</tr>
<tr>
<td>VIDEO REC</td>
<td>Cinema video gamma characteristic.</td>
</tr>
<tr>
<td>HLG</td>
<td>Hybrid Log Gamma characteristic.</td>
</tr>
</tbody>
</table>

This cannot be set when the [Color Setting] is [V-Log].
All of the following Gamma Mode items also cannot be set when [Color Setting] is [V-Log].

**<NOTE>**

• When [Gamma Mode] is changed from [HLG] to a mode other than [HLG], or when changed to [HLG], IP video transmission is temporarily stopped.

**Gamma [0.30 to 0.75]**

Adjust the gamma correction level.
Specifying smaller values results in a gentler gamma curve for the slope of low-brightness areas and sharper contrast.
Specifying larger values results in an expanded gradient for dark areas and produces brighter images. The gamma curve for low-brightness areas will be steeper, and contrast will be softer.
This is only enabled when [Gamma Mode] is set to other than [HLG].

**F-REC Dynamic Level [200%, 300%, 400%, 500%, 600%]**

Set the dynamic range.
This is only enabled when [Gamma Mode] is set to [FILM REC].

**F-REC Black STR. Level [0% to 30%]**

Set the black stretch.
This is only enabled when [Gamma Mode] is set to [FILM REC].

**V-REC Knee Slope [150%, 200%, 250%, 300%, 350%, 400%, 450%, 500%]**

Set the knee slope.
This is only enabled when [Gamma Mode] is set to [VIDEO REC].

**V-REC Knee Point [30% to 107%]**

Set the knee point.
This is only enabled when [Gamma Mode] is set to [VIDEO REC].
Black Gamma [-8 to +8]
Set the gamma curve for dark areas.

-8 to -1  Compresses dark parts.
1 to 8    Expands dark parts.

Black Gamma Range [1 to 3]
Set the maximum level of compression/expansion.

1  Around 20%
2  Around 30%
3  Around 40%

DRS [Off, Low, Mid, High]
Set the DRS function which performs correction when video with high light/dark contrast is displayed.
You can select from a [Low], [Mid], or [High] effect level.
This is only enabled when [Gamma Mode] is set to other than [HLG].

Return
Return to the previous menu level.

Knee Mode [Off, Auto, Manual]
Set the operating mode for gradation compression (knee).

<table>
<thead>
<tr>
<th>Setting</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Off</td>
<td>Turn the knee function off.</td>
</tr>
<tr>

<tr>
<td>Manual</td>
<td>Enable the knee function, and set the knee point and knee slope manually.</td>
</tr>
</tbody>
</table>

This is only enabled when [Gamma Mode] is set to other than [HLG]. This cannot be set when the [Color Setting] is [V-Log].
All of the following Knee Mode items also cannot be set when [Color Setting] is [V-Log].

Auto Knee Response [1 to 8]
Set the speed of the auto knee response.
The response speed increases the lower the setting value.
This is only enabled when [Gamma Mode] is set to other than [HLG].

Knee Point [70.0% to 107.0%]
Set the compression level (knee point) position for high-brightness video signals.
This is only enabled when [Gamma Mode] is set to other than [HLG]. This is only enabled when [Knee Mode] is set to [Manual].

Knee Slope [0 to 99]
Set the knee slope.
This is only enabled when [Gamma Mode] is set to other than [HLG]. This is only enabled when [Knee Mode] is set to [Manual].

<NOTE>
• When [DRS] is enabled, the knee setting is disabled.

HLG Knee [Off, On]
Enable or disable the operation of the HLG knee.
This is only enabled when [Gamma Mode] is set to [HLG].
This cannot be set when the [Color Setting] is [V-Log].
All of the following HLG Knee items also cannot be set when [Color Setting] is [V-Log].

HLG Knee Point [55% to 100%]
Set the position of the HLG knee point.
This is only enabled when [Gamma Mode] is set to [HLG].

HLG Knee Slope [0 to 100]
Set the slope of the HLG knee.
This is only enabled when [Gamma Mode] is set to [HLG].

Return
Return to the previous menu level.
White Clip [Off, On]
Turn the white clip function off/on.
This is only enabled when [Gamma Mode] is set to other than [HLG].
This cannot be set when the [Color Setting] is [V-Log].
All of the following White Clip items also cannot be set when [Color Setting] is [V-Log].

White Clip Level [90% to 109%]
Set the white clip level.
This is only enabled when [Gamma Mode] is set to other than [HLG].
This is only enabled when [White Clip] is set to [On].

<NOTE>
- When [Knee Mode] is set to [Auto] and the value of [White Clip Level] is changed, the knee value will also change.

DNR [Off, Low, High]
Set the digital noise reduction level for outputting bright, clear images without noise, even at night and low-light conditions.
When [Low] or [High] is selected, noise can be eliminated.
However, image lag may increase.

Return
Return to the previous menu level.

Matrix Type [Normal, EBU, NTSC, User]
Select the type of color matrix.

<table>
<thead>
<tr>
<th>Normal</th>
<th>This item is used to load the preset color matrix data and compensate for the saturation and color phase.</th>
</tr>
</thead>
<tbody>
<tr>
<td>EBU</td>
<td>On the [Matrix 2/5] screen, the [Linear Matrix] value can be adjusted by the user.</td>
</tr>
</tbody>
</table>

This cannot be set when the [Color Setting] is [V-Log].

Adaptive Matrix [Off, On]
Set Off/On the function that suppresses the linear matrix to suit the shooting conditions.
This cannot be set when the [Color Setting] is [V-Log].

Return
Return to the previous menu level.
Matrix 2/5 screen

Linear Matrix
This can be set when [User] has been selected as the [Matrix Type] setting.

<table>
<thead>
<tr>
<th>R-G</th>
<th>R-B</th>
<th>G-R</th>
<th>G-B</th>
<th>B-R</th>
<th>B-G</th>
</tr>

System 1/2 screen

### System 1/2 ###

Frequency [59.94Hz, 50Hz, 24Hz, 23.98Hz]
This item is selected to switch the frame frequency.

- For details on how to change the frequency, refer to “Changing the frequency” (→ page 57).

Format
For [59.94Hz]
2160/59.94p, 2160/29.97p, 1080/59.94p, 1080/59.94i, 1080/29.97p, 1080/29.97PsF, 1080/23.98p (59.94i) *, 720/59.94p

For [50Hz]
2160/50p, 2160/25p, 1080/50p, 1080/50i, 1080/25p, 1080/25PsF, 720/50p

For [24Hz]
2160/24p, 1080/24p

For [23.98Hz]
2160/23.98p, 1080/23.98p, 1080/23.98PsF

*1 It denotes “1080/23.98p over 59.94i”.

Shooting Mode [Normal, High Sens.]
Select the shooting mode according to the shooting environment.

<table>
<thead>
<tr>
<th>Mode</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Normal</td>
<td>Select when shooting in an environment with a normal level of brightness.</td>
</tr>
<tr>
<td>High Sens.</td>
<td>Select high sensitivity shooting. (Suited to shooting in a dark environment)</td>
</tr>
</tbody>
</table>

Color Setting [Normal, V-Log]
Set the color (gamma and gamut) for the system as a whole.

<table>
<thead>
<tr>
<th>Mode</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Normal</td>
<td>This setting allows detailed picture quality adjustments on the camera.</td>
</tr>
<tr>
<td>V-Log</td>
<td>Set a gamma curve that provides tones and a wide range of latitude (exposure range).</td>
</tr>
</tbody>
</table>

Genlock
This item is selected to perform the phase adjustments.

Horizontal Phase [−206 to +49]
This is used to adjust the horizontal phase during genlock.

Return
Return to the previous menu level.
System 2/2 screen

Tracking Data Output

Settings for the output of tracking data to be used in a virtual studio system or elsewhere. (→ page 58)

Serial (Off, On)

Sets the function [On] or [Off] to output the tracking data, such as Pan/Tilt/Zoom or other information from Serial Output (RS-422), synchronized with the Genlock signal. (→ page 58)

<NOTE>
- The serial connection of the remote controller (AW-RP150, etc.) cannot be made if [Serial] is already [On].
- In the following cases, the tracking data output may be delayed or the value may not be updated.
  - While viewing the OSD menu
  - While recalling the preset value during an ongoing preset recall
  - When executing AWB/ABB
  - When a red or a green tally signal input has been changed between Off and On
  - When an output image is flipped (turned upside down or left-right reversed)
  - After switching [Scene]
  - After switching [Iris Mode]
  - After switching [Super Gain]
  - After switching [White Balance Mode]
  - After switching each item of [Color TEMP. Setting]
  - After switching [Gamma Mode]
  - After switching [Matrix Type]
  - After switching [Focus Mode]
  - After switching [Zoom Mode]
  - After switching [Max Digital Zoom]
  - After switching [Digital Extender]
  - After switching between [Fan1] and [Fan2]
  - After switching [OSD Mix]
  - After switching [Tally]
  - After moving the crop frame of [UHD Crop]
  - After switching [Install Position]
  - After switching [Preset Speed Unit]
  - When executing [Initialize] of [Maintenance]

IP (Off, On)

Sets the UDP output function [On] or [Off] to output tracking data, such as Pan/Tilt/Zoom or other information from the IP output, synchronized with the Genlock signal. (→ page 59)

<NOTE>
- When [IP] is [On], video transmission via IP may be delayed or the video may suffer frame loss. We recommend setting [IP] to [Off] to avoid the delay or frame loss due to the video transmission via IP.
- In the following cases, the tracking data output may be delayed or the value may not be updated.
  - When performing video transmission via IP (M-JPEG/H.264/H.265/RTMP/RTMPS/NDI/HX)
  - When opening the web screen (live screen [Live] or the web setting screen [Setup])
  - While viewing the OSD menu
  - While recalling the preset value during an ongoing preset recall
  - When executing AWB/ABB
  - When a red or a green tally signal input has been changed between Off and On
  - When deleting a preset memory
  - When an output image is flipped (turned upside down or left-right reversed)
  - After switching [Scene]
  - After switching [Iris Mode]
  - After switching [Super Gain]
  - After switching [White Balance Mode]
  - After switching each item of [Color TEMP. Setting]
  - After switching [Gamma Mode]
  - After switching [Matrix Type]
  - After switching [Tally]
  - After moving the crop frame of [UHD Crop]
  - After switching [Install Position]
  - After switching [Preset Speed Unit]
  - When executing [Initialize] of [Maintenance]

Camera menu items (continued)
Wireless Control [Enable, Disable]

[Enable] or [Disable] is set here for operations conducted from the wireless remote control.

<NOTE>
• When the power is turned on with the wireless remote control, then operations from the wireless remote control are possible irrespective of this setting value.

Fan1 [Auto, Low, Mid, High]

Set the operation of the cooling fan near the lens.

<table>
<thead>
<tr>
<th>Setting</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Auto</td>
<td>Enable automatic control of the cooling fan.</td>
</tr>
<tr>
<td>Low</td>
<td>Operate the cooling fan at low speed.</td>
</tr>
<tr>
<td>Mid</td>
<td>Operate the cooling fan at medium speed.</td>
</tr>
<tr>
<td>High</td>
<td>Operate the cooling fan at high speed.</td>
</tr>
</tbody>
</table>

<NOTE>
• Even if this is set to [Low], [Mid], or [High], the cooling fan may be forcibly stopped when the temperature is low.
• Even if this is set to [Low] or [Mid], the cooling fan may be forcibly operated at [High] when the temperature is high.

Fan2 [Auto, Low, Mid, High]

Set the operation of the cooling fan near the pan-tilt head.

<table>
<thead>
<tr>
<th>Setting</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Auto</td>
<td>Enable automatic control of the cooling fan.</td>
</tr>
<tr>
<td>Low</td>
<td>Operate the cooling fan at low speed.</td>
</tr>
<tr>
<td>Mid</td>
<td>Operate the cooling fan at medium speed.</td>
</tr>
<tr>
<td>High</td>
<td>Operate the cooling fan at high speed.</td>
</tr>
</tbody>
</table>

<NOTE>
• Even if this is set to [Low], [Mid], or [High], the cooling fan may be forcibly stopped when the temperature is low.
• Even if this is set to [Low] or [Mid], the cooling fan may be forcibly operated at [High] when the temperature is high.

Return

Return to the previous menu level.
Camera menu items (continued)

### Changing the frequency
When the currently selected frequency is changed in the [System 1/2] screen, the pre-frequency-change confirmation screen appears.

**Pre-frequency-change confirmation screen**

```
### Frequency ###

Do you want to set
Frequency(59.94Hz)?

CANCEL
O.K.
```

- The frequency to be set is displayed within the parentheses on the screen.
- When you move the cursor to [O.K.] on the pre-frequency-change confirmation screen and confirm, the frequency is changed.

**<NOTE>**
- When using a monitor that does not support 59.94Hz/50Hz/24Hz/23.98Hz frequencies, images may not be displayed after the frequency is changed. Before changing the frequency, verify that your monitor supports the frequency.
- When Frequency is changed, the unit restarts.

### Changing the format
When the currently selected format is changed in the [System 1/2] screen, the pre-format-change confirmation screen appears.

**Pre-format-change confirmation screen**

```
### Format ###

Do you want to set
Format(2160/59.94p)?

CANCEL
O.K.
```

- The format to be set is displayed within the parentheses on the screen.
- When you move the cursor to [O.K.] on the pre-format-change confirmation screen and confirm, the post-format-change confirmation screen appears.

**Post-format-change confirmation screen**

```
### Format ###

Are you O.K.?

CANCEL
O.K.
```

- If you move the cursor to [Yes] and confirm, the display returns to the [System 1/2] screen in the post-change format.
- If you move the cursor to [No] and confirm, the display returns to the [System 1/2] screen in the pre-change format.
  The same occurs if an operation is not performed within 10 seconds.
- When Format is changed, IP video transmission is stopped.
- When Format is changed, the Format for each output terminal (12G SDI/OPTICAL, 3G SDI, MONI, HDMI) is reset to its predefined value.
Tracking data output
When [Serial] or [IP] of [Tracking Data Output] on the [System 2/2] screen is set to [On], outputs the tracking data for Pan/Tilt/Zoom or other information to link with a virtual studio system or elsewhere via serial (RS-422) or IP output.

Serial (RS-422) output
- When [Serial] of [Tracking Data Output] on the [System 2/2] screen is set to [On], the tracking data for Pan/Tilt/Zoom or other information is synchronized with the Genlock signal and output via the serial output (RS-422).
- The tracking data is output in stream mode in a format conforming to the free-d protocol. The message type is Type D1 (camera position/orientation data) only.

Advanced stored data
This unit stores and outputs the following data according to the packet structure specified in Type D1 of the free-d protocol.

**Camera ID**
Always stores FFh.

**Camera Pan Angle**
Stores the Pan angle of the unit (–175° to +175°) with the format provided by the free-d protocol.

**Camera Tilt Angle**
Stores the Tilt angle of the unit (–30° to +210°) with the format provided by the free-d protocol.

**Camera Roll Angle**
Stores the rotation angle (0° or 180°) corresponding to the flip state (turned upside down or left-right reversed) of the unit with the format provided by the free-d protocol.

**Camera X-Position**
Always stores 000000h.

**Camera Y-Position**
Always stores 000000h.

**Camera Height (Z-Position)**
Always stores 000000h.

**Camera Zoom**
Stores the magnification of optical zoom of this unit between 000555h (WIDE) and 000FFFh (TELE).

**Camera Focus**
Stores the value of focus position of this unit between 000555h (NEAR) and 000FFFh (FAR).

**Spare / User Defined (16bits)**
Stores the value of iris position of this unit between 0555h (CLOSE) and 0FFFh (OPEN).

**Checksum**
Stores the checksum value provided by the free-d protocol.

<NOTE>
- The serial connection of the remote controller (AW-RP150, etc.) cannot be made if [Serial] is already [On].
- In the following cases, the tracking data output may be delayed or the value may not be updated.
  - While viewing the OSD menu
  - During recalling the preset value during an ongoing preset recall
  - When executing AWB/ABB
  - When a red or a green tally signal input has been changed between Off and On
  - When deleting a preset memory
  - When an output image is flipped (turned upside down or left-right reversed)
  - After switching [Scene]
  - After switching [Iris Mode]
  - After switching [Super Gain]
  - After switching [White Balance Mode]
  - After switching each item of [Color TEMP. Setting]
  - After switching [Gamma Mode]
  - After switching [Matrix Type]
  - After switching [Focus Mode]
  - After switching [Zoom Mode]
  - After switching [Max Digital Zoom]
  - After switching [Digital Extender]
  - After switching between [Fan1] and [Fan2]
  - After switching [OSD Mix]
  - After switching [Tally]
  - After moving the crop frame of [UHD Crop]
  - After switching [Install Position]
  - After switching [Preset Speed Unit]
  - When executing [Initialize] of [Maintenance]
IP output

- When [IP] of [Tracking Data Output] on the [System 2/2] screen is set to [On], the tracking data for Pan/Tilt/Zoom or other information is synchronized with the Genlock signal and outputs UDP packets via IP.
- Outputs simultaneously up to four clients (IP addresses) that have been specified on the designated web screen (→ page 121).
- The tracking data is output in a format conforming to the free-d protocol. The output specification (mode, command type, advanced stored data) of this unit is equivalent to serial (RS-422) output.

<NOTE>

- When forwarding to more than one client, the timing of transmitting the UDP packet to the second and subsequent client will always be delayed relative to the Genlock signal. (Approximately 200 to 300 μs delay will occur for each client. The latency may be increased depending on the system status or the network environment of the unit.)
- When [IP] is [On], video transmission via IP may be delayed or the video may suffer frame loss. We recommend setting [IP] to [Off] to avoid the delay or frame loss due to the video transmission via IP.
- In the following cases, the tracking data output may be delayed or the value may not be updated.
  - When performing video transmission via IP (M-JPEG/H.264/H.265/RTMP/RTMPS/NDI|HX)
  - When opening the web screen (live screen [Live] or the web setting screen [Setup])
  - While viewing the OSD menu
  - While recalling the preset value during an ongoing preset recall
  - When executing AWB/ABB
  - When a red or a green tally signal input has been changed between Off and On
  - When deleting a preset memory
  - When an output image is flipped (turned upside down or left-right reversed)
  - After switching [Scene]
  - After switching [Iris Mode]
  - After switching [Super Gain]
  - After switching [White Balance Mode]
  - After switching each item of [Color TEMP. Setting]
  - After switching [Gamma Mode]
  - After switching [Matrix Type]
  - After switching [Focus Mode]
  - After switching [Zoom Mode]
  - After switching [Max Digital Zoom]
  - After switching [Digital Extender]
  - After switching between [Fan1] and [Fan2]
  - After switching [OSD Mix]
  - After switching [Tally]
  - After moving the crop frame of [UHD Crop]
  - After switching [Install Position]
  - After switching [Preset Speed Unit]
  - When executing [Initialize] of [Maintenance]
12G SDI/OPTICAL
Make the settings for output from the 12G SDI OUT connector and Optical connector.

Format
Set the output format.
The following format settings are possible depending on the [Format] setting in the [System 1/2] screen.

<table>
<thead>
<tr>
<th>Frequency</th>

Return
Return to the previous menu level.
**Camera menu items (continued)**

### Output 5/8 screen

#### Bar [Camera, Colorbar]
Switch between camera images and color bars.
- **Camera**: Camera images
- **Colorbar**: Color bar

#### Color Bar Type [Type1, Type2]
Select the type of color bar to display.
- **Type1**:  
- **Type2**:  

This is only enabled when [Bar] is set to [Colorbar].

**NOTE**
- Even if the [HDR Output Select] for each of the outputs is either [HDR(2020)] or [HDR(709)], the color bar for SDR is output.

#### Tone [Off, Low, Normal]
Make the settings for the test tone signal (1 kHz) output while the color bar is displayed.
- **Off**: Test tone is not output.
- **Low**: Test tone is output at low volume.
- **Normal**: Test tone is output at normal volume.

This is only enabled when [Bar] is set to [Colorbar].

#### Audio [Off, On]
Turn audio input on/off.
- **Mic**: Set the microphone input.
- **Line**: Set the line input.

This is only enabled when [Audio] is set to [On].

#### Volume Level [–36dB to +12dB]
Set the volume of audio output.
This is only enabled when [Audio] is set to [On].

#### Plugin Power [Off, On]
Turn the plugin power for the audio off/on.
This is only enabled when [Audio] is set to [On].
This is only enabled when [Input Type] is set to [Mic].

**Return**
Return to the previous menu level.

### Output 6/8 screen

#### OSD Mix
Select whether to turn off/on camera menu, status, and other displays for each output image.

- **12G SDI/OPTICAL [Off, On]**
- **3G SDI [Off, On]**
- **MONI [Off, On]**
- **HDMI [Off, On]**
- **IP [Off, On]**

<table>
<thead>
<tr>
<th></th>
<th>Off</th>
<th>On</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Off</strong></td>
<td>The camera menus and statuses are not displayed on the output pictures covered by the setting items listed above.</td>
<td></td>
</tr>
<tr>
<td><strong>On</strong></td>
<td>The camera menus and statuses are displayed for the output pictures covered by the setting items listed above.</td>
<td></td>
</tr>
</tbody>
</table>

**NOTE**
- When this is set to [Off], the camera menu can be displayed for about 1 minute after the unit is turned on.

**Return**
Return to the previous menu level.
Camera menu items (continued)

Output 7/8 screen

OSD Off With R-Tally [Off, On]
Off or on the function that turns off camera menu, status, and other displays when red tally signals are received via commands or contacts.
When the red tally signal releases, the camera menu display will return.

OSD Status [Off, On]
Turn the status display during AWB and ABB off/on, or error display when an error occurs.

Tally [Enable, Disable]
[Disable] or [Enable] is set here for the function which turns on or turns off the tally lamp using the tally control signal.

Tally Brightness [Low, Mid, High]
Adjust the brightness of the tally LED.

Status Lamp [Enable, Disable]
[Disable] or [Enable] is set here for the status display lamp.
When you want the status display lamp to stay off while this unit is in operation, set to [Disable].

<NOTE>
• Even when set to [Disable], the status display lamp may light up when this unit is starting up, updating firmware, or trouble is occurring.

External Output
Select the signal type output from the External Output signal lines (Output1, Output2) of the RS-422 connector. (→ page 16)

Output1 [Off, R-Tally, G-Tally]
Output2 [Off, R-Tally, G-Tally]

Off Signal is not output.
R-Tally The reception status of the red tally signal is output.
G-Tally The reception status of the green tally signal is output.

Return Return to the previous menu level.

Output 8/8 screen

UHD Crop [Off, Crop(1080), Crop(720)]
Set the Crop function which crops UHD (3840×2160) images to 1920×1080 images or 1280×720 images.

<table>
<thead>
<tr>
<th>Setting</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Off</td>
<td>Disable the Crop function.</td>
</tr>
<tr>
<td>Crop(1080)</td>
<td>Crop UHD (3840×2160) images to 1920×1080 images. This is enabled only when [Format] in [System 1/2] screen is the following. 2160/59.94p, 2160/29.97p 2160/50p, 2160/25p 2160/24p, 2160/23.98p</td>
</tr>
<tr>
<td>Crop(720)</td>
<td>Crop UHD (3840×2160) images to 1280×720 images. This is enabled only when [Format] in [System 1/2] screen is the following. 2160/59.94p, 2160/50p</td>
</tr>
</tbody>
</table>

<NOTE>
• When [UHD Crop] is changed, IP video transmission is temporarily stopped.
• [H.264(UHD)], [H.265(UHD)], and [JPEG(UHD)] cannot be selected in [Streaming mode] when [UHD Crop] is [Crop(1080)] or [Crop(720)]. (→ page 100)
• When [H.264(UHD)], [H.265(UHD)], or [JPEG(UHD)] is selected in [Streaming mode] and [UHD Crop] is switched to [Crop(1080)] or [Crop(720)], the [Streaming mode] setting changes to [H.264].

3G SDI Out [Full, Crop]
IP Out [Full, Crop]
Make the settings for Full/Crop for images output to the 3G SDI OUT connector and IP.

<table>
<thead>
<tr>
<th>Setting</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Full</td>
<td>FHD down-converted images are output as is without cropping UHD images.</td>
</tr>
<tr>
<td>Crop</td>
<td>Images with FHD cropped from UHD images are output. The images output in this case are those with the crop frame specified in [Crop Out].</td>
</tr>
</tbody>
</table>

This is only enabled when [UHD Crop] is set to [Crop(1080)] or [Crop(720)].

Crop Out [YL, G, MG]
Make the settings for the crop frame for images output to the 3G SDI OUT connector and IP.

<table>
<thead>
<tr>
<th>Setting</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>YL</td>
<td>Output the yellow crop frame images.</td>
</tr>
<tr>
<td>G</td>
<td>Output the green crop frame images.</td>
</tr>
<tr>
<td>MG</td>
<td>Output the magenta crop frame images.</td>
</tr>
</tbody>
</table>

This is only enabled when [UHD Crop] is set to [Crop(1080)] or [Crop(720)].

<NOTE>
• The color frame specified in [Crop Out] will be a deeper shade when compared to other colors used for frames.
Crop Marker [Off, YL, G, MG, YL+G, YL+MG, G+MG, YL+G+MG]
Make the settings for the crop frame displayed for images output to the MONITOR OUT connector <MONI OUT>.

<table>
<thead>
<tr>
<th>Setting</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Off</td>
<td>Crop frame is not displayed.</td>
</tr>
<tr>
<td>YL</td>
<td>Only a yellow crop frame is displayed.</td>
</tr>
<tr>
<td>G</td>
<td>Only a green crop frame is displayed.</td>
</tr>
<tr>
<td>MG</td>
<td>Only a magenta crop frame is displayed.</td>
</tr>
<tr>
<td>YL+G</td>
<td>Yellow and green crop frames are displayed.</td>
</tr>
<tr>
<td>YL+MG</td>
<td>Yellow and magenta crop frames are displayed.</td>
</tr>
<tr>
<td>G+MG</td>
<td>Green and magenta crop frames are displayed.</td>
</tr>
<tr>
<td>YL+G+MG</td>
<td>Yellow, green, and magenta crop frames are displayed.</td>
</tr>
</tbody>
</table>

This is only enabled when [UHD Crop] is set to [Crop(1080)] or [Crop(720)].

Crop Adjust [YL, G, MG]
Make selections for the crop frame to adjust positioning.

<table>
<thead>
<tr>
<th>Setting</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>YL</td>
<td>Make position adjustments for the yellow crop frame.</td>
</tr>
<tr>
<td>G</td>
<td>Make position adjustments for the green crop frame.</td>
</tr>
<tr>
<td>MG</td>
<td>Make position adjustments for the magenta crop frame.</td>
</tr>
</tbody>
</table>

This is only enabled when [UHD Crop] is set to [Crop(1080)] or [Crop(720)].

<NOTE>
- The color frame specified in [Crop Adjust] will be thicker when compared to other color frames.

Crop H Position [0 to 2560]
Make settings for the position in the horizontal direction for the crop frame specified in [Crop Adjust].
The variable range is 0 to 1920 when [UHD Crop] is [Crop(1080)], with 0 as the left edge and 1920 as the right edge, and only even numbers can be set.
The variable range is 0 to 2560 when [UHD Crop] is [Crop(720)], with 0 as the left edge and 2560 as the right edge, and only even numbers can be set.
This is only enabled when [UHD Crop] is set to [Crop(1080)] or [Crop(720)].

Crop V Position [0 to 1440]
Make settings for the position in the vertical direction for the crop frame specified in [Crop Adjust].
The variable range is 0 to 1080 when [UHD Crop] is [Crop(1080)], with 0 as the upper edge and 1080 as the lower edge.
The variable range is 0 to 1440 when [UHD Crop] is [Crop(720)], with 0 as the upper edge and 1440 as the lower edge.
This is only enabled when [UHD Crop] is set to [Crop(1080)] or [Crop(720)].

Return
Return to the previous menu level.

The CROP function
When [UHD Crop] is set to [Crop(1080)] or [Crop(720)], it is possible to output images with FHD cropped from UHD signals from the 3G SDI OUT connector and IP. (Image 2)
Video signals of UHD videos down-converted to FHD are output to the MONITOR OUT connector <MONI OUT> at this time, and the crop frame according to the [Crop Marker] menu setting is displayed. (Image 1)
Furthermore, UHD images are output from the 12G SDI OUT connector, Optical connector, and HDMI connector, and the crop frame is not displayed.

Crop frame

Image 1

Image 2

Depending on the [3G SDI/IP Out] and [Crop Out] settings, images output from the 3G SDI OUT connector and IP will be as shown below.

<table>
<thead>
<tr>
<th>3G SDI/IP Out</th>
<th>Crop Out</th>
<th>Images output from 3G SDI OUT connector and IP</th>
</tr>
</thead>
<tbody>

</table>
Install Position
[Desktop, Hanging]

[Desktop] or [Hanging] is selected here as the method used to install the unit.

- Desktop: Stand-alone installation
- Hanging: Suspended installation

<NOTE>
- When [Hanging] has been selected, the top, bottom, left and right of the images will be reversed, and up/down/left/right control for panning and tilting will also be reversed.

Smart Picture Flip [Off, Auto]
When the tilt becomes the angle set for [Flip Detect Angle], the image will be flipped in the vertical direction automatically.

- Off: The picture is not turned upside down.
- Auto: The picture is automatically turned upside down.

Flip Detect Angle [60deg to 120deg]
Set the tilt angle at which the image will be flipped in the vertical direction automatically when [Smart Picture Flip] is set to [Auto].

P/T Speed Mode [Normal, Fast]
Set the speed of pan/tilt operation.

- Normal: Pan/tilt operates at normal speed (maximum about 60° per second).
- Fast: Pan/tilt operates at fast speed (maximum about 180° per second).

<NOTE>
- The pan/tilt operation noise may increase when [Fast] is selected.
- Even when [Fast] is selected, the pan/tilt speed during preset playback will be the same speed as when [Normal] is selected.

Speed With Zoom Position [Off, On]
[Off] or [On] is set here for the function used to adjust the pan/tilt adjustment speed in conjunction with the zoom magnification.

<NOTE>
- This function has no effect during preset operations.
Preset 1/2 screen

Preset Speed Unit [Speed Table, Time]
When reproducing the information such as camera direction registered in the preset memory, you can select whether to specify the playback time by speed or by time.

<table>

</table>

Preset Speed Table [Slow, Fast]
Set the preset speed table (Slow, Fast). During preset playback, presets are performed at [Preset Speed] (1 to 30) values that are based on the table set here.

Preset Scope [Mode A, Mode B, Mode C]
Selected here are the setting items to be recalled when the contents of the preset memory are regenerated.

<table>
<thead>
<tr>
<th>Mode A</th>
<th>Pan, Tilt, Zoom (including digital zoom), Focus, Iris, Gain, white balance adjustment value</th>
</tr>
</thead>
<tbody>
<tr>
<td>Mode B</td>
<td>Pan, Tilt, Zoom (including digital zoom), Focus, Iris</td>
</tr>
<tr>
<td>Mode C</td>
<td>Pan, Tilt, Zoom (including digital zoom), Focus</td>
</tr>
</tbody>
</table>

Preset Digital Extender [Off, On]
Turns the preset digital extender function off/on. When set to [On], the digital extender function configuration will be recalled when regenerating the preset memory.

Preset Crop [Off, On]
When the preset memory is played back, set whether the reproduction of content set in the various [UHD Crop] menus is off/on. When set to [On], the content set in the various [UHD Crop] menus is reproduced when preset memory is played back.

Preset Thumbnail Update [Off, On]
Turn off/on the function for registering the still image (thumbnail) for the images being output when a preset memory is registered.

Preset Name [Reset, Hold]
When registering a preset memory, set whether to reset the previously registered preset name or keep it.

<table>
<thead>
<tr>
<th>Reset</th>
<th>When registering a preset memory, reset the previously registered preset name. The preset name after resetting will be [Preset***]. (***) is a 3 digit preset number: 001 to 100</th>
</tr>
</thead>
<tbody>
<tr>
<td>Hold</td>
<td>When registering a preset memory, keep the previously registered preset name.</td>
</tr>
</tbody>
</table>

<NOTE>
- When [UHD Crop] is [Crop(1080)] or [Crop(720)], the cropped still image is registered rather than the Full image.
- When uploading Camera(ALL) or Camera(SYSTEM) on the web screen or other access, the still image (thumbnail) that has been registered in preset memory will be erased. (→ page 140)

<NOTE>
- The registration of preset names can be done in the web browser. 0 to 9, A to Z, a to z, _, and space

Return
Return to the previous menu level.
Preset Iris [Off, On]
When the preset memory is played back, set whether the reproduction of the values in the various menus related to Iris is off/on.
When set to [On], the values set in the various menus below are reproduced when preset memory is played back.
- Picture Level
- Iris Mode
- Auto Iris Speed
- Auto Iris Window

<NOTE>
- Its setting takes effect when [Mode A] or [Mode B] has been selected as the [Preset Scope] setting.

Preset Zoom Mode [Mode A, Mode B]
Select the zoom operation for when preset memory is recalled.

<table>
<thead>
<tr>
<th>Mode</th>
<th>Operation</th>
</tr>
</thead>
<tbody>
<tr>
<td>Mode A</td>
<td>Perform the zoom operation in line with the pan/tilt operation.</td>
</tr>
<tr>
<td>Mode B</td>
<td>Perform the zoom operation quicker than the pan/tilt operation.</td>
</tr>
</tbody>
</table>

Freeze During Preset [Off, On]
Turn the function for freezing images during preset playback off/on.
When this is set to [On], preset playback is performed with a still of the image immediately preceding the start of preset playback being output. The image freeze is released when preset playback is finished.

Return
Return to the previous menu level.

Firmware Version
This is selected to display the [Firmware Version] screen on which the user can check the version of the firmware which is currently installed in the unit.

IP Network
This is selected to display the [IP Network] screen on which the user can check and make settings for the [IP Address], [Subnet Mask] and [Default Gateway] settings which have been set in the unit.

Initialize
This is selected to display the [Initialize] screen on which the user can initialize the camera settings.
For details on operation, refer to “Concerning initialization” (→ page 71).

Hour Meter
This is selected to display the [Hour Meter] screen on which the operation history is displayed.

HDMI Status
Display the [HDMI Status] screen that displays the status of HDMI output.

Error Status
Display the [Error Status] screen that displays the status of errors.

Return
Return to the previous menu level.
**Firmware Version 1/2 screen**

<table>
<thead>
<tr>
<th>System Version</th>
<th>V01.00</th>

</tr>
<tr>
<td>Servo</td>
<td>V01.00</td>
</tr>
<tr>
<td>Interface</td>
<td>V01.00</td>
</tr>
</tbody>
</table>

**System Version**
Display the version for overall system of the unit.

**CPU Software**
- **Main/Network**
  Display the main/network software version.

**Camera**
Display the software version of the camera.

**Lens**
Display the software version of the lens.

**Servo**
Display the software version of the servo.

**Interface**
Display the software version of the interface.

**Return**
Return to the previous menu level.

---

**Firmware Version 2/2 screen**

<table>
<thead>
<tr>
<th>EEPROM</th>
<th></th>
</tr>
</thead>
<tbody>
<tr>

<td>V01.00</td>
</tr>
</tbody>
</table>

**EEPROM**
- **Main/Network**
  Display the EEPROM version of the main/network.

**Interface**
Display the EEPROM version of the interface.

**FPGA**
- **COM**
  Display the FPGA version for communications.

**AVIO**
Display the FPGA version for image processing.

**Return**
Return to the previous menu level.
### IP Network screen

#### IP Address
Set the IP address for this unit.
The set value is applied to this unit when [Set Execute] is executed.

#### Subnet Mask
Set the subnet mask for this unit.
The set value is applied to this unit when [Set Execute] is executed.

#### Default Gateway
Set the default gateway for this unit.
The set value is applied to this unit when [Set Execute] is executed.

#### Set Execute
Apply the values set in [IP Address], [Subnet Mask], and [Default Gateway] to this unit.

#### Return
Return to the previous menu level.

**<NOTE>**
- The IP Network cannot be changed while the DHCP function is On.
- If the DHCP function is not to be used, change the setting for [DHCP] to [Off] in the network settings screen of your web browser. (→ page 124)

### Concerning initialization

When [Initialize] is selected on the [Maintenance] screen, the [Initialize] screen appears.

#### Initialize screen

#### Menu settings initialized screen

- When the cursor is moved to [O.K.] on the [Initialize] screen and the setting is entered, the [Menu settings initialized] screen is displayed for 5 seconds, and the camera settings are restored to the settings which were established when the camera was purchased.

**<NOTE>**
- The [Format] and [Frequency] settings (→ page 54) are not initialized.
- The network settings are not initialized.
- The [AWB] and [ABB] adjustment values are not initialized.

#### Menu settings unchanged screen

- When the cursor is moved to [CANCEL] on the [Initialize] screen and the setting is entered, the [Menu settings unchanged] screen is displayed for 5 seconds, the initialization operation is not performed, and the [Maintenance] screen returns to the display.
Hour Meter screen

Operation
Displays the cumulative time that power has been supplied to the unit. (8-digit numerical value)

Fan1
Display the cumulative hours of operation of the cooling fan near the lens. (8-digit numerical value)

Fan2
Display the cumulative hours of operation of the cooling fan near the pan-tilt head. (8-digit numerical value)

Return
Return to the previous menu level.

HDMI Status screen

Connect
Displays the connection status of the HDMI connector. One of the following is displayed according to the product specifications of the device or monitor connected.

<table>
<thead>
<tr>
<th>Connect</th>
<th>Status</th>
</tr>
</thead>
<tbody>
<tr>
<td>Unconnect</td>
<td>Not connected.</td>
</tr>
<tr>
<td>HDMI</td>
<td>Connected via HDMI.</td>
</tr>
<tr>
<td>DVI</td>
<td>Connected via DVI.</td>
</tr>
</tbody>
</table>

Format
Displays the format of the images being output via the HDMI connector. The same format is displayed as is specified in [Format] in [HDMI] in the [Output 4/8] screen.

<table>
<thead>
<tr>
<th>Format</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Unconnect</td>
<td>– – –</td>
</tr>
<tr>
<td>HDMI</td>
<td>SDR(709)</td>
</tr>
<tr>
<td></td>
<td>HLG(2020)</td>
</tr>
<tr>
<td></td>
<td>HLG(709)</td>
</tr>
</tbody>
</table>

Video Sampling
The video sampling of the images being output via the HDMI connector is displayed. One of the following is displayed according to the menu settings and the product specifications of the device or monitor connected.

<table>
<thead>
<tr>
<th>Video Sampling</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>YPbPr 4:2:2/10bit</td>
<td>Displayed when [Connect] is other than HDMI.</td>
</tr>
<tr>
<td>YPbPr 4:2:0/8bit</td>
<td>Displayed when [Connect] is HDMI and output is YPbPr 4:2:0/8bit.</td>
</tr>
</tbody>
</table>

<NOTE>
• Even if the video sampling is set in [Video Sampling] in [HDMI] in the [Output 4/8] screen, it may not be possible to output using the specified format due to the product specifications of the HDMI connected device or monitor. This item displays the status of the video sampling actually being output.

HDR Output
The HDR signal status of the images being output via the HDMI connector is displayed. One of the following is displayed according to the product specifications of the device or monitor connected.

<table>
<thead>
<tr>
<th>HDR Output</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Unconnect</td>
<td>– – –</td>
</tr>
<tr>
<td>HDMI</td>
<td>SDR(709)</td>
</tr>
<tr>
<td></td>
<td>HLG(2020)</td>
</tr>
<tr>
<td></td>
<td>HLG(709)</td>
</tr>
</tbody>
</table>
**Monitor**
Displays the status of the device or monitor connected to the HDMI connector.
One of the following is displayed according to the product specifications of the device or monitor connected.

<table>
<thead>
<tr>
<th>-- --</th>
<th>Displayed when [Connect] is other than HDMI.</th>
</tr>
</thead>
<tbody>
<tr>
<td>Available</td>
<td>This indicates that [Connect] is HDMI and the device or monitor connected supports the format output by this unit.</td>
</tr>
<tr>
<td>Unsupport UHD 60p/50p</td>
<td>This indicates that [Connect] is HDMI and the device or monitor connected does not support the format output by this unit.</td>
</tr>
<tr>
<td>Unsupport UHD 50p 4:2:2</td>
<td>Unsupport UHD 60p 4:2:2</td>
</tr>
<tr>
<td>Unsupport UHD 60p 4:2:0</td>
<td>Unsupport UHD 50p 4:2:0</td>
</tr>
<tr>
<td>Unsupport UHD 50p 4:2:0</td>
<td>Unsupport HLG</td>
</tr>
<tr>
<td>Unsupport 2020</td>
<td>Unsupport Format</td>
</tr>
<tr>
<td>Unsupport Temperature</td>
<td>This indicates that [Connect] is HDMI and the device or monitor connected is not supported for a reason other than those shown above.</td>
</tr>
</tbody>
</table>

**Return**
Return to the previous menu level.

**Error Status screen**

### Error Status ###

<table>
<thead>
<tr>
<th>Lens</th>
<th>No Error</th>
</tr>
</thead>
<tbody>
<tr>
<td>Pan/Tilt</td>
<td>No Error</td>
</tr>
<tr>
<td>Fan</td>
<td>No Error</td>
</tr>
<tr>
<td>Temperature</td>
<td>No Error</td>
</tr>
</tbody>
</table>

**Lens [No Error, Error]**
This displays the error status of the lens.

| No Error | The lens is operating normally. |
| Error | A lens error has occurred. |

**Pan/Tilt [No Error, Error]**
This displays the error status of the pan-tilt drive section.

| No Error | The pan-tilt drive section is operating normally. |
| Error | A pan-tilt drive section error has occurred. |

**Fan [No Error, Error]**
This displays the error status of the fan.

| No Error | The fan is operating normally. |
| Error | A fan error has occurred. |

**Temperature [No Error, High Temperature, Sensor Error]**

This displays the status of temperature related errors.

| No Error | Within normal operating temperature range. |
| High Temperature | Temperature is high. |
| Sensor Error | The temperature sensor may have malfunctioned. |

**<NOTE>**
- When the above errors occur, notification of the errors are sent via IP/serial to the external device (AW-RP150, etc.), so these errors can be displayed on the external device.

**Return**
Return to the previous menu level.

Displaying the web screen

With a personal computer connected to the unit, it is possible to view the camera’s IP videos or select various settings from the web browser.

The LAN crossover cable is used when connecting a personal computer directly to the unit’s LAN connector for IP control, and the LAN straight cable is used when making the connection through a switching hub.

Select an IP address for the personal computer within the private address range while ensuring that it is different from the address of the unit. Set the subnet mask to the same address as the unit.

<NOTE>
- If you need to change the IP address and subnet mask, be sure to ask your dealer to make these changes for you.

Unit’s IP address and subnet mask (factory settings)*1
- IP address: 192.168.0.10
- Subnet mask: 255.255.255.0

*1 The factory default for the private address range is between 192.168.0.1 and 192.168.0.255.

- If the controller and web browser are being used at the same time, the content selected using the controller may not be reflected on the web browser display.
  - When using both the controller and web browser, be absolutely sure to check the settings using the controller or camera menu.

For details of the required personal computer environment, refer to page 8.

<NOTE>
- Some functions on the web setting screen can be used only from Windows Internet Explorer 11.
  - Functions which can be used by Windows Internet Explorer 11 only are indicated using the WindowsIE.11 mark.
  - The “Network Camera View 4S” plug-in viewer software must have already been installed in order to display the unit’s IP videos using Windows Internet Explorer 11.
  - This is not necessary when using web browsers other than Windows Internet Explorer 11.
  - For details, refer to “Installing the plug-in viewer software” (→ page 26).
  - When [IP(UDP)] of [Tracking Data Output] is set to [On] and opening the web screen, a warning message will be displayed. Click the [Continue] button to leave the web screen open.
  - While the web screen is displayed, the tracking data that is output when [IP(UDP)] of [Tracking Data Output] is [On] may be delayed or the data value may not be updated. (→ page 120)

Displaying the web screen using a personal computer

The procedure is explained here using Windows screens (Internet Explorer). When using other browsers, some screen displays will be different, but the procedure is similar.

1. Start the web browser of the personal computer.
   - Use one of the web browsers below depending on the operating system installed in the personal computer.

<table>
<thead>
<tr>
<th>Operating system installed</th>
<th>Web browser</th>
</tr>
</thead>
<tbody>
<tr>
<td>Windows</td>
<td>Windows 7 64/32-bit/Internet Explorer 11</td>
</tr>
<tr>
<td></td>
<td>Windows 10/Internet Explorer 11</td>
</tr>
<tr>
<td></td>
<td>Windows 10/Microsoft Edge</td>
</tr>
<tr>
<td></td>
<td>Windows 10/Google Chrome</td>
</tr>
<tr>
<td>macOS</td>
<td>OS X 10.11/Safari 11</td>
</tr>
<tr>
<td></td>
<td>macOS 10.12/Safari 11</td>
</tr>
<tr>
<td></td>
<td>macOS 10.13/Safari 11</td>
</tr>
<tr>
<td></td>
<td>macOS 10.13/Google Chrome</td>
</tr>
</tbody>
</table>

2. Enter the IP address you configured on the Easy IP Setup Software in the address bar of the web browser.

IPv4 address entry example:
http://URL registered with IPv4 address
http://192.168.0.10/

IPv6 address entry example:
http://[URL registered with IPv6 address]
http://[2001:db8::10]/

<NOTE>
- If the HTTP port number has been changed from “80”, enter “http://<camera IP address>:<port number>” in the address bar.
  - Example: When the port number is set to 8080:
    http://192.168.0.11:8080
  - If the unit is located on the local network, configure proxy server settings on the web browser ([Tools] - [Internet Options] in the menu bar) so that a proxy server is not used for the local address.
  - For details on when [HTTPS] - [Connection] (→ page 129) is set to [HTTPS] in the [Advanced] of the network setup screen [Network], see “Accessing the Camera by HTTPS” (→ page 134).
3. Set the initial account.

In the initial state, the initial account setting screen is displayed when the web screen is displayed.
Set a user name and password.

<NOTE>
• Do not set character strings that can be easily guessed by third parties.
• Change the password at regular intervals.
• The password must use at least 3 of the following 4 character types and be 8 characters or longer.
  Alphabet upper cases
  Alphabet lower cases
  Numerals
  Symbols ( ! # $ % ' ( ) * + , - . / ? @ [ \ ] ^ _ ` ~ )
• When a password is set that does not adhere to the above policy, take responsibility for use of the device with due consideration for the security risks in the installation environment, etc.
• A warning is displayed if the set password goes against the recommended setting policy. When changing the password, click the [Back] button and set the password again.
• If you forget the account information that was set, use the switches for initialization of service switches to reset the user information used for connecting to the network. (→ page 16)

4. Completing registration of the initial account

After completing registration of the initial account, the following registration completed screen is displayed.
The live screen [Live] is automatically displayed after about 10 seconds elapse after the completed screen is displayed.
If the live screen [Live] is not displayed after 10 seconds elapse, manually move to the live screen [Live] by clicking the “please click here” link.

This completes the process of registering the initial account.

<NOTE>
• Network connection with AW-RP150 requires setup of an initial account. (→ page 26)
When an initial account is not set up, AW-RP150 can detect but cannot control this unit.

5. Display the live screen [Live].

The web screen appears.
The live screen [Live] (→ page 84) is displayed initially. You can switch to the web setup screen [Setup] (→ page 89) when necessary. (→ page 83)

<NOTE>
• Standby mode is the factory default setting, so switch to Power ON mode.
• If the personal computer does not have the plug-in viewer software already installed, an installation confirmation message is displayed before the live screen [Live] is displayed. In a case like this, follow the on-screen instructions to install the software.
  For details, refer to “Installing the plug-in viewer software” (→ page 26).
• Depending on the firewall settings on your personal computer, transmitted images may not be displayed. If this occurs, change the firewall settings and change the settings to permit communications with your web browser.
• When an attempt is made to display multiple IP images on one personal computer, IP videos may not be displayed depending on the performance of the personal computer concerned.
• A maximum of 14 users, including users receiving IP video, can access the unit simultaneously. However, the number of users that can access the unit may be restricted to less than 14 depending on the network communication bandwidth used by the unit. A message indicating the access limit will appear if the number of users exceeds 14. When [Transmission type] is set to [Multicast port] for [H.264] or [H.265], the second and subsequent users receiving H.264 or H.265 images will not be counted toward the total access count.
• When [H.264 transmission] (→ page 102) is set to [On], H.264 images are displayed. When it is set to [Off], JPEG images will be displayed. JPEG images can be displayed even when [H.264 transmission] is set to [On].
• The JPEG image frame rate may be slower depending on the network environment, performance of your personal computer, subject of the video, and access volume.

Displaying the web screen (continued)
Switching between the Live screen [Live] and Web setup screen [Setup]

When the live screen [Live] is displayed, click the [Setup] button at the top of the live screen [Live].
For details on the web setup screen [Setup], see “Web setup screen [Setup]” (→ page 89).

When the web setup screen [Setup] is displayed, click the [Live] button at the top of the web setup screen [Setup].
For details on the live screen [Live], see “Live screen [Live]” (→ page 84).

<NOTE>
• During Standby mode, the [Setup] button is disabled, and you cannot switch to the web setup screen [Setup].
• If the unit is switched to Standby mode from another terminal while the web setup screen [Setup] is displayed, the display will switch to the live screen [Live] after a few seconds.

Logging into the Web screen

When user authentication is enabled
When displaying the live screen [Live]
You need to enter account information for a user with Camera control or Administrator privileges.

When displaying the web setup screen [Setup]
You need to enter account information for a user with Administrator privileges.

When user authentication is disabled
When displaying the live screen [Live]
It is not necessary to enter account information.

When displaying the web setup screen [Setup]
You need to enter account information for a user with Administrator privileges.

<NOTE>
• The account input screen is displayed in a pop up screen from your web browser.
• Correctly enter the user name and password that has already been registered.
• It is recommended that the password be changed at regular intervals.
• During Standby mode, the [Setup] button is disabled, and you cannot switch to the web setup screen [Setup].
Web screen operations

Live screen [Live]
You can display images from the camera on a personal computer and perform camera operations, such as pan, tilt, zoom, and focus control. The items displayed on the screen will differ depending on whether the [H.264] or [JPEG] button is selected under [Compression].

When [H.264] is selected

Operation screen display buttons (for touch panels)
Displays screen with larger operation buttons for touch panels. For details, refer to “Displaying the web screen using a personal computer equipped with a touch panel” (→ page 141).

Expansion panel display button
(→ page 87, page 88)

When [JPEG] is selected

Operation screen display buttons (for touch panels)
Displays screen with larger operation buttons for touch panels. For details, refer to “Displaying the web screen using a personal computer equipped with a touch panel” (→ page 141).

Expansion panel display button
(→ page 87, page 88)
1. Menu switching [Stream Menu]/[Other Menu]
Switch between menu displays.
Clicking [Other Menu] when the Stream menu is displayed displays the Other menu.
Clicking [Stream Menu] when the Other menu is displayed displays the Stream menu.

2. Compression button [Compression]

<table>
<thead>
<tr>
<th>H.264</th>
<th>JPEG</th>
</tr>
</thead>
<tbody>
<tr>
<td>The [H.264] button turns gray, and H.264 images are displayed.</td>
<td>The [JPEG] button turns gray, and JPEG images are displayed.</td>
</tr>
</tbody>
</table>

<NOTE>
• In the following cases, the selection status of the [Compression] buttons will return to the setting configured in the [Video over IP] - [Initial display setting] - [Stream] (→ page 100).
- When returning from another screen
- When the screen is updated

3. Stream buttons [Stream]

When H.264 is selected
These buttons appear only when H.264 images are displayed.

<table>
<thead>
<tr>
<th>Button</th>
<th>Action</th>
</tr>
</thead>
<tbody>
<tr>
<td>[1]</td>
<td>When selected, the button turns gray, and the images in the main area appear according to the settings configured for [H.264(1)]. (→ page 102)</td>
</tr>
<tr>
<td>[2]</td>
<td>When selected, the button turns gray, and the images in the main area appear according to the settings configured for [H.264(2)]. (→ page 102)</td>
</tr>
<tr>
<td>[3]</td>
<td>When selected, the button turns gray, and the images in the main area appear according to the settings configured for [H.264(3)]. (→ page 102)</td>
</tr>
<tr>
<td>[4]</td>
<td>When selected, the button turns gray, and the images in the main area appear according to the settings configured for [H.264(4)]. (→ page 102)</td>
</tr>
</tbody>
</table>

<NOTE>
• In the following cases, the selection status of the [Stream] buttons will return to the setting configured in the [Video over IP] - [Initial display setting] - [Stream] (→ page 100).
- When returning from another screen
- When the screen is updated

4. OSD Menu Operation [OSD Menu]

<table>
<thead>
<tr>
<th>Button</th>
<th>Action</th>
</tr>
</thead>
<tbody>
<tr>
<td>[ON]</td>
<td>Use this to select whether the camera's on-screen displays are to be shown.</td>
</tr>
<tr>
<td>[OFF]</td>
<td>It cancels the selection of the setting which is being changed. It restores the pre-change setting.</td>
</tr>
<tr>
<td>[Cancel]</td>
<td>Use these to perform the menu operations. The items are selected using the [▲] [▼] [◄] [►] [OK] buttons.</td>
</tr>
<tr>
<td>[OK]</td>
<td>If a selected item has a sub menu, this sub menu is displayed by pressing the [OK] button.</td>
</tr>
<tr>
<td>When the cursor is moved to any item on the bottom-level setting screen and the [OK] button is pressed, the setting of the selected item starts flashing.</td>
<td></td>
</tr>
<tr>
<td>A setting for a regular menu item is reflected immediately if it is changed while it is still flashing. However, there are a number of menu items whose setting is reflected only after the [OK] button has been pressed, causing the setting to stop flashing and the new setting to be entered.</td>
<td></td>
</tr>
</tbody>
</table>

5. Color bar button [Color bar]

<table>
<thead>
<tr>
<th>Button</th>
<th>Action</th>
</tr>
</thead>
<tbody>
<tr>
<td>[ON]</td>
<td>Switch the color bar signal displayed or hide.</td>
</tr>
<tr>
<td>[OFF]</td>
<td>Switch the color bar displayed between Type1 and Type2. This is only enabled when [Color bar] is set to [ON].</td>
</tr>
</tbody>
</table>
6. Power ON button [Power ON]/Standby button [Standby]

<table>
<thead>
<tr>
<th>Power ON</th>
<th>Standby</th>
</tr>
</thead>
<tbody>
<tr>
<td>Turn the unit on.</td>
<td>Set the unit to Standby mode.</td>
</tr>
</tbody>
</table>

In the Standby mode, all the buttons on the live screen [Live] except for the [Power ON] button and [Standby] button are disabled.

**<NOTE>**
- If [Power ON] or [Standby] is selected too quickly, the status selected and the display shown may not correspond. In a case like this, follow the steps below to restore the correct status display:
  - **For Windows:**
    - Press the [F5] key on the keyboard of the personal computer.
  - **For Mac:**
    - Press the [Command] + [R] keys on the keyboard of the personal computer.
- **When operation is transferred to the Standby mode:**
  - The current Pan/Tilt/Zoom positions are stored. When [Standby] is selected in the [Power ON Position] menu, the information about the stored positions is used.
- **When operation is transferred to the Power ON mode:**
  - Pan/Tilt/Zoom are moved to the positions selected in the [Power ON Position] menu.

7. Operation lock button [Lock]

<table>
<thead>
<tr>
<th>Lock(WEB)</th>
<th>Lock(CAM)</th>
</tr>
</thead>
<tbody>
<tr>
<td>This prevents erroneous operation by locking operations such as pan/tilt, zoom, focus, iris, gain, white balance, shutter, ND filter, and preset in the live screen [Live]. The button turns red while locked, and the lock is released when the button is clicked again.</td>
<td>This is displayed when the unit is locked with the camera lock function on a Panasonic controller (AW-RP150), and you can unlock the camera by clicking this.</td>
</tr>
</tbody>
</table>

**<NOTE>**
- When locked using a [Lock(WEB)] function, the status is maintained by the web browser, so the lock is released by redisplaying the web browser.
- The lock status using the [Lock(CAM)] function is maintained by the camera itself, so you need to either release the camera lock function using a Panasonic controller (AW-RP150) or release [Lock(CAM)] from the web browser while the camera is locked.
- It is not possible to enable the [Lock(CAM)] function from the web browser.

---

8. Main area (IP video display area)

The IP video of the connected camera will be displayed. When the tally lamp of the camera is on, a red and a green lines are displayed at the top of the videos. A red line is displayed when receiving the red tally signal and a green line is displayed when receiving the green tally signal. When the tally lamp is off, the display area will return to normal. When you click inside the area, the camera moves so the clicked position becomes the center of the area. Operating the mouse wheel inside the display area allows you to use the plug-in viewer software’s digital zoom.

**<NOTE>**
- When the shooting scenes vary significantly, restrictions imposed by the graphics processing (GDI) of the operating system installed may give rise to a phenomenon called “screen tearing” (where parts of the picture are not displayed in synchronization) although this will depend on the personal computer used.
- On Windows Internet Explorer 11, if [H.264 transmission] (→ page 102) is set to [On], H.264 images can be displayed.
- On browsers other than Windows Internet Explorer 11, regardless of the [H.264 transmission] settings, only JPEG images can be displayed. (H.264 images will not appear.)
- The speed at which the JPEG images are refreshed may be reduced depending on the network environment, performance of the personal computer used, subjects and number of access users.
- A total of 14 users, including users receiving IP video, can access the unit simultaneously. However, when the IP video transmission bandwidth reaches its upper limit, access may be restricted to less than 14 users.
- When [Disable] is selected for [Tally] (→ page 65, page 97), the camera’s tally lamp will not light even when the tally signal is input. However, a red and a green lines are displayed at the top of the main area (IP video display area).
- The camera may not move so the clicked position becomes the center of the area when you click inside the area within a tilt range of ±15° of the vertical of the unit.
- When [IP(UDP)] of [Tracking Data Output] is set to [On], video transmission via IP may be delayed or the video may suffer frame loss. (→ page 120)
We recommend setting [IP(UDP)] of [Tracking Data Output] to [Off] to avoid the delay or frame loss due to the video transmission via IP.
9. Zoom [Zoom]

[T]: Use this to adjust the zoom (magnification) in the “Tele” direction.
[W]: Use this to adjust the zoom (magnification) in the “Wide” direction.

The optical zoom position is displayed in the center as a value.
Value range: 000 (Wide end) to 999 (optical Tele end)

**Display button for PTZ expansion panel**
The [D-Zoom], [D-Ext.(×1.4)], [D-Ext.(×2.0)], and [×1.0] buttons for zoom and [O.T.AF] and [Touch AF] buttons for focus (→ page 87) are displayed.
The display changes to [-] while these are displayed, and they stop being displayed when this is pressed again.

- Use this to adjust the zoom (magnification) to 1.0x.
- Use this to enable or disable digital extender x1.4.
- Use this to enable or disable digital extender x2.0.
- Use this to enable or disable the digital zoom.

**<NOTE>**
- The values indicating the optical zoom position do not change while zoom is still being operated within the digital zoom region.
- When digital zoom is enabled, it is possible to zoom in with the digital zoom by clicking the [T] button, even if the optical zoom position is optical Tele end 999.
- The [D-Zoom], [D-Ext.(×1.4)], [D-Ext.(×2.0)] and [×1.0] buttons are not displayed immediately after the live screen [Live] is displayed. They are displayed when the [Display button for PTZ expansion panel] is pressed.

10. Focus [Focus]

[Far]: Use this to adjust the focus in the “Far” direction. It does not work during automatic adjustments.
[Near]: Use this to adjust the focus in the “Near” direction. It does not work during automatic adjustments.
The focal distance is displayed in the center as a value.
Value range: 00 (Near) to 99 (Far)

- Use this to switch between auto and manual focusing. When Auto is selected, the focus is adjusted automatically.
- When this is pressed while the focus is being adjusted manually, the focus will be adjusted automatically only once.
- It does not work during automatic adjustments.
- It is displayed when the [Display button for PTZ expansion panel] (→ page 87) is pressed.

**<NOTE>**
- The [O.T.AF] and [Touch AF] buttons are not displayed immediately after the live screen [Live] is displayed. They are displayed when the [Display button for PTZ expansion panel] is pressed.

11. Control pad and its buttons

To adjust the image in the horizontal or vertical direction (panning or tilting), left-click the pad and the buttons.
It is possible to operate with the central grid pattern in the dragged state, with the speed of the pan/tilt increasing as it approaches the outside of the pad.

**Display button for preset expansion panel**
The [SET] and [DEL] buttons for presetting are displayed.
The display changes to [-] while these are displayed, and they stop being displayed when this is pressed again.

- Use this to switch the iris adjustment between auto and manual. When Auto is selected, the picture brightness is adjusted automatically.

12. Brightness [Iris]

[+]: Operates in stages in the direction of iris opening. It does not work during automatic adjustments.
[-]: Operates in stages in the direction of iris closing. It does not work during automatic adjustments.
The F value is displayed in the center.

- Use this to switch the iris adjustment between auto and manual. When Auto is selected, the iris brightness is adjusted automatically.

13. Speed [Speed]

- Use this to select the speed at which the pan, tilt, zoom, and focus operations are to be performed.
The speed of pan/tilt operation is reflected in control pad operations. It is not reflected in grip button operations.

14. Preset [Preset]

When a preset thumbnail is clicked, the camera moves to face towards a preset position that was registered beforehand.
You can select Home and Preset1 to Preset100. Preset names are displayed in green when they have had a preset position registered in them.

- Use this to select a preset name and change the display name.
- You can enter between 1 to 15 characters. The characters available are 0 to 9, A to Z, a to z, spaces, and underscores (_).

**Switches the page of the displayed preset thumbnails.**

- Move to home position.

**Display button for preset expansion panel**
The [SET] and [DEL] buttons for presetting are displayed.
The display changes to [-] while these are displayed, and they stop being displayed when this is pressed again.

- The unit moves to the preset registration mode. When a preset thumbnail is clicked in the preset registration mode, it is registered in the preset position specified by the current condition.
- The unit moves to the preset delete mode. When a preset thumbnail is clicked in the preset delete mode, the specified preset position settings are deleted.

**<NOTE>**
- If the [Preset Thumbnail Update] menu is [Off] when registering presets, the previously registered preset thumbnail is maintained.
- If the [Preset Name] menu is [Reset] when registering presets, the previously registered preset name is reset.
- The [SET] and [DEL] buttons are not displayed immediately after the live screen [Live] is displayed. They are displayed when the [Display button for preset expansion panel] is pressed.
Web screen operations (continued)

15. Scene [Scene]

- Click Scene1-Scene4 to switch the shooting mode.
- Display button for scene expansion panel

- The [Scene1], [Scene2], [Scene3], and [Scene4] buttons for scene files are displayed. The display changes to [–] while these are displayed, and they stop being displayed when this is pressed again.

<NOTE>
- The [Scene1], [Scene2], [Scene3], and [Scene4] buttons are not displayed immediately after the live screen [Live] is displayed. They are displayed when the [Display button for scene expansion panel] is pressed.

16. Full-screen display button

- Display the image in full-screen mode.
- To return to the live screen [Live], press the [Esc] key on the personal computer while the image is displayed in full-screen mode.
- The aspect ratio of the displayed image will be adjusted according to the monitor size.

17. Snapshot button

- Capture a snapshot (single still image), and display it in a separate window.

<NOTE>
- The following settings may be necessary.
- In the Internet Explorer menu bar, click [Tools] - [Internet Options] - [Security] tab, select [Trusted Sites], and then click [Sites]. Register the camera’s address under [Websites] in the window that appears.
- Depending on the network environment, for example, if snapshot capture takes longer than a certain amount of time, the image may not appear.
- If [JPEG transmission(1)] - [JPEG transmission(3)] are all set to [Off], the image captured with the snapshot button will be black.

18. Camera title display area

19. Gain [Gain]

- Increase the gain of the images.
- Decrease the gain of the images.

<NOTE>
- The current setting is displayed in the middle of the button.

20. White balance [WB]

- Switch the white balance in the order [AWB A], [AWB B], [3200K], [5600K], [VAR], [ATW].
- Switch the white balance in the order [AWB A], [ATW], [VAR], [5600K], [3200K], [AWB B].
- Automatic white balance (AWB) is executed and the white balance is reset.
- Automatic black balance (ABB) is executed and the black balance is reset.

<NOTE>
- The current setting is displayed in the middle of the button.

21. Shutter [Shutter]

- Switch the shutter mode in the order [Off], [Step], [Synchro], [ELC].
- Switch the shutter mode in the order [ELC], [Synchro], [Step], [Off].

<NOTE>
- The current setting is displayed in the middle of the button.

22. ND filter [ND]

- Switch the transmittance of the ND filter in the order [Through], [1/4 ND], [1/16 ND], [1/64 ND].
- Switch the transmittance of the ND filter in the order [1/64 ND], [1/16 ND], [1/4 ND], [Through].

<NOTE>
- The current setting is displayed in the middle of the button.
- ND filter switching is not possible in night mode.

23. RTMP Streaming

- Streaming transmission starts to the RTMP/RTMPS server that was pre-registered.
- The button turns red during transmission, and transmission stops when the button is clicked again.

<NOTE>
- This button can be used only when [Streaming mode] is [RTMP].

24. Button for switching the personal computer screen

- Display the screen for mobile terminals.
- For details, refer to "Displaying the web screen using a mobile terminal" (→ page 143).

<NOTE>
- This button is displayed only when displaying on a mobile terminal.

25. Preset thumbnail list display button

- Display a list of Preset thumbnails on the live screen [Live].

26. Button for switching real time updating

- Frame dropping in images may be observed depending on the operating performance of the personal computer running the web browser. You can improve this problem by pressing this button to disable the real time updating function.
- Data items subject to real time updating are as follows.
  - Zoom
  - Focus
  - Iris
  - Gain
  - WB
  - Shutter
  - ND

<NOTE>
- The middle-click function is disabled if the button is enabled.
Web screen configurations

Web setup screen [Setup]
The settings for the unit are selected on this screen.

<NOTE>
• The setting menu operations can be performed only by users whose access level is "1.Administrator".
  For the procedure used to set the access level, refer to page 122.
• If the value of a setting is changed using the OSD menu or a different web browser, the setting value and the displayed value may not match. In that case, update the setup menu display screen of that web browser.

1. Setting status [Setting status]
The setting status screen [Setting status] is displayed when the button is clicked.
→ “Setting status screen [Setting status]” (→ page 90)

2. Basic settings [Basic]
System button [System]
The system screen [System] is displayed when the button is clicked.
→ “System screen [System]” (→ page 91)
Date&Time button [Date&Time]
The Date & time screen [Date&Time] is displayed when the button is clicked.
→ “Date & time screen [Date&Time]” (→ page 98)
Live page button [Live page]
The live page screen [Live page] is displayed when the button is clicked.
→ “Live page screen [Live page]” (→ page 99)

3. Image screen [Image/Audio]
IP video settings button [Video over IP]
The IP video settings screen [Video over IP] is displayed when the button is clicked.
→ “IP video settings screen [Video over IP]” (→ page 99)
Audio button [Audio]
The audio setting screen [Audio] is displayed when the button is clicked.
→ “Audio setting screen [Audio]” (→ page 107)
Image adjust button [Image adjust]
The image adjust screen [Image adjust] is displayed when the button is clicked.
→ “Image adjust screen [Image adjust]” (→ page 108)
Lens button [Lens]
The Lens setting screen [Lens] is displayed when the button is clicked.
→ “Lens setting screen [Lens]” (→ page 115)
UHD crop button [UHD Crop]
The UHD crop setting screen [UHD Crop] is displayed when the button is clicked.
→ “UHD crop setting screen [UHD Crop]” (→ page 116)
Preset position button [Preset position]
The preset position screen [Preset position] is displayed when the button is clicked.
→ “Preset position screen [Preset position]” (→ page 117)
4. Collaboration capability [Linkage]
   Tracking data output setting button [Tracking Data Output]
   The tracking data output setting screen [Tracking Data Output] is
displayed when the button is clicked.
   → “Tracking data output settings screen [Tracking Data Output]”
   (→ page 120)

5. User management settings [User mng.]
   User authentication button [User auth.]
   The user authentication screen [User auth.] is displayed when the
button is clicked.
   → “User authentication screen [User auth.]” (→ page 122)

   Host authentication button [Host auth.]
   The host authentication screen [Host auth.] is displayed when the
button is clicked.
   → “Host authentication screen [Host auth.]” (→ page 123)

6. Network settings [Network]
   Network setup button [Network]
   The network setup screen [Network] is displayed when the button is
clicked.
   → “Network setup screen [Network]” (→ page 124)

   Advanced network setting button [Advanced]
   The advanced network setting screen [Advanced] is displayed when
the button is clicked.
   → “Advanced network setting screen [Advanced]” (→ page 127)

7. Maintenance [Maintenance]
   System log button [System log]
   The system log screen [System log] is displayed when the button is
clicked.
   → “System log screen [System log]” (→ page 137)

   Product information button [Product Info.]
   The product information screen [Product info.] is displayed when the
button is clicked.
   → “Product information screen [Product info.]” (→ page 138)

   Reset settings button [Default reset]
   The reset settings screen [Default reset] is displayed when the button is
clicked.
   → “Reset settings screen [Default reset]” (→ page 139)

   Back up button [Backup]
   The back up screen [Backup] is displayed when the button is clicked.
   → “Back up screen [Backup]” (→ page 140)

8. Power ON button [Power ON]/Standby button [Standby]

<table>
<thead>
<tr>
<th>Power ON</th>
<th>Turn the unit on.</th>
</tr>
</thead>
<tbody>
<tr>
<td>Standby</td>
<td>Set the unit to Standby mode.</td>
</tr>
</tbody>
</table>

   When you enter Standby mode, the display will automatically switch
to the live screen [Live]. In addition, the [Setup] button in the live
screen [Live] will be disabled, and you cannot operate the web setup
screen [Setup].

9. Main area
   The menu screen is displayed.
**Basic screen [Basic]**

- **System screen [System]**

  - **System status**
    - **Frequency**
      - The frame frequency setting is displayed.
    - **Format**
      - The video format setting is displayed.
    - **Shooting Mode**
      - The shooting mode setting is displayed.
    - **Color Setting**
      - Displays the color (gamma and gamut) setting for the system as a whole.
    - **Genlock**
      - **Horizontal Phase**
        - The horizontal phase setting during genlock is displayed.
    - **Wireless Control**
      - The wireless remote control setting is displayed.
    - **Fan**
      - **Fan1**
        - The setting for the cooling fan near the lens is displayed.
      - **Fan2**
        - The setting for the cooling fan near the pan-tilt head is displayed.
    - **Output**
      - **12G SDI/OPTICAL**
        - The output setting for the 12G SDI OUT connector <12G SDI OUT> is displayed.
      - **3G SDI**
        - The output setting for the 3G SDI OUT connector <3G SDI OUT> is displayed.
      - **MONI**
        - The output setting for the MONITOR OUT connector <MONI OUT> is displayed.
      - **HDMI**
        - The output setting for the HDMI connector <HDMI> is displayed.

**Pan/Tilt**

- **Install Position**
  - The install position setting is displayed.
- **Smart Picture Flip**
  - The smart picture flip setting is displayed.
- **P/T Speed Mode**
  - The P/T speed mode setting is displayed.
- **Speed With Zoom Position**
  - The settings for the function to adjust the speed of pan/tilt adjustment are displayed in conjunction with the zoom magnification.
- **Focus Adjust With PTZ**
  - The settings for the function to compensate for poor focus when using pan/tilt/zoom are displayed.

**Frequency**

- **Frequency [59.94Hz, 50Hz, 24Hz, 23.98Hz]**
  - This item is selected to switch the frame frequency.
  - The setting is confirmed with the [Set] button.
  - **Factory settings**: 59.94Hz (AW-UE150WP/AW-UE150KP), 50Hz (AW-UE150WE/AW-UE150KE)

  - **<NOTE>**
    - When the frame frequency is switched, the unit automatically restarts.

**Format**

- **Format [2160/59.94p, 2160/29.97p, 1080/59.94p, 1080/29.97p, 720/59.94p]**
  - The video format is changed on this screen.
  - The setting is confirmed with the [Set] button.

  - **<NOTE>**
    - It denotes “1080/23.98p over 59.94i”.

    - **In order to select [H.264(UHD)], [H.265(UHD)], and [JPEG(UHD)] in [Streaming mode] for [Video over IP], you need to select the 4K format here.**

---

**Web screen configurations (continued)**
Shooting Mode

Select the shooting mode according to the shooting environment. The setting is confirmed with the [Set] button.

<table>
<thead>
<tr>
<th>Mode</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Normal</td>
<td>Select when shooting in an environment with a normal level of brightness.</td>
</tr>
<tr>
<td>High Sens.</td>
<td>Select high sensitivity shooting. (Suited to shooting in a dark environment)</td>
</tr>
</tbody>
</table>

Factory settings: Normal

Color Setting

Set the color (gamma and gamut) for the system as a whole. The setting is confirmed with the [Set] button.

<table>
<thead>
<tr>
<th>Setting</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Normal</td>
<td>This setting allows detailed picture quality adjustments on the camera.</td>
</tr>
<tr>
<td>V-Log</td>
<td>Set a gamma curve that provides tones and a wide range of latitude (exposure range).</td>
</tr>
</tbody>
</table>

Factory settings: Normal

<NOTE>
- Functions to adjust picture quality are limited when [Color Setting] is [V-Log]. Grading will be necessary after shooting.

Genlock

This item is selected to perform the phase adjustments. This item’s setting is reflected immediately.

<table>
<thead>
<tr>
<th>Setting</th>
<th>Description</th>

</table>

Factory settings: HDR(2020)

<NOTE>
- [HDR Output Select] cannot be changed when [Gamma Mode] is other than [HLG] and [Color Setting] is other than [Normal].
  
  (→ page 92, page 113)
V-Log Output Select [V-Log, V-709]
Select the signal to be output when [Color Setting] is [V-Log].

**V-Log**
Output with a gamma curve that has a wide range of tones and latitude (exposure range).

**V-709**
Converted for output to images suited to previewing.

Factory settings: V-Log

<NOTE>
- [V-Log Output Select] cannot be changed when [Color Setting] is not [V-Log]. (→ page 92)

3G SDI Out [LevelA, LevelB]
When [Format] (3G SDI) is [1080/59.94p] or [1080/50p], select the format for outputting 3G SDI signals.

**LevelA** Level A format

**LevelB** Level B format

Factory settings: LevelA

<NOTE>
- [3G SDI Out] cannot be changed if [Format] (3G SDI) is other than [1080/59.94p] or [1080/50p].

HDR Output Select [SDR, HDR(2020), HDR(709)]
Select the signal to be output when [Gamma Mode] is [HLG].

**SDR**
SDR output

**HDR(2020)**
HDR output (BT.2020 equivalent color gamut)

**HDR(709)**
HDR output (BT.709 equivalent color gamut)

Factory settings: SDR

<NOTE>
- [HDR Output Select] cannot be changed when [Gamma Mode] is other than [HLG] and [Color Setting] is other than [Normal]. (→ page 92, page 113)

V-Log Output Select [V-Log, V-709]
Select the signal to be output when [Color Setting] is [V-Log].

**V-Log**
Output with a gamma curve that has a wide range of tones and latitude (exposure range).

**V-709**
Converted for output to images suited to previewing.

Factory settings: V-Log

<NOTE>
- [V-Log Output Select] cannot be changed when [Color Setting] is not [V-Log]. (→ page 92)

---

**MONI**
Make the settings for output from the MONITOR OUT connector <MONI OUT>.

**Format**
Set the output format.
The following format settings are possible depending on the [Format] setting in the [System] screen.

<table>
<thead>
<tr>
<th>Frequency</th>
<th>System Format</th>

<tr>
<td></td>
<td>1080/23.98p</td>
<td>1080/23.98p</td>
</tr>
</tbody>
</table>

*1 It denotes “1080/23.98p over 59.94i”.
*2 When [Crop Mode] is [Crop(720)], output is 720/59.94p.
*3 It denotes “1080/23.98p over 59.94p”.
*4 When [Crop Mode] is [Crop(720)], output is 720/50p.

**Factory settings:**
- 2160/59.94p (AW-UE150WP/AW-UE150KP)
- 2160/50p (AW-UE150WE/AW-UE150KE)
- HDR Output Select [SDR, HDR(2020), HDR(709)]
  - Select the signal to be output when [Gamma Mode] is [HLG].
- HDR(2020) HDR output (BT.2020 equivalent color gamut)
- HDR(709) HDR output (BT.709 equivalent color gamut)

**Factory settings:**
- HDR(2020)

* NOTE
- Other than when [Gamma Mode] is [HLG], [Color Setting] is [Normal], and [Video Sampling] is [4:2:2/10bit], [HDR Output Select] cannot be changed. (→ page 92, page 113)

**V-Log Output Select [V-Log, V-709]**
Select the signal to be output when [Color Setting] is [V-Log].

| V-Log | Output with a gamma curve that has a wide range of tones and latitude (exposure range). |
| V-709 | Converted for output to images suited to previewing. |

**Factory settings:**
- V-Log

* NOTE
- [V-Log Output Select] cannot be changed when [Color Setting] is not [V-Log]. (→ page 92)

**Video Sampling [4:2:2/10bit, 4:2:0/8bit]**
When [Format] in [HDMI] is [2160/59.94p] or [2160/50p], select the video sampling output from the HDMI connector.

| 4:2:2/10bit | Output in 4:2:2/10bit mode. |
| 4:2:0/8bit | Output in 4:2:0/8bit mode. |

**Factory settings:**
- 4:2:2/10bit

* NOTE
- When [Format] in [HDMI] is other than [2160/59.94p] or [2160/50p], [Video Sampling] cannot be changed and is fixed at [4:2:2/10bit].

**Bar [Camera, Colorbar]**
Switch between camera images and color bars.

| Camera | Camera images |
| Colorbar | Color bar |

**Factory settings:**
- Camera

**Color Bar Type [Type1, Type2]**
Select the type of color bar to display.

Type1: Type2: This is only enabled when [Bar] is set to [Colorbar].

**Factory settings:**
- Type2

* NOTE
- Even if the [HDR Output Select] for each of the outputs is either [HDR(2020)] or [HDR(709)], the color bar for SDR is output.

**Tone [Off, Low, Normal]**
Make the settings for the test tone signal (1 kHz) output while the color bar is displayed.

<table>
<thead>
<tr>
<th>Tone</th>
<th>Test tone is not output.</th>
</tr>
</thead>
<tbody>
<tr>
<td>Off</td>
<td>Test tone is output at low volume.</td>
</tr>
<tr>
<td>Low</td>
<td>Test tone is output at normal volume.</td>
</tr>
</tbody>
</table>

This is only enabled when [Bar] is set to [Colorbar].

**Factory settings:**
- Normal

**OSD Mix**
Select whether to turn off/on camera menu, status, and other displays for each output image.

<table>
<thead>
<tr>
<th></th>
<th></th>
<th></th>
<th></th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td>Off</td>
<td>The camera menus and statuses are not displayed on the output pictures covered by the setting items listed above.</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>On</td>
<td>The camera menus and statuses are displayed for the output pictures covered by the setting items listed above.</td>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

* : Factory settings

* NOTE
- When this is set to [Off], the camera menu can be displayed for about 1 minute after the unit is turned on.
OSD Off With R-Tally [Off, On]
Off or on the function that turns off camera menu, status, and other displays when red tally signals are received via commands or contacts.
When the red tally signal releases, the camera menu display will return.
Factory settings: Off

OSD Status [Off, On]
Turn the status display during AWB and ABB off/on, or error display when an error occurs.
Factory settings: Off

Tally [Disable, Enable]
[Disable] or [Enable] is set here for the function which turns on or turns off the tally lamp using the tally control signal.
Factory settings: Enable

Tally Brightness [Low, Mid, High]
Adjust the brightness of the tally LED.
Factory settings: Low

Status Lamp [Disable, Enable]
[Disable] or [Enable] is set here for the status display lamp.
When you want the status display lamp to stay off while this unit is in operation, set to [Disable].
Factory settings: Enable

<NOTE>
- Even when set to [Disable], the status display lamp may light up when this unit is starting up, updating firmware, or trouble is occurring.

External Output
Select the signal type output from the External Output signal lines (Output1, Output2) of the RS-422 connector. (→ page 16)

Output1 [Off*, R-Tally, G-Tally]
Output2 [Off*, R-Tally, G-Tally]

Output1
Off Signal is not output.
R-Tally The reception status of the red tally signal is output.
G-Tally The reception status of the green tally signal is output.

Output2
Off Signal is not output.
R-Tally The reception status of the red tally signal is output.
G-Tally The reception status of the green tally signal is output.

*: Factory settings

Smart Picture Flip
Mode [Off, Auto]
When the tilt becomes the angle set for [Flip Detect Angle], the image will be flipped in the vertical direction automatically.

Factory settings: Off

Flip Detect Angle [60deg to 120deg]
Set the tilt angle at which the image will be flipped in the vertical direction automatically when [Smart Picture Flip] is set to [Auto].
Factory settings: 90deg

PT/T Speed Mode [Normal, Fast]
Set the speed of pan/tilt operation.

Factory settings: Normal

<NOTE>
- The pan/tilt operation noise may increase when [Fast] is selected.
- Even when [Fast] is selected, the pan/tilt speed during preset playback will be the same speed as when [Normal] is selected.
Speed With Zoom Position [Off, On]
[Off] or [On] is set here for the function used to adjust the pan-tilt
adjustment speed in conjunction with the zoom magnification.
When [On] is set, the panning and tilting operations will become
slower in the zoom status.
This function has no effect during preset operations.
Factory settings: On

Focus Adjust With PTZ. [Off, On]
[Off] or [On] is set here for the function which compensates for out-of-
focusing when it occurs during panning, tilting or zooming operations.
When [Off] is set, adjust the focus as required after zooming or set
[Focus Mode] to [Auto].
This is only enabled when [Manual] has been selected as the [Focus
Mode] setting.
Factory settings: Off

Power On Position [None, Standby, Home, Preset]
Select the initial positions for Pan/Tilt/Zoom when the power is turned
on.

<table>
<thead>
<tr>
<th>Option</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>None</td>
<td>Keep the positions of Pan/Tilt when the power was</td>
</tr>
<tr>
<td></td>
<td>last on, with Zoom being at the Wide end.</td>
</tr>
<tr>
<td>Standby</td>
<td>Move to the Pan/Tilt/Zoom positions they were in</td>
</tr>
<tr>
<td></td>
<td>the last time the camera was switched to Standby</td>
</tr>
<tr>
<td>Home</td>
<td>Pan/Tilt move to their home positions (front) and</td>
</tr>
<tr>
<td></td>
<td>Zoom goes to the Wide end.</td>
</tr>
<tr>
<td>Preset</td>
<td>Preset playback is performed at the preset position</td>
</tr>
<tr>
<td></td>
<td>specified with [Preset Number].</td>
</tr>
</tbody>
</table>

Factory settings: None

Preset Number [Preset001 to Preset100]
Specify a number for preset playback when the power turns ON when
[Preset] is set in [Power On Position].
Factory settings: Preset001

<NOTE>
• If an unregistered preset number is set, preset playback is not
performed and the operation is the same as [None].

Date & time screen [Date&Time]
Make clock settings.
You can set using one of three types [PC Synchronization], [NTP], or
[Manual].

Auto
PC Synchronization
If you click the [Execute] button, the settings are configured by
synchronizing the unit to the date and time of the connected personal
computer.

<NOTE>
• The time zone of the personal computer is not reflected on the unit.
Set the time zone on the unit.

NTP
If you click “NTP>>”, the settings screen for the NTP server appears.
(→ page 128)

Manual
Date/Time
Configure the settings for the month, day, and year and for the hour,
minute, and second.

<NOTE>
• The time is in the 24-hour format.

Time Zone
Selects the time zone according to the region where the camera is
being used.
Factory settings:
(GMT) Greenwich Mean Time: Dublin, Edinburgh, Lisbon, London
Live page screen [Live page]

Camera title
Input the name of the camera here. When the [Set] button is clicked, the input name appears in the camera title display area.
- The factory default setting is the model number of the unit.
- You can enter between 0 to 20 characters.
- The following characters can be displayed.

<table>
<thead>
<tr>
<th>Numeric characters</th>
<th>0123456789</th>
</tr>
</thead>
<tbody>
<tr>
<td>Alphabetical characters (upper and lower cases)</td>
<td>ABCDEFGHIJKLMNOPQRSTUVWXYZ abedefghijklmnopqrstuvwxyz</td>
</tr>
<tr>
<td>Symbols</td>
<td>! # $ % ' () * + - ,./:;&lt;=&gt;? @ [ ] ^ _ ` {</td>
</tr>
</tbody>
</table>

Automatic installation of viewer software [On, Off]
Windows I.E.11
One of the following settings is selected for the automatic installation of the plug-in viewer software.
Factory settings: On

Smoother live video display on the browser (buffering) [On, Off]  Windows I.E.11
Configure settings for displaying images from the unit on the plug-in viewer software.

| On | Temporarily store images from the unit onto the personal computer for smoother display. However, the screen display images will be displayed later than the actual images. |
| Off | Do not temporarily store images from the unit onto the personal computer, and display them in real time. However, the motion of the screen display images may not be smooth. |

Factory settings: On

Image screen [Image/Audio]

IP video settings screen [Video over IP]
The JPEG image and H.264 image settings as well as the settings related to image quality are selected on this screen.

<NOTE>
- IP control can be performed but if you do not want to perform IP image transmission, set [JPEG transmission], [H.264 transmission] and [Audio transmission] to [Off].
- When JPEG image transmission is set to [Off], IP images are not displayed in browsers other than Windows Internet Explorer 11. This includes mobile terminals.

Setting status

Streaming mode
The streaming mode setting is displayed.

Initial display setting
The setting for the image displayed when the live screen [Live] is open.

JPEG
The JPEG transmission settings are displayed.

H.264
The H.264 transmission settings are displayed. These are not displayed when the [Streaming mode] is [H.265(UHD)].

H.265
The H.265 transmission setting is displayed. These are only displayed when the [Streaming mode] is [H.265(UHD)].
Streaming mode

It is possible to perform IP transmission operations suited to the application by switching the [Streaming mode] on this unit. The setting is confirmed with the [Set] button.

Mode [H.264(UHD), H.264, H.265(UHD), JPEG(UHD), RTMP, NDI|HX]

- **H.264(UHD)**: IP videos can be transmitted over multiple channels. 4K images are transmitted via IP in the H.264 format. • 4K images in H.264 format cannot be displayed in the live screen [Live] of the unit. Use external devices and software compatible with 4K images to display 4K images.
- **H.264**: IP videos can be transmitted over multiple channels. Full HD H.264 images are transmitted via IP.
- **H.265(UHD)**: IP videos can be transmitted over multiple channels. 4K images are transmitted via IP in the H.265 format. • 4K images in H.265 format cannot be displayed in the live screen [Live] of the unit. Use external devices and software compatible with 4K images to display 4K images.
- **JPEG(UHD)**: IP videos can be transmitted over multiple channels. 4K images are transmitted via IP in the JPEG format.
- **RTMP**: H.264 format is transmitted via IP to the RTMP/RTMPS server.
- **NDI|HX**: Videos are sent to software applications and hardware compatible with NewTek NDI|HX over a network.

Factory settings: H.264

**<NOTE>**
- When [IP(UDP)] of [Tracking Data Output] is set to [On], video transmission via IP may be delayed or the video may suffer frame loss. (→ page 120)
  
  We recommend setting [IP(UDP)] of [Tracking Data Output] to [Off] to avoid the delay or frame loss due to the video transmission via IP.

Initial display setting

Set initial display settings for the Live screen [Live]. The setting is confirmed with the [Set] button.

Stream [H.264(1), H.264(2), H.264(3), H.264(4), JPEG(1), JPEG(2), JPEG(3)]

Select the type of images to display in the Live screen [Live].

<table>
<thead>
<tr>
<th>Stream</th>
<th>Setting</th>
<th>Display Type</th>
</tr>
</thead>
<tbody>
<tr>
<td>H.264(1)</td>
<td>Windows 10</td>
<td>Display videos</td>
</tr>
<tr>
<td>H.264(2)</td>
<td>Windows 10</td>
<td>Display videos</td>

</tbody>
</table>

Factory settings: H.264(1)

**<NOTE>**
- This setting may switch automatically according to the [Streaming mode].
## JPEG Image Settings

Set JPEG image settings. The setting is confirmed with the [Set] button. There are a total of 3 channels available for JPEG image setting.

### JPEG Transmission [On, Off]
Set whether to transmit JPEG images.

**Factory settings:** On

### Image Capture Size
When displaying JPEG images, select the resolution for image display from the following.

<table>
<thead>
<tr>
<th>JPEG(1)</th>
<th>JPEG(2)</th>
<th>JPEG(3)</th>
</tr>
</thead>
<tbody>
<tr>
<td>3840×2160, 1920×1080, 1280×720, 640×360, 320×180</td>
<td>640×360, 320×180</td>
<td>640×360, 320×180</td>
</tr>
</tbody>
</table>

**Factory settings:**
- JPEG(1): 1280×720
- JPEG(2): 640×360
- JPEG(3): 320×180

<NOTE>
- [JPEG(2)] and [JPEG(3)] cannot be set when the [Streaming mode] is [JPEG(UHD)] or [NDI|HX].

### Refresh Interval [1fps, 4fps, 5fps, 12fps, 12.5fps, 15fps, 24fps, 25fps, 30fps]
Select the frame rate for JPEG images.

| 59.94Hz | 1fps/5fps/15fps/30fps |
| 50Hz    | 1fps/5fps/12.5fps/25fps |
| 24/23.98Hz | 1fps/4fps/12fps/24fps |

**Factory settings:**
- For 59.94Hz:
  - JPEG(1): 30fps
  - JPEG(2): 5fps
  - JPEG(3): 30fps
- For 50Hz:
  - JPEG(1): 25fps
  - JPEG(2): 5fps
  - JPEG(3): 25fps
- For 24/23.98Hz:
  - JPEG(1): 24fps
  - JPEG(2): 4fps
  - JPEG(3): 24fps

<NOTE>
- The frame rate may be slower depending on the network environment, resolution, image quality, access volume, etc.
- If images are not transmitted at the specified frame rate, lowering the resolution or image quality may result in transmissions closer to the specified value.

### Image Quality [Fine, Normal]
Specify the JPEG image quality for each resolution.

**Factory settings:** Fine

<NOTE>
- [3840×2160] can be selected when the [Streaming mode] is [JPEG(UHD)].
### H.264
Set H.264 image settings. The setting is confirmed with the [Set] button.

<table>
<thead>
<tr>
<th>H.264(1)</th>
<th>H.264(2)</th>
<th>H.264(3)</th>
<th>H.264(4)</th>
</tr>
</thead>
<tbody>
<tr>
<td>3840×2160, 1920×1080, 1280×720, 640×360, 320×180</td>
<td>1920×1080, 1280×720, 640×360, 320×180</td>
<td>1280×720, 640×360, 320×180</td>
<td>1280×720, 640×360, 320×180</td>
</tr>
</tbody>
</table>

- **Internet mode(Over HTTP)**: [On, Off]
  - This setting is selected when transmitting H.264 images over the Internet.
- **Frame rate**:
  - **Constant bit rate**: Transmits H.264 images at the bit rate specified in [Max bit rate(per client)].
  - **Frame rate**: Transmits H.264 images at the frame rate specified in [Frame rate].
  - **Best effort**: Transmits H.264 images at a variable bit rate between the maximum and minimum specified in [Max bit rate(per client)], according to the network bandwidth.

#### Image capture size
- Selectable options will vary depending on the selected resolution setting.

<table>
<thead>
<tr>
<th>H.264(1)</th>
<th>H.264(2)</th>
<th>H.264(3)</th>
<th>H.264(4)</th>
</tr>
</thead>
<tbody>
<tr>
<td>1920×1080, 1280×720, 640×360, 320×180</td>
<td>1920×1080, 1280×720, 640×360, 320×180</td>
<td>1280×720, 640×360, 320×180</td>
<td>1280×720, 640×360, 320×180</td>
</tr>
</tbody>
</table>

- **Factory settings**:
  - **Internet mode(Over HTTP)**: On
  - **Frame rate**: Frame rate
  - **Best effort**: Frame rate

#### Transmission priority [Constant bit rate, Frame rate, Best effort]
Set the transmission mode for H.264 images.

- **<NOTE>**
  - This cannot be set when the [Streaming mode] is [H.264(UHD)].
  - This cannot be set when the [Streaming mode] is [H.264(UHD)] or [NDI|HX] mode.

- **H.264 transmission [On, Off]**
  - Whether to transmit the H.264 images is set here.
  - **Factory settings**: Off

- **Internet mode(Over HTTP)**
  - [On, Off]
  - This setting is selected when transmitting H.264 images over the Internet.
  - **Factory settings**: Off

- **<NOTE>**
  - When [On] is set, only [Unicast port(AUTO)] can be selected as the [Transmission type] setting.
  - When [On] is set, it takes a few seconds before the H.264 images are displayed.
  - When this is set to [On], access will be limited to IPv4.
Max bit rate (per client)  
[512kbps, 768kbps, 1024kbps, 1536kbps, 2048kbps, 3072kbps, 4096kbps, 6144kbps, 8192kbps, 10240kbps, 12288kbps, 12800kbps, 14336kbps, 16384kbps, 20480kbps, 24576kbps, 25600kbps, 51200kbps, 76800kbps]  
Specify the H.264 bit rate per client.  
When [Transmission priority] is set to [Best effort], specify the maximum and minimum bit rate.  
Factory settings:  
H.264(1): 14336kbps  
H.264(2): 8192kbps  
H.264(3): 4096kbps  
H.264(4): 4096kbps  

<NOTE>  
• When the [Streaming mode] is set to [H.264(UHD)], the value is fixed according to the frame rate.  
• The setting range depends on the resolution.  

Image quality [Motion priority, Image quality priority]  
Select the image quality for H.264 images.  

<table>
<thead>
<tr>
<th>Motion priority</th>
<th>Mode giving priority to image motion.</th>
</tr>
</thead>
<tbody>
<tr>
<td>Image quality priority</td>
<td>Mode giving priority to image quality.</td>
</tr>
</tbody>
</table>

Factory settings: Motion priority  

<NOTE>  
• This setting is only enabled when [Transmission priority] is set to [Constant bit rate] or [Best effort].  

Transmission type [Unicast port(AUTO), Unicast port(MANUAL), Multicast]  
Select the transmission format for H.264 images.  

Unicast port(AUTO)  
Up to 14 users can access a single camera at the same time.  
[Unicast port(Image)] and [Unicast port(Audio)] will be configured automatically when images and audio are sent from the camera.  
We recommend selecting the [Unicast port(MANUAL)] setting when the port number transmitting the H.264 images does not need to be fixed (e.g., during use within a network).  

Unicast port(MANUAL)  
Up to 14 users can access a single camera at the same time.  
[Unicast port(Image)] and [Unicast port(Audio)] must be configured manually when images and audio are sent from the camera.  
When transmitting H.264 images via the Internet, configure a fixed transmission port for the broadband router (hereafter referred to as “router”) (√→page 124). For details, refer to the operating instructions for the router.  

Multicast  
An unlimited number of users can access a single camera at the same time.  
When transmitting H.264 images via multicast, enter the [Multicast address], [Multicast port], and [Multicast TTL/HOPLimit].  

Factory settings: Unicast port(AUTO)  

<NOTE>  
• For details on the maximum number for simultaneous access, see page 82.  

Unicast port(Image) [1024 to 50000]  
Enter the unicast port number (used when sending images from the unit).  
Only even numbers can be specified.  
The port number cannot be set to 10670.  
Factory settings:  
H.264(1): 32004  
H.264(2): 32014  
H.264(3): 32024  
H.264(4): 32034  

Unicast port(Audio) [1024 to 50000]  
Only even numbers can be specified.  
The port number cannot be set to 10670.  
Factory settings:  
H.264(1): 33004  
H.264(2): 33014  
H.264(3): 33024  
H.264(4): 33034  

<NOTE>  
• The unicast port number must be configured when [Transmission type] is set to [Unicast port(MANUAL)].  

Multicast address  
IPv4: 224.0.0.0 to 239.255.255.255  
IPv6: Multicast address starting with FF  
Enter the multicast IP address.  
Images and audio will be sent to the specified IP address.  
Factory settings:  
H.264(1): 239.192.0.20  
H.264(2): 239.192.0.21  
H.264(3): 239.192.0.22  
H.264(4): 239.192.0.23  

<NOTE>  
• Verify usable multicast IP addresses before entering this setting.  

Multicast port [1024 to 50000]  
Enter the multicast port number (used when sending images from the unit).  
Only even numbers can be specified.  
The port number cannot be set to 10670.  
Factory settings: 37004  

<NOTE>  
• When sending audio from the unit, a port number with “1000” added to the multicast port number will be used.  

Multicast TTL/HOPLimit [1 to 254]  
Enter the TTL/HOPLimit value for multicast.  
Factory settings: 16  

<NOTE>  
• When transmitting H.264 images via the Internet, transmitted images may not appear depending on proxy server settings, firewall settings, etc. In such cases, consult your network administrator.  
• When displaying multicast images on a personal computer with multiple LAN cards installed, disable the LAN cards that are not used for reception.
H.265

Set H.265 image settings. The setting is confirmed with the [Set] button.

| H.265(1) |
|-----------------|-----------------|
| H.265 transmission | On | Off |
| Image capture size | 3840x2160 |
| Frame rate | 50fps |
| Max bit rate(per client) | Max 51200kbps |
| Transmission type | Unicast port(AUTO) |
| Unicast port(Image) | 32004 | (1024 - 50000) |
| Unicast port(Audio) | 33004 | (1024 - 50000) |
| Multicast address | 239.192.0.20 |
| Multicast port | 37004 | (1024 - 65535) |
| Multicast TTL/HOPLimit | 16 | (1 - 254) |

<NOTE>

• H.265 format images cannot be displayed in the live screen [Live] of the unit.
• Use external devices and software compatible with H.265 images to display H.265 images.

H.265 transmission [On, Off]
Whether to transmit the H.265 images is set here.
Factory settings: On

Image capture size
The H.265 image resolution is displayed. H.265 images are fixed at 3840×2160.

Frame rate [30fps, 25fps, 24fps]
Set the frame rate for H.265 images.

- 59.94Hz/29.97Hz: 30fps
- 50Hz/25Hz: 25fps
- 24/23.98Hz: 24fps

Factory settings: 30fps

Max bit rate(per client)
[8192kbps, 12800kbps, 25600kbps, 51200kbps, 76800kbps]
Specify the H.265 bit rate per client.
Factory settings: 25600kbps

Transmission type
The same as H.264 Transmission type (→ page 103).

Unicast port(Image)
The same as H.264 Unicast port(Image) (→ page 103).

Unicast port(Audio)
The same as H.264 Unicast port(Audio) (→ page 103).

Multicast address
The same as H.264 Multicast address (→ page 103).

Multicast port
The same as H.264 Multicast port (→ page 103).

Multicast TTL/HOPLimit
The same as H.264 Multicast TTL/HOPLimit (→ page 103).
Web screen configurations (continued)

● RTMP
Make RTMP/RTMPS transmission settings.

Server setup
The setting is confirmed with the [Set] button.

<table>
<thead>
<tr>
<th>URL type</th>
<th>Type1</th>
<th>Type2</th>
</tr>
</thead>
<tbody>
<tr>
<td>URL</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Server URL</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Stream key</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

<NOTE>
• Switch to the appropriate method of registering RTMP/RTMPS transmission server information suited to the setting information notified from the RTMP/RTMPS transmission server you are using.
• The Stream Key setting field is displayed only when [Type2] is set.

URL type [Type1, Type2]
Select the method for registering the information for the RTMP/RTMPS transmission server.

<table>
<thead>
<tr>
<th>Type1</th>
<th>Specify to set the server URL and RTMP/RTMPS stream key as a set in [Server URL].</th>
</tr>
</thead>
<tbody>
<tr>
<td>Type2</td>
<td>Specify to individually set the server URL and RTMPS stream key in [Server URL] and [Stream Key].</td>
</tr>
</tbody>
</table>

URL
Server URL
Set the URL for the RTMP/RTMPS server to be transmitted to.

Stream key
The stream key obtained from the RTMP/RTMPS server is set during streaming only when the service is set to [Type2].

Streaming format
Make settings for H.264 images for use in RTMP/RTMPS transmission.
The setting is confirmed with the [Set] button.
Refer to the explanation for H.264 (→ page 102) for information about Image capture size, Frame rate and Max bit rate (per client).

<NOTE>
• Streaming format settings cannot be changed during RTMP/RTMPS transmissions.
• Set the Streaming format to the settings recommended for the transmission destination server. Visit the publisher’s website or contact them about the recommended values.
• When [IP(UDP)] of [Tracking Data Output] is set to [On], video transmission via IP may be delayed or the video may suffer frame loss. (→ page 120)
  We recommend [IP(UDP)] of [Tracking Data Output] is set to [Off] during RTMP/RTMPS transmission.
NDI\HX

Make NDI\HX transmission settings.
The setting is confirmed with the [Set] button.

NDI\HX stream

NDI\HX transmission [On, Off]
Whether to transmit the NDI\HX images is set here.
Factory settings: On

Internet mode (Over HTTP) [On, Off]
This cannot be configured on [NDI\HX stream] screen.

Image capture size [1920×1080, 1280×720]
Select the resolution for NDI\HX images.
Factory settings: 1920×1080

Transmission priority
This cannot be configured on [NDI\HX stream] screen.

Frame rate [5fps, 12.5fps, 15fps, 25fps, 30fps, 50fps, 60fps]
Set the frame rate for NDI\HX images.

<table>
<thead>
<tr>
<th>Frame Rate</th>
<th>Factory Settings</th>
</tr>
</thead>
<tbody>
<tr>
<td>59.94Hz</td>
<td>5fps/15fps/30fps/60fps</td>
</tr>
<tr>
<td>50Hz</td>
<td>5fps/12.5fps/25fps/50fps</td>
</tr>
</tbody>
</table>

Factory settings:
For 59.94Hz: 60fps
For 50Hz: 50fps

<NOTE>
- When the frame frequency is 24/23.98Hz, you cannot set to the NDI\HX mode.
- [60fps(50fps)] cannot be selected when the video format is [29.97p(25p)].

Max bit rate (per client)
[512kbps, 768kbps, 1024kbps, 1536kbps, 2048kbps, 3072kbps, 4096kbps, 6144kbps, 8192kbps, 10240kbps, 12288kbps, 14336kbps, 16384kbps, 20480kbps, 24576kbps]
Specify the NDI\HX bit rate per client.
Factory settings: 10240kbps

<NOTE>
- The NDI\HX bit rate setting range depends on the resolution.

Image quality
This cannot be configured on [NDI\HX stream] screen.

Transmission type
The same as H.264 Transmission type (→ page 103).

Unicast port (Image)
The same as H.264 Unicast port (Image) (→ page 103).

Unicast port (Audio)
The same as H.264 Unicast port (Audio) (→ page 103).

Multicast address
The same as H.264 Multicast address (→ page 103).

Multicast port
The same as H.264 Multicast port (→ page 103).

Multicast TTL/HOPLimit
The same as H.264 Multicast TTL/HOPLimit (→ page 103).

<NOTE>
- When [IP(UDP)] of [Tracking Data Output] is set to [On], video transmission via IP may be delayed or the video may suffer frame loss. (→ page 120)
We recommend [IP(UDP)] of [Tracking Data Output] is set to [Off] in the NDI\HX mode.
- When the authentication feature is enabled, the unit may not be connected in NDI\HX mode.
In the NDI\HX mode, set [User auth.] (→ page 122) and [Host auth.] (→ page 123) to [Off].

Web screen configurations (continued)
Audio setting screen [Audio]

Configure audio settings.

<NOTE>
- Images and audio are not synchronized. Therefore, images and audio may be slightly out of sync.
- The audio may skip depending on the network environment.

Setting status

<table>
<thead>
<tr>
<th>Audio</th>
<th>Input Type</th>
<th>Volume Level</th>
<th>Plugin Power</th>
<th>Audio over IP</th>
</tr>
</thead>
<tbody>
<tr>
<td>Off</td>
<td>Line</td>
<td>0dB</td>
<td>On</td>
<td>Off</td>
</tr>
</tbody>
</table>

Audio

The setting status of audio input is displayed.

Input Type

The setting status of the audio input type is displayed.

Volume Level

The setting status of audio output volume is displayed.

Plugin Power

The setting status of audio plugin power is displayed.

Audio over IP

Audio transmission

The setting status of audio data IP transmission is displayed.

Audio bit rate

The bit rate setting status for audio data via IP transmission is displayed.

Audio

[Off, On]

Turn audio input off/on.

Factory settings: Off

Input Type [Mic, Line]

Mic Set the microphone input.

Line Set the line input.

This is only enabled when [Audio] is set to [On].

Factory settings: Line

Volume Level [–36dB to +12dB]

Set the volume of audio output.

This is only enabled when [Audio] is set to [On].

Factory settings: 0dB

Plugin Power [Off, On]

Turn the plugin power for the audio off/on.

This is only enabled when [Audio] is set to [On].

This is only enabled when [Input Type] is set to [Mic].

Factory settings: Off

Audio over IP

The setting is confirmed with the [Set] button.

Audio transmission

[Off, On]

Audio bit rate

[64kbps, 96kbps, 128kbps]

Set the bit rate for transmitting audio.

Factory settings: 128kbps
Image adjust screen [Image adjust]

Adjust the image quality.
The settings in this screen (with the exception of [Scene] and [Matrix])
are applied immediately. After selecting the settings for [Scene] and
[Matrix], you need to press the [Set] button to execute.

Scene [Scene1, Scene2, Scene3, Scene4]

Switch the shooting mode depending on the shooting environment.
Select a shooting mode based on the shooting conditions or
preference.
Select a shooting mode from the pull-down menu, and click the [Set]
button to switch to the selected mode.

Scene1 Scene2 Scene3 Scene4

Modes that allow you to adjust detailed settings manually
for various shooting conditions and preferences.

Factory settings: Scene1

Brightness

This menu item is selected to set the target picture level for automatic
exposure compensation.
Its setting takes effect when [Auto] or [ELC] has been selected as
the setting for any of the following automatic exposure compensation
functions.
• When [Iris Mode] is set to [Auto]
• When [Shutter Mode] is set to [ELC]
• When [Gain] is set to [Auto]

Factory settings: 0

Iris Mode [Manual, Auto]

This menu item is used to select whether the iris is to be adjusted
automatically or manually.

Manual The iris is adjusted manually.
Auto Auto exposure compensation is performed so that
the target level which was set using [Picture Level] is
reached.

Factory settings: Auto

Auto Iris Speed [Slow, Normal, Fast]

Set the control speed of the auto iris function.
Slow Control the iris at a slow speed.
Normal Control the iris at a normal speed.
Fast Control the iris at a fast speed.

Factory settings: Normal

Auto Iris Window [Normal1, Normal2, Center]

Select the detection window for the auto iris.
Normal1 Window towards the center of the screen.
Normal2 Window towards the bottom of the screen.
Center Spotted window in the center of the screen.

Factory settings: Normal1

Shutter Mode [Off, Step, Synchro, ELC]

Select for camera shutter mode.
Off The shutter is set to OFF.
Step The step shutter is set (the steps can be changed).
Synchro The synchro shutter is set (the setting can be changed
continuously).
ELC The electronic shutter is controlled and the light quantity
is adjusted automatically.

Factory settings: Off

Step/Synchro

This is used to adjust the shutter speed in the mode which was
selected as the [Shutter Mode] setting.
When a higher shutter speed is selected, fast-moving subjects do not
become blurred easily but the images will be darker.

The shutter speeds that can be set are listed below.

<table>
<thead>
<tr>
<th>Shutter Mode</th>
<th>[Step]</th>
<th>[Synchro]</th>
</tr>
</thead>
<tbody>
<tr>
<td>59.94p/59.94i mode</td>
<td>1/60, 1/100, 1/120, 1/250, 1/500, 1/1000, 1/2000, 1/4000, 1/8000, 1/10000</td>
<td>60.0 Hz to 7200 Hz</td>

</table>

Factory settings:

When [Shutter Mode] is set to [Step]
[59.94Hz] 1/100 [50Hz] 1/120
When [Shutter Mode] is set to [Synchro]
[59.94Hz] 60.0 Hz [50Hz] 50.0 Hz

<NOTE>
• When [Shutter Mode] is set to [Off] in 29.97p, 23.98p/24p, or 25p
mode, the shutter speed is set to [1/50].
ELC Limit [1/100, 1/120, 1/250]
Set the maximum shutter level when ELC is operating.
Factory settings: 1/250

Gain
[When [Super Gain] is [Off]: Auto, 0dB to 36dB,
When [Super Gain] is [On]: Auto, 0dB to 42dB]
The image gain is adjusted here.
In locations which are too dark, adjust the gain upward; conversely, in locations which are too bright, adjust it downward.
When [Auto] is set, the light quantity is adjusted automatically.
The noise increases when the gain is increased.
Factory settings: 0dB

Super Gain [Off, On]
Set the super gain (increased sensitivity) mode.

<p>| | |</p>
<table>
<thead>
<tr>

Factory settings: Off

AGC Max Gain [6dB, 12dB, 18dB]
When [Auto] is selected as the [Gain] setting, the maximum gain-up amount can be set.
Factory settings: 18dB

Frame Mix [Off, 6dB, 12dB, 18dB, 24dB]
Select for frame addition (gain-up using sensor storage) amount.
Its setting takes effect when [Off] has been selected as the [Shutter Mode] setting (→ page 108).
When frame addition is performed, it will appear as if the images are missing some frames.
This cannot be configured when the format is 2160/29.97p, 2160/23.98p, 2160/24p, 1080/29.97p, 1080/23.98p(59.94i), 1080/23.98p, 1080/24p, 1080/29.97p, 1080p, 1080/23.98p or 1080/25p.
Factory settings: Off

<NOTE>
• Under discharge tube illumination, such as fluorescent and mercury-vapor lights, the brightness may change synchronously, colors may change, and horizontal stripes may flow up and down the image.

ND Filter [Through, 1/4, 1/16, 1/64]
Set the transmittance of the lens' built-in ND (neutral density) filter.
The filter switches when the setting is fixed.

<p>| | |</p>
<table>
<thead>
<tr>
<th></th>

</tr>
</tbody>
</table>

This cannot be set when the [Color Setting] is [V-Log].
Factory settings: Day

<NOTE>
• In night mode, video output will be in black and white. In addition, the iris will be forcibly opened.
• White balance adjustment is not possible in night mode.
• ND filter switching is not possible in night mode.
• [Pedestal] cannot be performed properly in night mode.
White Balance Mode
[ATW, AWB A, AWB B, 3200K, 5600K, VAR]
Set the white balance mode.
Select the mode when the coloring is not natural because of the nature of the light source or other factors.
If the white color serving as the reference can be recognized, subjects can be shot with natural coloring.

- **ATW**: In this mode, the white balance is compensated for automatically, even if changes occur in the light source or color temperature, by a process of continuous and automatic adjustment.

- **AWB A**: When [AWB A] or [AWB B] is selected and the white balance is executed, the adjustment results obtained are stored in the memory selected. When [AWB A] or [AWB B] is then selected, the white balance stored in the selected memory can be recalled.

- **3200K**: This is the white balance mode which is ideal when a 3200K halogen light is used as the light source.

- **5600K**: This is the white balance mode which is ideal when 5600K sunlight or fluorescent lighting is used as the light source.

- **VAR**: You can specify a color temperature between 2000K to 15000K.

**Factory settings:** AWB A

**AWB**
When the [Execute] button is clicked, automatic white balance (AWB) is executed and the white balance is reset.

**Color Temperature [2000K to 15000K]**
You can specify a color temperature between 2000K to 15000K. Its setting takes effect when [VAR] has been selected as the [White Balance Mode] setting.

**Factory settings:** 3200K

**R Gain [–200 to +200]**
This enables the R gain to be adjusted. Its setting takes effect when [AWB A], [AWB B] or [VAR] has been selected as the [White Balance Mode] setting.

**Factory settings:** 0

**B Gain [–200 to +200]**
This enables the B gain to be adjusted. Its setting takes effect when [AWB A], [AWB B] or [VAR] has been selected as the [White Balance Mode] setting.

**Factory settings:** 0
Color Temperature Setting

Color Temperature [2000K to 15000K]
This displays the color temperature when [White Balance Mode] is [AWB A] or [AWB B].
Varying the output balance of Rch and Bch enables the varying of the color temperature.
Varying [R Gain] and [B Gain] in [Color TEMP. Setting] also enables color temperature adjustments.
Its setting takes effect when [AWB A] or [AWB B] has been selected as the [White Balance Mode] setting.
Factory settings: 3200K

R Gain [–400 to +400]
This enables adjustments to R Gain when [White Balance Mode] is [AWB A] or [AWB B].
Varying the output of Rch enables the varying of the colors on the Rch axis.
Its setting takes effect when [AWB A] or [AWB B] has been selected as the [White Balance Mode] setting.
Factory settings: 0

B Gain [–400 to +400]
This enables adjustments to B Gain when [White Balance Mode] is [AWB A] or [AWB B].
Varying the output of Bch enables the varying of the colors on the Bch axis.
Its setting takes effect when [AWB A] or [AWB B] has been selected as the [White Balance Mode] setting.
Factory settings: 0

G Axis [–400 to +400]
This enables adjustments to G Axis when [White Balance Mode] is [AWB A] or [AWB B].
Varying the output of Rch and Bch enables the varying of the colors on the G axis.
Its setting takes effect when [AWB A] or [AWB B] has been selected as the [White Balance Mode] setting.
Factory settings: 0

AWB Gain Offset [Off, On]
When auto white balance is performed by setting [White Balance Mode] to [AWB A] or [AWB B], set the values for Rch gain and Bch gain.

<table>
<thead>
<tr>
<th>Mode</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Off</td>
<td>Set the value of [R Gain] and [B Gain] to 0.</td>

<td>Tracks at a speed faster than [Normal].</td>
</tr>
</tbody>
</table>

This is only enabled when [White Balance Mode] is set to [ATW].
Factory settings: Normal

ATW Target R [–10 to +10]
Make fine adjustments to the Rch output when converging with the auto tracking white balance operation.
Factory settings: 0

ATW Target B [–10 to +10]
Make fine adjustments to the Bch output when converging with the auto tracking white balance operation.
Factory settings: 0

Chroma Level [Off, –99% to 99%]
Set this to change the color intensity (chroma level) of the images.
This cannot be set when the [Color Setting] is [V-Log].
Factory settings: 0%

Chroma Phase [–31 to +31]
Make fine adjustments to the hue of the colors in the images.
This cannot be set when the [Color Setting] is [V-Log].
Factory settings: 0

ABB
When the [Execute] button is clicked, automatic black balance (ABB) is executed and the black balance is reset.

Master Pedestal [–200 to +200]
This item is used to adjust the black level (adjust the pedestal). These parts become darker when a negative setting is selected and, conversely, lighter when a positive setting is selected.
This cannot be set when the [Color Setting] is [V-Log].
All of the following Master Pedestal items also cannot be set when [Color Setting] is [V-Log].
Factory settings: 0

R Pedestal [–100 to +100]
This enables the R pedestal to be adjusted.
Factory settings: 0

G Pedestal [–100 to +100]
This enables the G pedestal to be adjusted.
Factory settings: 0

B Pedestal [–100 to +100]
This enables the B pedestal to be adjusted.
Factory settings: 0

Pedestal Offset [Off, On]
Set the pedestal level of the Rch, Gch, and Bch when the auto black balance has been adjusted.

<table>
<thead>
<tr>
<th>Mode</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>

Web screen configurations (continued)

**Detail [Off, On]**
- Turn on/off the contour (sharpness of images) adjustment of images.
  - This cannot be set when the [Color Setting] is [V-Log].
  - All of the following Detail items also cannot be set when [Color Setting] is [V-Log].
  - **Factory settings:** On

**Master Detail [–31 to +31]**
- Adjust the contour correction level (master).
  - This is only enabled when [Detail] is set to [On].
  - **Factory settings:** 0

**Detail Coring [0 to 60]**
- Set the level of the signal (including noise) which makes the detail effect not work.
  - This is only enabled when [Detail] is set to [On].
  - **Factory settings:** 15

**V Detail Level [−7 to +7]**
- Adjust the contour correction level in the vertical direction.
  - This is only enabled when [Detail] is set to [On].
  - **Factory settings:** 0

**Detail Frequency [−7 to +7]**
- Set the boost frequency of detail.
  - −7: Low frequency
  - +7: High frequency
  - When a high frequency is selected, the detail effect is added to subjects with more definition.
  - This is only enabled when [Detail] is set to [On].
  - **Factory settings:** 0

**Level Depend. [−7 to +7]**
- When the detail of bright signals are emphasized, the detail of dark parts are compressed.
  - The larger the [Level Depend.] setting, the more detail of bright parts are compressed.
  - This is only enabled when [Detail] is set to [On].
  - **Factory settings:** 0

**Knee Aperture Level [0 to 5]**
- Set the detail level of very bright parts.
  - This is only enabled when [Detail] is set to [On].
  - **Factory settings:** 2

**Detail Gain(+) [−31 to +31]**
- Set the detail level of the plus direction (direction to be made brighter).
  - This is only enabled when [Detail] is set to [On].
  - **Factory settings:** 0

**Detail Gain(−) [−31 to +31]**
- Set the detail level of the minus direction (direction to be made darker).
  - This is only enabled when [Detail] is set to [On].
  - **Factory settings:** 0

**Skin Detail [Off, On]**
- This function smooths skin and produces a more beautiful image.
  - This is only enabled when [Detail] is set to [On].
  - This cannot be set when the [Color Setting] is [V-Log].
  - All of the following Skin Detail items also cannot be set when [Color Setting] is [V-Log].
  - **Factory settings:** Off

**Skin Detail Effect [0 to 31]**
- The skin of human subjects appears smoother the larger the setting value.
  - This is only enabled when [Detail] is set to [On] and [Skin Detail] is set to [On].
  - **Factory settings:** 16

**DownCon Detail [Off, On]**
- Turn on/off the contour (sharpness of images) adjustment of images down-converted from 4K to HD.
  - This is enabled when [Format] is the following.
    - 2160/59.94p, 2160/29.97p, 2160/23.98p, 2160/24p, 2160/50p, 2160/25p
  - This cannot be set when the [Color Setting] is [V-Log].
  - All of the following DownCon Detail items also cannot be set when [Color Setting] is [V-Log].
  - **Factory settings:** On

**DC. Master Detail [−31 to +31]**
- Adjust the contour correction level (master) for images down-converted from 4K to HD.
  - This is enabled when [Format] is the following.
    - 2160/59.94p, 2160/29.97p, 2160/23.98p, 2160/24p, 2160/50p, 2160/25p
  - This is only enabled when [DownCon Detail] is set to [On].
  - **Factory settings:** −20

**DC. Detail Coring [0 to 60]**
- Set the level of the signal (including noise) which makes the detail effect not work for images down-converted from 4K to HD.
  - This is enabled when [Format] is the following.
    - 2160/59.94p, 2160/29.97p, 2160/23.98p, 2160/24p, 2160/50p, 2160/25p
  - This is only enabled when [DownCon Detail] is set to [On].
  - **Factory settings:** 15

**DC. V Detail Level [−7 to +7]**
- Adjust the contour correction level in the vertical direction for images down-converted from 4K to HD.
  - This is enabled when [Format] is the following.
    - 2160/59.94p, 2160/29.97p, 2160/23.98p, 2160/24p, 2160/50p, 2160/25p
  - This is only enabled when [DownCon Detail] is set to [On].
  - **Factory settings:** 7

**DC. Detail Frequency [−2 to +2]**
- Set the boost frequency of detail for images down-converted from 4K to HD.
  - −2: Low frequency
  - +2: High frequency
  - When a high frequency is selected, the detail effect is added to subjects with more definition.
  - This is enabled when [Format] is the following.
    - 2160/59.94p, 2160/29.97p, 2160/23.98p, 2160/24p, 2160/50p, 2160/25p
  - This is only enabled when [DownCon Detail] is set to [On].
  - **Factory settings:** 0

**DC. Level Depend. [−7 to +7]**
- The larger the setting for images down-converted from 4K to HD, the more detail of bright parts is compressed.
  - This is enabled when [Format] is the following.
    - 2160/59.94p, 2160/29.97p, 2160/23.98p, 2160/24p, 2160/50p, 2160/25p
  - This is only enabled when [DownCon Detail] is set to [On].
  - **Factory settings:** 0

**DC. Knee Aperture Level [0 to 5]**
- Set the detail level of very bright parts in images down-converted from 4K to HD.
  - −2: Low frequency
  - +2: High frequency
  - When a high frequency is selected, the detail effect is added to subjects with more definition.
  - This is enabled when [Format] is the following.
    - 2160/59.94p, 2160/29.97p, 2160/23.98p, 2160/24p, 2160/50p, 2160/25p
  - This is only enabled when [DownCon Detail] is set to [On].
  - **Factory settings:** 2
Gamma Mode
[HD, FILMLIKE1, FILMLIKE2, FILMLIKE3, FILM REC, VIDEO REC, HLG]
Select the type of gamma curve.

<table>
<thead>
<tr>
<th>Mode</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>HD</td>
<td>High Definition video gamma characteristic.</td>
</tr>
<tr>
<td>FILMLIKE1</td>

</tbody>
</table>

Factory settings: HD

<NOTE>
- When [Gamma Mode] is changed from [HLG] to a mode other than [HLG], or when changed to [HLG], IP video transmission is temporarily stopped.

Gamma [0.30 to 0.75]
Adjust the gamma correction level. Specifying smaller values results in a gentler gamma curve for the slope of low-brightness areas and sharper contrast. Specifying larger values results in an expanded gradient for dark areas and produces brighter images. The gamma curve for low-brightness areas will be steeper, and contrast will be softer.

This is only enabled when [Gamma Mode] is set to other than [HLG].

Factory settings: 0.45

F-REC Dynamic Level [200%, 300%, 400%, 500%, 600%]
Set the dynamic range.
This is only enabled when [Gamma Mode] is set to [FILM REC].

Factory settings: 500%

F-REC Black STR. Level [0% to 30%]
Set the black stretch.
This is only enabled when [Gamma Mode] is set to [FILM REC].

Factory settings: 0%

V-REC Knee Slope [150%, 200%, 250%, 300%, 350%, 400%, 450%, 500%]
Set the knee slope.
This is only enabled when [Gamma Mode] is set to [VIDEO REC].

Factory settings: 150%

V-REC Knee Point [30% to 107%]
Set the knee point.
This is only enabled when [Gamma Mode] is set to [VIDEO REC].

Factory settings: 30%

Black Gamma [–8 to +8]
Set the gamma curve for dark areas.

<table>
<thead>
<tr>
<th>Value</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>–8 to –1</td>
<td>Compresses dark parts.</td>
</tr>
<tr>
<td>1 to 8</td>
<td>Expands dark parts.</td>
</tr>
</tbody>
</table>

Factory settings: 0

Black Gamma Range [1 to 3]
Set the maximum level of compression/expansion.

1 | Around 20%
2 | Around 30%
3 | Around 40%

Factory settings: 1

DRS [Off, Low, Mid, High]
Set the DRS function which performs correction when video with high light/dark contrast is displayed. You can select from a [Low], [Mid], or [High] effect level. This is only enabled when [Gamma Mode] is set to other than [HLG].

Factory settings: Off

Knee Mode [Off, Auto, Manual]
Set the operating mode for gradation compression (knee).

<table>
<thead>
<tr>
<th>Mode</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Off</td>
<td>Turn the knee function off.</td>
</tr>
<tr>
<td>Auto</td>
<td>Enable the knee function, and set the knee point and knee slope automatically.</td>
</tr>
<tr>
<td>Manual</td>
<td>Enable the knee function, and set the knee point and knee slope manually.</td>
</tr>
</tbody>
</table>

This is only enabled when [Gamma Mode] is set to other than [HLG]. This cannot be set when the [Color Setting] is [V-Log].

All of the following Knee Mode items also cannot be set when [Color Setting] is [V-Log].

Factory settings: Auto

Auto Knee Response [1 to 8]
Set the speed of the auto knee response. The response speed increases the lower the setting value.

This is only enabled when [Gamma Mode] is set to other than [HLG].

Factory settings: 4

Knee Point [70.0% to 107.0%]
Set the compression level (knee point) position for high-brightness video signals.

This is only enabled when [Gamma Mode] is set to other than [HLG].

Factory settings: 93.0%

Knee Slope [0 to 99]
Set the knee slope.

This is only enabled when [Gamma Mode] is set to other than [HLG].

Factory settings: 99

<NOTE>
- When [DRS] is enabled, the knee setting is disabled.
HLG Knee [Off, On]
Enable or disable the operation of the HLG knee.
This is only enabled when [Gamma Mode] is set to [HLG].
This cannot be set when the [Color Setting] is [V-Log].
All of the following HLG Knee items also cannot be set when [Color Setting] is [V-Log].
Factory settings: Off

HLG Knee Point [55% to 100%]
Set the position of the HLG knee point.
This is only enabled when [Gamma Mode] is set to [HLG].
Factory settings: 55%

HLG Knee Slope [0 to 100]
Set the slope of the HLG knee.
This is only enabled when [Gamma Mode] is set to [HLG].
Factory settings: 10

White Clip [Off, On]
Turn the white clip function off/on.
This is only enabled when [Gamma Mode] is set to other than [HLG].
This cannot be set when the [Color Setting] is [V-Log].
All of the following White Clip items also cannot be set when [Color Setting] is [V-Log].
Factory settings: On

White Clip Level [90% to 109%]
Set the white clip level.
This is only enabled when [Gamma Mode] is set to other than [HLG].
This is only enabled when [White Clip] is set to [On].
Factory settings: 109%

<NOTE>
• When [Knee Mode] is set to [Auto] and the value of [White Clip Level] is changed, the knee value will also change.

DNR [Off, Low, High]
Set the digital noise reduction level for outputting bright, clear images without noise, even at night and low-light conditions.
When [Low] or [High] is selected, noise can be eliminated.
However, image lag may increase.
Factory settings: Low
Matrix Type [Normal, EBU, NTSC, User]
Select the type of color matrix. The setting is confirmed with the [Set] button.

<table>
<thead>
<tr>
<th>Matrix Type</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Normal</td>
<td>This item is used to load the preset color matrix data and compensate for the saturation and color phase.</td>
</tr>

</tbody>
</table>

Color Correction
This can be set when [User] has been selected as the [Matrix Type] setting. All of the following Color Correction items also cannot be set when [Color Setting] is [V-Log].

Saturation [-63 to +63]
Adjust the saturation for each color.

Phase [-63 to +63]
Adjust the hue for each color.

Focus Mode [Manual, Auto]
Select auto or manual mode for the focus adjustment function.

Manual | Adjust focus manually.
Auto   | Always adjust focus automatically.

Factory settings: Auto

Set the maximum magnification rate for zoom.

Opt.Zoom | Use only optical zoom. Optical zoom up to 20× is possible.
i.Zoom   | Enable the i.Zoom function. When this function is enabled, digital zoom is used while reducing image degradation. When [Format] in the [System] screen is 2160/59.94p, 2160/29.97p, 2160/50p, 2160/25p, 2160/24p, 2160/23.98p, up to 24× zoom is possible combining optical zoom and digital zoom. When [Format] in the [System] screen is other than one of these, up to 32× zoom is possible combining optical zoom and digital zoom.
D.Zoom   | Enable the digital zoom function. Higher digital zoom magnifications will result in coarser images.

Factory settings: Opt.Zoom

Max Digital Zoom
[×2, ×3, ×4, ×5, ×6, ×7, ×8, ×9, ×10]
Set the maximum digital zoom magnification.
This is only enabled when [Zoom Mode] is set to [D.Zoom].
Factory settings: ×10

<NOTE>
• Higher digital zoom magnifications will result in coarser images.

Digital Extender [Off, ×1.4, ×2.0]
Make settings for the digital extender function.

Off   | Turn the digital extender function off.
×1.4  | The digital zoom will be fixed at 1.4×.
×2.0  | The digital zoom will be fixed at 2.0×.

This is only enabled when [Zoom Mode] is set to [Opt.Zoom].

Factory settings: Off

OIS [Off, On]
Turn the optical image stabilization (OIS) function off/on.

<NOTE>
• The optical image stabilization (OIS) function’s level of correction is reduced during pan/tilt operations.

Factory settings: Off
UHD crop setting screen [UHD Crop]

Crop Output PTZ
This is used for camera control. The same operations are possible as with the camera controller operated in the live screen [Live]. (→ page 87)

Crop Mode [Off, Crop(1080), Crop(720)]
Set the Crop function which crops UHD (3840×2160) images to 1920×1080 images or 1280×720 images.

- Off: Disable the Crop function.
- Crop(1080): Crop UHD (3840×2160) images to 1920×1080 images.
  This is enabled only when [Format] in [System] screen is the following.
  - 2160/59.94p, 2160/29.97p
  - 2160/50p, 2160/25p
  - 2160/24p, 2160/23.98p
- Crop(720): Crop UHD (3840×2160) images to 1280×720 images.
  This is enabled only when [Format] in [System] screen is the following.
  - 2160/59.94p, 2160/26p

Factory settings: Off

<NOTE>
- When [Crop Mode] is changed, IP video transmission is temporarily stopped.
- When [H.264(UHD)], [H.265(UHD)], and [JPEG(UHD)] cannot be selected in [Streaming mode] when [Crop Mode] is [Crop(1080)] or [Crop(720)]. (→ page 100)
- When [H.264(UHD)], [H.265(UHD)], or [JPEG(UHD)] is selected in [Streaming mode] and [Crop Mode] is switched to [Crop(1080)] or [Crop(720)], the [Streaming mode] setting changes to [H.264(UHD)].

3G SDI Out [Crop, FULL]
IP Out [Crop, FULL]
Make the settings for Crop/FULL for images output to the 3G SDI OUT connector and IP.

- Crop: Images with FHD cropped from UHD images are output. The images output in this case are those with the crop frame specified in [Crop Output Select].
- FULL: FHD down-converted images are output as is without cropping UHD images.

This is only enabled when [Crop Mode] is set to [Crop(1080)] or [Crop(720)].
Factory settings: Crop

Crop Marker Select [Off, YL, G, MG, YL+G, YL+MG, G+MG, YL+G+MG]
Make the settings for the crop frame displayed for images output to the MONITOR OUT connector <MONI OUT>.

- Off: Crop frame is not displayed.
- YL: Only a yellow crop frame is displayed.
- G: Only a green crop frame is displayed.
- MG: Only a magenta crop frame is displayed.
- YL+G: Yellow and green crop frames are displayed.
- YL+MG: Yellow and magenta crop frames are displayed.
- G+MG: Green and magenta crop frames are displayed.
- YL+G+MG: Yellow, green, and magenta crop frames are displayed.

This is only enabled when [Crop Mode] is set to [Crop(1080)] or [Crop(720)].
Factory settings: YL+G+MG

Crop Output Select [YL, G, MG]
Make the settings for the crop frame for images output to the 3G SDI OUT connector and IP.

- YL: Output the yellow crop frame images.
- G: Output the green crop frame images.
- MG: Output the magenta crop frame images.

This is only enabled when [Crop Mode] is set to [Crop(1080)] or [Crop(720)].
Factory settings: YL

<NOTE>
- The color frame specified in [Crop Output Select] will be a deeper shade when compared to other colors used for frames.

Crop Adjust Select [YL, G, MG]
Make selections for the crop frame to adjust positioning. The position of the selected crop frame can be adjusted with the control pad displayed in the Crop Adjust Select area.

- YL: Make position adjustments for the yellow crop frame.
- G: Make position adjustments for the green crop frame.
- MG: Make position adjustments for the magenta crop frame.

This is only enabled when [Crop Mode] is set to [Crop(1080)] or [Crop(720)].
Factory settings: YL

<NOTE>
- The color frame specified in [Crop Adjust Select] will be thicker when compared to other color frames.

X [0 to 2560]
Make settings for the position in the horizontal direction for the crop frame specified in [Crop Adjust Select].

- The variable range is 0 to 1920 when [Crop Mode] is [Crop(1080)], with 0 as the left edge and 1920 as the right edge, and only even numbers can be set.
- The variable range is 0 to 2560 when [Crop Mode] is [Crop(720)], with 0 as the left edge and 2560 as the right edge, and only even numbers can be set.

This is only enabled when [Crop Mode] is set to [Crop(1080)] or [Crop(720)].
Factory settings: 960

Y [0 to 1440]
Make settings for the position in the vertical direction for the crop frame specified in [Crop Adjust Select].

- The variable range is 0 to 1080 when [Crop Mode] is [Crop(1080)], with 0 as the upper edge and 1080 as the lower edge.
- The variable range is 0 to 1440 when [Crop Mode] is [Crop(720)], with 0 as the upper edge and 1440 as the lower edge.

This is only enabled when [Crop Mode] is set to [Crop(1080)] or [Crop(720)].
Factory settings: 540
Preset position screen [Preset position]

- Preset
  - The setting is confirmed with the [SET] button.

When a preset thumbnail is clicked, the camera moves to face towards a preset position that was registered beforehand. You can select Home and Preset001 to Preset100. Preset numbers are displayed in green when they have had a preset position registered in them.

**Preset001**

- Preset names are displayed. During the preset registration mode, you can select a preset name and change the display name. You can enter between 1 to 15 characters. The characters available are 0 to 9, A to Z, a to z, spaces, and underscores (_).

**[1] - [12]**

- Switches the page of the displayed preset thumbnails.

**Home**

- Move to home position.

**[SET]**

- When a preset thumbnail is clicked in the preset registration mode, it is registered in the preset position specified by the current condition.

**[DEL]**

- The unit moves to the preset delete mode. When a preset thumbnail is clicked in the preset delete mode, the specified preset position settings are deleted.

**[Save]**

- Acquire JPEG images (still images) and save them. PICT001 to PICT100 can be specified in the save destination so that you can update the thumbnail image for the corresponding preset number.

Web screen configurations (continued)
● Limitation Setting
This establishes the up, down, left and right limit settings of the pan-tilt head.
First, use the control pad to rotate the pan-tilt head to the position you want to set as the limit.
After the limit position has been selected, click the buttons corresponding to the following items to confirm.
The setting is cleared if the button is pressed again.

<table>
<thead>
<tr>
<th>Button</th>
<th>Action</th>
</tr>
</thead>
<tbody>
<tr>
<td>Tilt Up</td>
<td>Use this to save the current position as the upward limit.</td>
</tr>
<tr>
<td>Tilt Down</td>
<td>Use this to save the current position as the downward limit.</td>
</tr>
<tr>
<td>Pan Left</td>
<td>Use this to save the current position as the leftward limit.</td>
</tr>
<tr>
<td>Pan Right</td>
<td>Use this to save the current position as the rightward limit.</td>
</tr>
</tbody>
</table>

● Pan/Tilt Lens Control
This is used for camera control. The same operations are possible as with the camera controller operated in the live screen [Live]. (→ page 87)

Speed With Zoom Position [Off, On]
[Off] or [On] is set here for the function used to adjust the pan-tilt adjustment speed in conjunction with the zoom magnification.
When [On] is set, the panning and tilting operations will become slower in the zoom status.
This function has no effect during preset operations.
Factory settings: On

Focus Adjust With PTZ. [Off, On]
[Off] or [On] is set here for the function which compensates for out-of-focusing when it occurs during panning, tilting or zooming operations.
When [Off] is set, adjust the focus as required after zooming or set [Focus Mode] to [Auto].
This is only enabled when [Manual] has been selected as the [Focus Mode] setting.
Factory settings: Off

● Preset Setting

Preset Speed Unit [Speed Table, Time]
When reproducing the information such as camera direction registered in the preset memory, you can select whether to specify the playback time by speed or by time.

<table>
<thead>
<tr>
<th>Unit</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Speed Table</td>
<td>Specify the speed when playing during preset playback.</td>
</tr>
<tr>
<td>Time</td>
<td>Specify the time when playing during preset playback.</td>
</tr>
</tbody>
</table>

Factory settings: Speed Table

Preset Speed Table [Slow, Fast]
Set the preset speed table (Slow, Fast). During preset playback, presets are performed at [Preset Speed] (1 to 30) values that are based on the table set here.
This is only enabled when [Preset Speed Unit] is set to [Speed Table].
Factory settings: Fast

Preset Speed [1 to 30/1s to 99s]
When [Preset Speed Unit] is [Speed Table]: [1 to 30]
Set the pan/tilt operation speed in 30 steps when playing back the preset memory.
Factory settings: 20

<NOTE>
• When you set large [Preset Speed] values, the image may sway when the movement stops.

When [Preset Speed Unit] is [Time]: [1s to 99s]
Set the pan/tilt operation time between 1 and 99 seconds when playing back the preset memory.
Factory settings: 20s

<NOTE>
• Depending on the movement distance of pan/tilt, there may be a difference compared to the specified time.

Preset Scope [Mode A, Mode B, Mode C]
Selected here are the setting items to be recalled when the contents of the preset memory are regenerated.

<table>
<thead>
<tr>
<th>Mode</th>
<th>Setting Items</th>
</tr>
</thead>
<tbody>
<tr>
<td>Mode A</td>
<td>Pan, Tilt, Zoom (including digital zoom), Focus, Iris, Gain, white balance adjustment value</td>
</tr>
<tr>
<td>Mode B</td>
<td>Pan, Tilt, Zoom (including digital zoom), Focus, Iris</td>
</tr>
<tr>
<td>Mode C</td>
<td>Pan, Tilt, Zoom (including digital zoom), Focus</td>
</tr>
</tbody>
</table>

Factory settings: Mode A

Preset Digital Extender [Off, On]
Turns the preset digital extender function off/on.
When set to [On], the digital extender function configuration will be recalled when generating the preset memory.
When set to [Off], the digital extender function configuration will not be recalled when storing the preset memory.
Factory settings: Off
Preset Crop [Off, On]
When the preset memory is played back, set whether the reproduction of content set in the various [Crop Mode] menus is off/on.
When set to [On], the content set in the various [Crop Mode] menus is reproduced when preset memory is played back.
When set to [Off], the content set in the various [Crop Mode] menus is not reproduced when preset memory is played back, with the current values being kept.
Factory settings: Off

<NOTE>
• This is enabled only when [Format] in [System] screen is the following.
  2160/59.94p, 2160/29.97p
  2160/50p, 2160/25p
  2160/24p, 2160/23.98p
• This is only enabled when [Crop Mode] is set to [Crop(1080)] or [Crop(720)].

Preset Thumbnail Update [Off, On]
Turn off/on the function for registering the still image (thumbnail) for the images being output when a preset memory is registered.
When set to [On], the still image (thumbnail) for the images being output is registered when registering a preset memory.
When set to [Off], the still image (thumbnail) for the images being output is not registered when registering a preset memory, but rather the still image (thumbnail) previously registered is maintained.
Factory settings: On

<NOTE>
• When the IP for [OSD Mix] is [On], the menu screen is included in the thumbnails.
• When [Crop Mode] is [Crop(1080)] or [Crop(720)], the cropped still image is registered rather than the Full image.
• When uploading Camera(ALL) or Camera(SYSTEM) on the web screen or other access, the still image (thumbnail) that has been registered in preset memory will be erased. (→ page 140)

Preset Name [Reset, Hold]
When registering a preset memory, set whether to reset the previously registered preset name or keep it.

| Reset | When registering a preset memory, reset the previously registered preset name.
|       | The preset name after resetting will be [Preset***]. (** is a 3 digit preset number: 001 to 100) |
| Hold  | When registering a preset memory, keep the previously registered preset name. |

Factory settings: Reset

<NOTE>
• The factory default setting for the preset name is [Preset***]. (** is a 3 digit preset number: 001 to 100)
• The registration of preset names can be done in the web browser. 0 to 9, A to Z, a to z, _, and space

Preset Iris [Off, On]
When the preset memory is played back, set whether the reproduction of the values in the various menus related to Iris is off/on.
When set to [On], the values set in the various menus below are reproduced when preset memory is played back.
- Picture Level
- Iris Mode
- Auto Iris Speed
- Auto Iris Window
Factory settings: Off

<NOTE>
• Its setting takes effect when [Mode A] or [Mode B] has been selected as the [Preset Scope] setting.

Preset Zoom Mode [Mode A, Mode B]
Select the zoom operation for when preset memory is recalled.

| Mode A | Perform the zoom operation in line with the pan/tilt operation. |
| Mode B | Perform the zoom operation quicker than the pan/tilt operation. |

Factory settings: Mode A

Freeze During Preset [Off, On]
Turn the function for freezing images during preset playback off/on.
When this is set to [On], preset playback is performed with a still of the image immediately preceding the start of preset playback being output. The image freeze is released when preset playback is finished.
Factory settings: Off
Web screen configurations (continued)

Collaboration capability [Linkage]

- Tracking data output settings screen [Tracking Data Output]
  Select the output mode of the tracking data and the communication destination in the IP mode.
  Up to four addresses can be specified when the IP mode is enabled.

- Setting status
  Displays the output mode of tracking data and the destinations in IP mode.

<table>
<thead>
<tr>
<th>Setting status</th>
<th>Serial</th>
<th>IP(UDP)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Connection type</td>
<td>Off</td>
<td>Off</td>
</tr>
<tr>

<td>4. 192.168.0.114 1114</td>
<td></td>
</tr>
</tbody>
</table>

- Connection type

<table>
<thead>
<tr>
<th>Connection type</th>
<th>Serial</th>
<th>IP(UDP)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Serial</td>
<td>On</td>
<td>Off</td>
</tr>
</tbody>
</table>

Serial [On, Off]

Sets the function [On] or [Off] to output the tracking data, such as Pan/Tilt/Zoom or other information from Serial Output (RS-422), synchronized with the Genlock signal. (→ page 58)

When [Serial] is set to [On], a warning message is displayed. Click the [OK] button to enable the settings.

Factory settings: Off

<NOTE>
- The serial connection of the remote controller (AW-RP150, etc.) cannot be made if [Serial] is already [On].
- In the following cases, the tracking data output may be delayed or the value may not be updated.
  - While viewing the OSD menu
  - While recalling the preset value during an ongoing preset recall
  - When executing AWB/ABB
  - When a red or a green tally signal input has been changed between Off and On
  - When deleting a preset memory
  - When an output image is flipped (turned upside down or left-right reversed)
  - After switching [Scene]
  - After switching [Iris Mode]
  - After switching [Super Gain]
  - After switching [White Balance Mode]
  - After switching each item of [Color Temperature Setting]
  - After switching [Gamma Mode]
  - After switching [Matrix Type]
  - After switching [Focus Mode]
  - After switching [Zoom Mode]
  - After switching [Max Digital Zoom]
  - After switching [Digital Extender]
  - After switching between [Fan1] and [Fan2]
  - After switching [OSD Mix]
  - After switching [Tally]

- After moving the crop frame of [Crop Mode]
- After switching [Install Position]
- After switching [Preset Speed Unit]
- When executing [Reset to the default (Except the network settings)] of [Maintenance]

IP(UDP) [On, Off]

Sets the UDP output function [On] or [Off] to output tracking data, such as Pan/Tilt/Zoom or other information from the IP output, synchronized with the Genlock signal. (→ page 59)

When [IP(UDP)] is set to [On], a warning message is displayed. Click the [OK] button to enable the settings.

Factory settings: Off

<NOTE>
- When [IP(UDP)] is [On], video transmission via IP may be delayed or the video may suffer frame loss.
  We recommend setting [IP(UDP)] to [Off] to avoid the delay or frame loss due to the video transmission via IP.
- In the following cases, the tracking data output may be delayed or the value may not be updated.
  - When performing video transmission via IP (M-JPEG/H.264/H.265/RTMP/RTMPS/NDI|HX)
  - When opening the web screen (live screen [Live] or the web setting screen [Setup])
  - While viewing the OSD menu
  - While recalling the preset value during an ongoing preset recall
  - When executing AWB/ABB
  - When a red or a green tally signal input has been changed between Off and On
  - When deleting a preset memory
  - When an output image is flipped (turned upside down or left-right reversed)
  - After switching [Scene]
  - After switching [Iris Mode]
  - After switching [Super Gain]
  - After switching [White Balance Mode]
  - After switching each item of [Color Temperature Setting]
  - After switching [Gamma Mode]
  - After switching [Matrix Type]
  - After switching [Focus Mode]
  - After switching [Zoom Mode]
  - After switching [Max Digital Zoom]
  - After switching [Digital Extender]
  - After switching between [Fan1] and [Fan2]
  - After switching [OSD Mix]
  - After switching [Tally]
  - After moving the crop frame of [Crop Mode]
  - After switching [Install Position]
  - After switching [Preset Speed Unit]
  - When executing [Reset to the default (Except the network settings)] of [Maintenance]
IP out

Output client select [Client 1 to 4]
Enable or disable up to four clients to forward the tracking data when [IP(UDP)] is [On].
Forwards the tracking data via UDP such as Pan/Tilt/Zoom or other information to the clients that are set to enable on this screen.
The setting is confirmed with the [Set] button.
Factory settings:
- Client1: Disable
- Client2: Disable
- Client3: Disable
- Client4: Disable

<NOTE>
- Disable the client that does not require the forwarding of the tracking data because the UDP packet is transmitted to the enabled client at the system frequency interval.
- When multiple clients are enabled, the timing of transmitting the UDP packet to the second and subsequent clients will always be delayed relative to the Genlock signal.
  (Approximately 200 to 300 μs delay will occur for each client. The latency may be increased depending on the system status or the network environment of the unit.)

Client1 to 4

IP address(IPv4)
Sets the destination IP address to forward the tracking data such as Pan/Tilt/Zoom or other information via UDP.
The setting is confirmed with the [Set] button.
Factory settings:
- Client1: 192.168.0.111
- Client2: 192.168.0.112
- Client3: 192.168.0.113
- Client4: 192.168.0.114

<NOTE>
- The address to forward the tracking data can only be configured as IPv4.
- A multicast address cannot be specified for the destination address.

Port
Sets the destination port number to forward the tracking data such as Pan/Tilt/Zoom or other information via UDP.
The setting is confirmed with the [Set] button.
The following port numbers are used by the unit so they cannot be used:
20, 21, 23, 25, 42, 53, 67, 68, 69, 80, 110, 123, 161, 162, 443, 554, 995, 10669, 10670, 59000 to 61000
Factory settings:
- Client1: 1111
- Client2: 1112
- Client3: 1113
- Client4: 1114

<NOTE>
- You cannot set up clients having a combination of two or more IP addresses with duplicated ports.
Web screen configurations (continued)

**User management screen [User mng.]**

The users and personal computers (IP addresses) that can access the unit from personal computers and mobile terminals are registered in the User management screen [User mng.].

The User management screen [User mng.] consists of [User auth.] and [Host auth.].

**User authentication screen [User auth.]**

Click the [User auth.] of User management screen [User mng.]. Configure the user authentication settings for the personal computers and mobile terminals that can access the unit. Up to 9 users can be registered.

> **<NOTE>**
> • If user authentication fails more than 8 times within a 30-second period from the same IP address (personal computer), access to the unit will be disabled for a certain period.

**Setting status**

The current user authentication settings and user authentication method are displayed. The currently registered account information is also displayed.

<table>
<thead>
<tr>
<th>Setting status</th>

</tr>
</tbody>
</table>

**Factory settings:**

- 1. Administrator
Host authentication screen [Host auth.]
Click the [Host auth.] of User management screen [User mng.].
Configure the host authentication settings that restrict the personal
computers (IP addresses) that can access the unit.

Setting status

Host auth.
The host authentication settings are displayed.

Host IP address
The host IP address is displayed.

Access level
The host access level is displayed.

Mode

Host auth. [Off, On]
Host authentication is set to [On] or [Off] here.
The setting is confirmed with the [Set] button.
Factory settings: Off

Add host

IP address
The IP address of the personal computer from which access to the
camera is allowed is input here. The host name cannot be input as
the IP address.

<NOTE>
• When the "IP address/subnet mask length" is input, the personal
computers which are allowed to access the camera can be
restricted on a subnet by subnet basis.
If, for instance, “192.168.0.1/24” has been input and the [2. Camera
control] setting has been selected as the [Access level] setting, the
personal computers from “192.168.0.1” to “192.168.0.254” will be
able to access the camera at the [2. Camera control] access level.
• When an already registered IP address is input and the [Set] button
is clicked, the host information will be overwritten.

Access level [1. Administrator, 2. Camera control]
Select the host access level.
The setting is confirmed with the [Set] button.

<table>
<thead>
<tr>
<th>Access level</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>1. Administrator</td>
<td>This access level allows the user to perform all the unit’s operations.</td>
</tr>
<tr>
<td>2. Camera control</td>
<td>This access level allows you to display images and control the unit. The unit cannot be set.</td>
</tr>
</tbody>
</table>

Factory settings: 2. Camera control

Delete host
Delete the host information registered in the unit.
You can delete selected host information by clicking the [Delete] button at the right.

<table>
<thead>
<tr>
<th>Host Name</th>
<th>Access level</th>
<th>Delete</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>192.168.0.10</td>

<td>192.168.0.30</td>
<td>Camera control</td>
</tr>
</tbody>
</table>

Click the [Network] of the Network setup screen [Network]. The setting is confirmed with the [Set] button.

The following information is required to configure network settings. Consult your network administrator or Internet service provider.

- IP address
- Subnet mask
- Default gateway (when using a gateway server or router)
- HTTP port
- DNS primary and secondary server addresses (when using DNS)

### IPv4 network

**DHCP [On, Off]**

Select the method in which the IP address is configured.

- **Factory settings:** Off
- **<NOTE>**
  - When [DHCP] is set to [On], AW-RP150’s automatic configuration of IP address (AUTO IP) cannot be used.

**IP address (IPv4)**

Input the unit’s IP address here when the DHCP function is not going to be used. Input an address that will not duplicate an existing IP address which has been set for a personal computer or another network camera.

- **Factory settings:** 192.168.0.10
- **<NOTE>**
  - Multiple IP addresses cannot be used even when the DHCP function is used. For details on the DHCP server settings, consult your network administrator.

**Subnet mask**

Input the unit’s subnet mask here if the DHCP function is not going to be used.

- **Factory settings:** 255.255.255.0
- **<NOTE>**
  - Multiple IP addresses cannot be used for the default gateway even when the DHCP function is used. For details on the DHCP server settings, consult your network administrator.

**Default gateway**

Input the unit’s default gateway if the DHCP function is not going to be used.

- **Factory settings:** 192.168.0.1
- **<NOTE>**
  - Multiple IP addresses cannot be used for the default gateway even when the DHCP function is used. For details on the DHCP server settings, consult your network administrator.

**DNS [Auto, Manual]**

Whether the DNS server address is to be acquired automatically (Auto) or manually (Manual) is input here.

- **Factory settings:** Manual
- **<NOTE>**
  - Multiple IP addresses cannot be used for the default gateway even when the DHCP function is used. For details on the DHCP server settings, consult your network administrator.

### DNS [Auto, Manual]

Whether the DNS server address is to be acquired automatically (Auto) or manually (Manual) is input here.

If [Manual] has been selected, the DNS settings must be established. If [Auto] is selected when the DHCP function is going to be used, the DNS server address is acquired automatically.

For details, consult your system administrator.

- **Factory settings:** Manual

#### Primary server address

**Secondary server address**

Input the IP address of the DNS server if the [Manual] setting has been selected for [DNS].

For details on the IP address of the DNS server, consult your system administrator.
IPv6 network

**Manual [On, Off]**
Enable or disable manual configuration of the IPv6 address.

| On | Enter the IPv6 address manually. |
| Off | Disable manual entry of the IPv6 address. |

Factory settings: Off

**IP address(IPv6)**
When [Manual] is set to [On], the IPv6 address must be entered manually.

Be sure to enter an address unique from other devices.

<NOTE>
- When connecting to the manually specified IP address through a router, use an IPv6-compatible router, and enable the automatic configuration function for the IPv6 address. Be sure to configure an IPv6 address that includes the prefix information provided by the IPv6-compatible router. For details, refer to the operating instructions for the router.

Default gateway
When [Manual] is set to [On] for [IPv6 network], enter the default gateway for the unit’s IPv6 network.

Factory settings: blank

**DHCPv6 [On, Off]**
Enable or disable use of the IPv6 DHCP function.
Configure the DHCP server so that the same IP address is not configured for a personal computer that does not use the DHCP function and other network cameras. For details on server settings, consult your network administrator.

| On | Use the IPv6 DHCP function. |
| Off | Do not use the IPv6 DHCP function. |

Factory settings: Off

**DNS**

Primary server address
Secondary server address
Enter the IPv6 address of the DNS server.
For details on the IPv6 address of the DNS server, consult your system administrator.

Common (to IPv6/IPv4)

**HTTP port [1 to 65535]**
Port numbers are allocated separately.
The following port numbers are used by the unit so they cannot be used.
20, 21, 23, 25, 42, 53, 67, 68, 69, 110, 123, 161, 162, 443, 554, 995, 10669, 10670, 59000 to 61000
Factory settings: 80

**Max RTP packet size [Unlimited-1500byte, Limited-1280byte]**
Specify whether to limit the size of RTP packets sent from the camera when using RTP to view camera images.

| Unlimited-1500byte | Unlimited (1500 byte) |
| Limited-1280byte | Limited (1280 byte) |

Factory settings: Unlimited-1500byte

Normally, it is recommended that the [Unlimited-1500byte] setting be used.
Select [Limited-1280byte] when the packet size of the used communication line is limited. For details on the maximum packet size of communication lines, consult your network administrator.

**HTTP max segment size (MSS) [Unlimited(1460byte), Limited(1280byte), Limited(1024byte)]**
Select whether to limit the maximum segment size (MSS) transmitted by a camera when viewing camera images using HTTP.

| Unlimited(1460byte) | Unlimited (1460 byte) |
| Limited(1280byte) | Limited (1280 byte) |
| Limited(1024byte) | Limited (1024 byte) |

Factory settings: Unlimited(1460byte)

Normally, it is recommended that the default setting be used.
Select [Limited(1024byte)]/[Limited(1280byte)] when the maximum segment size (MSS) of the used communication line is limited. For details on the maximum segment size (MSS) of communication lines, consult your network administrator.
Easy IP Setup accommodate period
[20min, Unlimited]
Select [20min] or [Unlimited] as the time for enabling the operation of the network settings from the Easy IP Setup Software.

<table>
<thead>
<tr>
<th>Setting</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>20min</td>
<td>The setting operations from the Easy IP Setup Software are enabled for 20 minutes after the camera has started operating.</td>
</tr>
<tr>
<td>Unlimited</td>
<td>The setting operations from the Easy IP Setup Software are enabled at all times.</td>
</tr>
</tbody>
</table>

Factory settings: 20min

<NOTE>
- The camera screen can be opened because the camera display in the Easy IP Setup Software is constantly enabled.
- For details on the address settings of each server, consult your network administrator.
- The port forwarding function converts a global IP address to a private IP address, and includes “static IP masquerade” and “network address translation (NAT)”. This function is set to the router.
- To access the camera via the Internet after connecting it to a router, it will be necessary to set an individual HTTP port No. for each network camera and to convert the address using the router’s port forwarding function. For details, refer to the operating instructions for the router.

Recommended network setting for internet
Perform the recommended settings to connect the camera to the Internet.
When the [Execute] button is clicked, a dialog box will be displayed. To execute, click the [OK] button.

- **[JPEG/H.264] in the Image screen [Image/Audio]**
  - When “Streaming mode” is set to “H.264”

• [Network] in the Network setup screen [Network]
Common IPv6/v4
Max RTP packet size: Limited-1280byte
HTTP max segment size (MSS): Limited(1280byte)

## Advanced network setting screen [Advanced]
Click the [Advanced] in the network setup screen [Network].
Settings relating to the NTP, UPnP and HTTPS functions are performed here.
Click the links to each item to move to the respective setting page.

### Setting status

<table>
<thead>
<tr>
<th>Setting status</th>
<th>Setting status</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>HTTP Port number</strong></td>
<td>Displays the port number configured via UPnP port forwarding.</td>
</tr>
<tr>
<td><strong>HTTP Status</strong></td>
<td>Displays the port forwarding status.</td>
</tr>
<tr>
<td><strong>HTTPS Port number</strong></td>
<td>Displays the port number configured via UPnP port forwarding.</td>
</tr>
<tr>
<td><strong>HTTPS Status</strong></td>
<td>Displays the port forwarding status.</td>
</tr>
<tr>
<td><strong>Router global address</strong></td>
<td>Displays the global address of the router.</td>
</tr>
</tbody>
</table>
### NTP

Settings relating to the NTP server address and port No. are performed here.

The setting is confirmed with the [Set] button.

<table>
<thead>
<tr>
<th><strong>Synchronization with NTP [On, Off]</strong></th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>On</strong></td>
<td>The time adjusted automatically through synchronization with the NTP server will be used as this unit’s standard time.</td>
</tr>
<tr>
<td><strong>Off</strong></td>
<td>The time set in [Date/time] of the Basic screen [Basic] will be used as this unit’s standard time.</td>
</tr>
</tbody>
</table>

**Factory settings:** Off

#### NTP server address setting [Auto, Manual]

Select the method to acquire the NTP server address.

- **Auto**: Acquires the NTP server address from the DHCP server.
- **Manual**: Sets the address by inputting the NTP server address in [NTP server address].

**Factory settings:** Manual

**<NOTE>**
- To acquire the NTP server address from the DHCP server, [DHCP] or [DHCPv6] must be set to [On] in the [Network] of the network setup screen [Network]. (→ page 124)

#### NTP server address

When [Manual] is selected in the [NTP server address setting], input the IP address or host name of the NTP server.

- **Maximum number of characters**: 1 to 128 characters
- **Characters that can be entered**: Alphanumeric characters, symbols : . _ -

**Factory settings:** blank

**<NOTE>**
- To input the [NTP server address] host name, the [DNS] setting must be selected on the [Network] of the network setup screen [Network]. (→ page 124)

#### NTP port [1 to 65535]

Input the port No. of the NTP server.

The following port numbers are used by the unit so they cannot be used.

20, 21, 23, 25, 42, 53, 67, 68, 69, 80, 110, 161, 162, 443, 554, 995, 10669, 10670

**Factory settings:** 123

#### Time adjustment interval [1h to 24h]

Selects the interval (1 to 24 hours in 1-hour increments) for acquiring the time from the NTP server.

**Factory settings:** 1h

---

### UPnP

This unit supports UPnP (Universal Plug and Play). Using the UPnP function allows the following to be set automatically.

- Sets the router’s port forwarding function. (However, a UPnP-compatible router is necessary.)

This setting is useful when accessing the camera from the Internet.

<table>
<thead>
<tr>
<th><strong>Auto port forwarding [On, Off]</strong></th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>On</strong></td>
<td>Uses the router’s port forwarding function.</td>
</tr>
<tr>
<td><strong>Off</strong></td>
<td>The router’s port forwarding function is not used.</td>
</tr>
</tbody>
</table>

**Factory settings:** Off

**<NOTE>**
- The port number may be changed by automatic port forwarding. If the number is changed, the port No. of the camera registered to the personal computer or recorder must be changed.
- The UPnP function may be used when the camera is connected to the IPv4 network. IPv6 is not supported.
- To confirm that automatic port forwarding is correctly set, click the [Setting status] in the advanced network setting screen [Advanced] to confirm that the [HTTP Status] or [HTTPS Status] is set to [Enable]. (→ page 127)
  - If [Enable] is not displayed, refer to “Cannot access from a web browser” in the “Troubleshooting” section. (→ page 149)
Using the HTTPS function enables access to the camera to be encrypted and communication safety to be improved.

The setting is confirmed with the [Set] button.
See page 131 for details on the HTTPS setup method.

**CRT key generate**
A CRT key (SSL encryption key) is generated by HTTPS.
To generate a CRT key, click the [Execute] button to display the [CRT key generate] dialog.
For details, refer to "Generating a CRT key (SSL encryption key)" (→ page 132).

**Self-signed Certificate - Generate**
A self-signed security certificate is generated by HTTPS. (Self-signed Certificate)
To generate a self-signed certificate (security certificate), click the [Execute] button to display the [Self-signed Certificate - Generate] dialog and perform the operation.
For details, refer to "Generating a self-signed certificate (security certificate)" (→ page 132).

**Self-signed Certificate - Information**
This displays information relating to the self-signed certificate (security certificate).
When the [Confirm] button is clicked, the registered content of the generated self-signed certificate (security certificate) is displayed in the [Self-signed Certificate - Confirm] dialog.
Click the [Delete] button to delete the generated self-signed certificate (security certificate).

**CA Certificate - Generate Certificate Signing Request**
When using a security certificate issued by the Certificate Authority (CA) as a security certificate for HTTPS, a Certificate Signing Request (CSR) is generated for application to the Certificate Authority (CA).
To generate a Certificate Signing Request (CSR), click the [Execute] button to display the [CA Certificate - Generate Certificate Signing Request] dialog and perform the operation.
For details, refer to "Generating a Certificate Signing Request (CSR)" (→ page 133).

**CA Certificate - CA Certificate install**
This displays information relating to server certificates (security certificates) issued by the Certificate Authority (CA), which are to be or are already installed.
In the [File Open] dialog, which is displayed by clicking the [Select] button, select the file of the server certificate (security certificate) issued by the Certificate Authority (CA) and click the [Execute] button to install the server certificate (security certificate).
If the server certificate (security certificate) is installed, its file name will be displayed.
For details, refer to "Installing a Server Certificate" (→ page 134).

**CA Certificate - Information**
This displays information relating to the server certificate (security certificate).
When the [Confirm] button is clicked, the registered content of the installed server certificate (security certificate) is displayed in the [Server Certificate - Confirm] dialog. If the server certificate (security certificate) is not installed, the content of the generated Certificate Signing Request (CSR) is displayed.
Click the [Delete] button to delete the installed server certificate (security certificate).

**Connection**
This sets the method to connect to the unit.

| HTTP | Only HTTP connection is possible. |
| HTTPS | Only HTTPS connection is possible. |

**Factory settings: HTTP**
For details, refer to "Setting the Connection Method" (→ page 134).

- When using an HTTPS connection, network connection with the AW-RP120, AW-RP50, and AK-HRP200 will be disabled.
HTTPS port [1 to 65535]
This sets the Port No. to be used with HTTPS.
The following port numbers are used by the unit so they cannot be used.
20, 21, 23, 25, 42, 53, 67, 68, 69, 80, 110, 123, 161, 162, 554, 995, 10669, 10670, 59000 to 61000
Factory settings: 443

<NOTE>
• This unit will restart if the connection method is changed.
• When using a self-signed certificate:
  A warning screen is displayed when accessing the camera by HTTPS for the first time. Install the self-signed certificate (security certificate) in your personal computer in accordance with the screen instructions. (→ page 135)
• When using a server certificate:
  Install the Certificate Authority (CA) root certificate or intermediate certificate in your web browser in advance.
  Follow the Certificate Authority (CA) procedures to acquire and install root certificates and intermediate certificates.
• When accessing the camera by HTTPS, the image display speed and frame rate of the moving image may reduce.
• When accessing the camera by HTTPS, it may take some time for the images to be displayed.
• When accessing the camera by HTTPS, images may be disturbed and sound may be interrupted.
• The maximum number of cameras that can be connected simultaneously depends on the maximum image size and distribution format.

HTTPS mode [TLS1.0/1.1/1.2, TLS1.2]
This sets the encryption protocol when accessing the camera with HTTPS.

<table>
<thead>
<tr>
<th>TLS1.0/1.1/1.2</th>
<th>TLS1.2</th>
</tr>
</thead>
<tbody>
<tr>
<td>Permits connection with TLS1.0/1.1/1.2 when HTTPS is enabled.</td>
<td>Permits connection with TLS1.2 when HTTPS is enabled.</td>
</tr>
</tbody>
</table>

Factory settings: TLS1.2

RTSP
This performs settings related to the RTSP function. The RTSP function sets the RTSP transmission port and RTSP request URL used during IP image transmission.
The setting is confirmed with the [Set] button.

<table>
<thead>
<tr>
<th>RTSP</th>
<th>RTSP request URL</th>
</tr>
</thead>
<tbody>
<tr>
<td>RTSP port</td>
<td>554 (146506)</td>
</tr>
<tr>
<td>RTSP request URL H.264(1)</td>
<td>MediaInput/h264/stream_1</td>
</tr>
<tr>
<td>RTSP request URL H.264(2)</td>
<td>MediaInput/h264/stream_2</td>
</tr>
<tr>
<td>RTSP request URL H.264(3)</td>
<td>MediaInput/h264/stream_3</td>
</tr>
<tr>
<td>RTSP request URL H.264(4)</td>
<td>MediaInput/h264/stream_4</td>
</tr>
<tr>
<td>RTSP request URL H.265(1)</td>
<td>MediaInput/h265/stream_1</td>
</tr>
</tbody>
</table>

RTSP port [1 to 65535]
Sets the RTSP reception port no.
The following port numbers are used by the unit so they cannot be used.
20, 21, 23, 25, 42, 53, 67, 68, 69, 80, 110, 123, 161, 162, 443, 995, 10669, 10670, 59000 to 61000
Factory settings: 554

RTSP request URL
Sets up the URL for RTSP when making IP image transmission demands to this unit.

<table>
<thead>
<tr>
<th>RTSP request URL H.264(1)</th>
<th>RTSP for H.264(1) image transmission</th>
</tr>
</thead>
<tbody>
<tr>
<td>RTSP request URL H.264(2)</td>
<td>RTSP for H.264(2) image transmission</td>
</tr>
<tr>
<td>RTSP request URL H.264(3)</td>
<td>RTSP for H.264(3) image transmission</td>
</tr>
<tr>
<td>RTSP request URL H.264(4)</td>
<td>RTSP for H.264(4) image transmission</td>
</tr>
<tr>
<td>RTSP request URL H.265(1)</td>
<td>RTSP for H.265(1) image transmission</td>
</tr>
</tbody>
</table>

Factory settings:
| RTSP request URL H.264(1) | MediaInput/h264/stream_1 |
| RTSP request URL H.264(2) | MediaInput/h264/stream_2 |
| RTSP request URL H.264(3) | MediaInput/h264/stream_3 |
| RTSP request URL H.264(4) | MediaInput/h264/stream_4 |
| RTSP request URL H.265(1) | MediaInput/h265/stream_1 |

• Up to 255 characters can be entered.
• The following characters can be displayed.

<table>
<thead>
<tr>
<th>Numeric characters</th>
<th>0123456789</th>
</tr>
</thead>
<tbody>
<tr>
<td>Alphabetical characters (upper and lower cases)</td>
<td>ABCDEFGHIJKLMNOPQRSTUVWXYZabcdeghijklmnopqrstuvwxyz</td>
</tr>
<tr>
<td>Symbols</td>
<td>/ - _</td>
</tr>
</tbody>
</table>

<NOTE>
• RTSP request URL cannot have the same URL.
**HTTPS settings [HTTPS]**

This encrypts access to the camera and sets HTTPS to improve communication safety. Setting HTTPS is performed by following the procedures below. The setting is confirmed with the [Set] button.

1. Generating a CRT key (SSL encryption key) (→ page 132)
2. Generating a self-signed certificate (security certificate) (→ page 132)
3. Generating a Certificate Signing Request (CSR) (→ page 133)
4. Installing a Server Certificate
   - Request to Certificate Authority (CA)
   - Generate Server Certificate
5. Setting the Connection Method (→ page 134)

**Accessing the Camera by HTTPS**

**<NOTE>**
- When using a server certificate, the process from applying to the Certificate Authority (CA) to issuing a server certificate must be performed between customers and the Certificate Authority (CA).
- Use either a self-signed certificate or server certificate. When simultaneously generating a self-signed certificate and installing a server certificate, this unit will prioritize the server certificate.
Generating a CRT key (SSL encryption key)

[CRT key generate]

<NOTE>
• A CRT key cannot be generated when self-signed certificates and server certificates are enabled.
• The size of the key that can be used by the Certificate Authority (CA) differs when using a server certificate. Confirm in advance the size of the key that can be used.
• Generating a CRT key takes about 1 minute for 1024 bit and about 2 minutes for 2048 bit. Do not operate the web browser until CRT key generation is complete. Image display and communication speed may reduce while generating a CRT key.

1. Click the [Execute] button in [CRT key generate].

The [Current CRT key] dialog is displayed.

- The size of the generated CRT key is selected from [1024bit] or [2048bit] in [CRT key generate] – [RSA key size].

<NOTE>
• When using a server certificate, the RSA key size must be in accordance with the demands of the Certificate Authority (CA) which will be applied to.

2. Click the [Execute] button.

CRT key generation starts.

When CRT key generation stops, the size of the CRT key generated by the [Current CRT key] and the date and time generation concluded will be displayed.

<NOTE>
• Perform procedures 1 to 3 to change (update) the generated CRT key. Because the CRT key, self-signed certificate and server certificate are enabled as a set, it will be necessary to once again generate a self-signed certificate or apply for a server certificate when the CRT key is changed.
• When the CRT key is changed, previous CRT keys are historically managed one at a time. Clicking the [History] button in the [CRT key] of the [Current CRT key] dialog displays the [Previous CRT key] dialog, allowing confirmation of the key size and the date and time generation was completed.

2. Input information relating to the certificate to be generated.

Items to be entered are as follows.

<table>
<thead>
<tr>
<th>Item</th>
<th>Description</th>
<th>Maximum number of characters</th>
</tr>
</thead>
<tbody>
<tr>
<td>Common Name</td>
<td>Inputs the camera address or host name.</td>
<td>64 characters</td>
</tr>
<tr>
<td>Country</td>
<td>Inputs the country code.</td>
<td>2 characters: country code</td>
</tr>
<tr>
<td>State</td>
<td>Inputs the name of the state.</td>
<td>128 characters</td>
</tr>
<tr>
<td>Locality</td>
<td>Inputs the name of the city.</td>
<td>128 characters</td>
</tr>
<tr>
<td>Organization</td>
<td>Inputs the name of the organization.</td>
<td>64 characters</td>
</tr>
<tr>
<td>Organizational Unit</td>
<td>Inputs the name of the organizational unit.</td>
<td>64 characters</td>
</tr>
<tr>
<td>CRT key</td>
<td>Displays the size of the current CRT key and the date and time generation was completed.</td>
<td></td>
</tr>
</tbody>
</table>

<NOTE>
• Characters that can be input for [Common Name], [Country], [State], [Locality], [Organization], [Organizational Unit] are 0 to 9, A to Z, a to z, and the following symbols: -, _, + / ( ).
• When connecting the camera to the Internet, set the address or host name to be accessed from the Internet in [Common Name]. In this case, when accessing the camera locally, a security warning screen is displayed every time the camera is accessed even when a security certificate is installed.
• When inputting the IPv6 address in [Common Name], surround the address with [ ].
  e.g. [2001:db8::10]
3. Click the [OK] button after inputting the address.

A self-signed certificate is generated.

<NOTE>
• Information relating to the generated self-signed certificate is displayed in [Self-signed Certificate] - [Information]. The following is displayed depending on the status of the self-signed security certificate.

<table>
<thead>
<tr>
<th>Displayed content</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Not generated</td>
<td>When the self-signed certificate is not generated</td>
</tr>
<tr>
<td>Invalid (Reason: CA Certificate installed)</td>
<td>When the self-signed certificate is already generated and the server certificate is already installed</td>
</tr>
<tr>
<td>• The server certificate is enabled in this case.</td>
<td></td>
</tr>
<tr>
<td>[Common Name] of self-signed certificate</td>
<td>When the self-signed certificate is already generated and enabled</td>
</tr>
</tbody>
</table>

• When the [Confirm] button is clicked, the registered content of the generated self-signed certificate (security certificate) is displayed in the [Self-signed Certificate - Confirm] dialog.

<table>
<thead>
<tr>
<th>Item</th>
<th>Description</th>
<th>Maximum number of characters</th>
</tr>
</thead>
<tbody>
<tr>
<td>Common Name</td>
<td>Inputs the camera address or host name.</td>
<td>64 characters</td>
</tr>
<tr>
<td>Country</td>
<td>Inputs the country code.</td>
<td>2 characters: country code</td>
</tr>
<tr>
<td>State</td>
<td>Inputs the name of the state.</td>
<td>128 characters</td>
</tr>
<tr>
<td>Locality</td>
<td>Inputs the name of the city.</td>
<td>128 characters</td>
</tr>
<tr>

<td>Inputs the name of the organization.</td>
<td>64 characters</td>
</tr>
<tr>
<td>[Organizational Unit]</td>
<td>Inputs the name of the organizational unit.</td>
<td>64 characters</td>
</tr>
<tr>
<td>CRT key</td>
<td>Displays the size of the current CRT key and the date and time generation was completed.</td>
<td></td>
</tr>
</tbody>
</table>

2. Input information relating to the certificate to be generated.

Items to be entered are as follows.

<table>
<thead>
<tr>
<th>Item</th>
<th>Description</th>
<th>Maximum number of characters</th>
</tr>
</thead>
<tbody>
<tr>
<td>Common Name</td>
<td>Inputs the camera address or host name.</td>
<td>64 characters</td>
</tr>
<tr>
<td>Country</td>
<td>Inputs the country code.</td>
<td>2 characters: country code</td>
</tr>
<tr>
<td>State</td>
<td>Inputs the name of the state.</td>
<td>128 characters</td>
</tr>
<tr>
<td>Locality</td>
<td>Inputs the name of the city.</td>
<td>128 characters</td>
</tr>
<tr>
<td>[Organizational Unit]</td>
<td>Inputs the name of the organizational unit.</td>
<td>64 characters</td>
</tr>
<tr>
<td>CRT key</td>
<td>Displays the size of the current CRT key and the date and time generation was completed.</td>
<td></td>
</tr>
</tbody>
</table>

<NOTE>
• When using a server certificate, the information to be input must be in accordance with the demands of the Certificate Authority (CA), which will be applied to.
• Characters that can be input for [Common Name], [Country], [State], [Locality], [Organization], [Organizational Unit] are 0 to 9, A to Z, a to z, and the following symbols: -_, +/().

3. Click the [OK] button after inputting the address.

The [Save As] dialog is displayed.

4. In the [Save As] dialog, assign a file name to the Certificate Signing Request (CSR) and save it in personal computer.

Apply to the Certificate Authority (CA) using the saved Certificate Signing Request (CSR).

<NOTE>
• A server certificate is issued for both the generated Certificate Signing Request (CSR) and CRT key. The issued server certificate can no longer be used when generating/updating the CRT key after applying to the Certificate Authority (CA).
• The Certificate Signing Request (CSR) generated by this unit is in a PEM format.
Installing a Server Certificate

[CA Certificate - CA Certificate install]

<NOTE>
- A server certificate (security certificate) cannot be installed if a Certificate Signing Request (CSR) has not been generated.
- The server certificate must have been issued by the Certificate Authority (CA) in order to install it.

1. Click the [Select] button in [CA Certificate - CA Certificate install].
   The [Open File] dialog is displayed.

2. Select the server certificate file and click [Open]. Then click the [Execute] button.
   The server certificate is installed.

<NOTE>
- The name of the host registered to the installed server certificate is displayed in [CA Certificate] - [Information]. The following is also displayed depending on the status of the server certificate.

<table>
<thead>
<tr>
<th>Displayed content</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Invalid</td>
<td>When the server certificate is not installed</td>
</tr>
<tr>
<td>[Common Name] of server certificate</td>
<td>When the server certificate is already installed and enabled</td>
</tr>
<tr>
<td>Expired</td>
<td>When the effective period of the server certificate has expired</td>
</tr>
</tbody>
</table>

- When the [Confirm] button is clicked, the content of the installed server certificate (security certificate) is displayed in the [CA Certificate - Confirm] dialog. (An asterisk is displayed in the [Organizational Unit] field only.)

- Click the [Delete] button to delete the installed server certificate (security certificate).
- When [HTTPS] is selected in [Connection], the server certificate (security certificate) cannot be deleted.
- Perform STEP 1 to STEP 2 to update a server certificate.
- To delete an enabled server certificate (security certificate), confirm that there is a backup to the said certificate in your personal computer or recording media. A server certificate (security certificate) will be needed to reinstall it.
- The HTTPS function can no longer be used when the effective period of the server certificate has expired. In such a case, the connection method is changed to HTTP when the unit is restarted. Update the server certificate before its effective period expires.
- The effective period of the server certificate can be confirmed by double-clicking the server certificate file issued by the Certificate Authority (CA).

Setting the Connection Method

[Connection]

1. Set the method to access the camera in [Connection].
   HTTP: Only HTTP connection is possible.
   HTTPS: Only HTTPS connection is possible.

<NOTE>
- When using an HTTPS connection, network connection with the AW-RP120, AW-RP50, and AK-HRP200 will be disabled.

2. Set the Port No. to be used with HTTPS in [HTTPS port].
   Port No. that can be selected: 1 to 65535
   The following port numbers are used by the unit so they cannot be used:
   20, 21, 23, 25, 42, 53, 67, 68, 69, 80, 110, 123, 161, 162, 554, 995, 10669, 10670, 59000 to 61000
   Factory settings: 443

3. Set the encryption protocol used with HTTPS in [HTTPS mode].
   TLS1.0/1.1/1.2: Connection with TLS1.0/1.1/1.2 is possible.
   TLS1.2: Connection with TLS1.2 is possible.

4. Click the [Set] button.
   The camera restarts and access to the camera via HTTPS is enabled.

<NOTE>
- This unit will restart if the connection method is changed.
- Using a self-signed certificate
   A warning screen is displayed when accessing the camera by HTTPS for the first time. Install the self-signed certificate (security certificate) in your personal computer in accordance with the screen instructions. (→ page 135)

- Using a server certificate
   Install the Certificate Authority (CA) root certificate or intermediate certificate in your web browser in advance. Follow the Certificate Authority (CA) procedures to acquire and install root certificates and intermediate certificates.
   - When accessing the camera by HTTPS, the image display speed and frame rate of the moving image may reduce.
   - When accessing the camera by HTTPS, it may take some time for the images to be displayed.
   - When accessing the camera by HTTPS, images may be disturbed and sound may be interrupted.
   - The maximum number of cameras that can be connected simultaneously depends on the maximum image size and distribution format.

Accessing the Camera by HTTPS

1. Launch the web browser in your personal computer.

2. Input the camera’s IP address in the address bar of the web browser.
   Input address: https://192.168.0.10/

<NOTE>
- When the HTTPS port No. is changed from “443”, input “https://camera IP address: Port No.” in the address bar.
  E.g. https://192.168.0.11:61443
- When this unit is in a local network, set a proxy server from the web browser (menu bar: [Tools] - [Internet Options]) to ensure that a proxy server is not used for a local address.

3. Press the [Enter] key.
   The live screen [Live] is displayed.
   The security certificate is installed when the security warning screen is displayed. (→ page 135)
   When [User auth.] is set to [On], the user name and password input screen is displayed before the live screen [Live] appears.

<NOTE>
- When HTTPS is used, screen and image display may slow down and image update interval (frame rate) may also slow down.
● Install the security certificate

When using HTTPS to access the camera, the security warning screen will be displayed if the security certificate of the said camera has not been installed in your personal computer. To prevent this warning screen from being displayed, the security certificate must be installed in accordance with the following procedures. If it is not installed, the security warning screen will be displayed every time the camera is accessed.

**<NOTE>**
- The security certificate will be installed to your personal computer based on the content set for [Common Name]. The content set for the “Host Name” must therefore match that set for the address/host name used to access the camera. If the content differs, a security warning screen will be displayed every time the camera is accessed.
- A security warning screen will be displayed if the camera address/host name is changed even when a security certificate has been installed. Reinstall the security certificate.
- When connecting the camera to the Internet, set the address or host name to be accessed from the Internet in [Common Name]. In this case, when accessing the camera locally, a security warning screen is displayed every time the camera is accessed even when a security certificate is installed.
- When the security certificate is correctly installed, an icon of the key will be displayed in the address bar of the web browser accessing the camera.

1. Accessing the Camera by HTTPS.

2. When the security warning screen is displayed, click [Continue to this website (not recommended)].

The live screen [Live] is displayed.

When the authentication screen is displayed, input the user name and password.

**<NOTE>**
- When the above screen is displayed after accessing a device apart from the camera or a website, there may be a security problem, so check this carefully.

3. Click [Certificate error] in the URL and then click [View certificates].

4. Click [Install Certificate...].

5. Click [Next], which is displayed in the certificate import wizard.

**<NOTE>**
- If [Install Certificate...] is not displayed, close Internet Explorer and restart it by selecting [Run as Administrator].
  Right-click on [Start] - [Program] - [Internet Explorer] and click [Execute as Administrator (A)...].

Web screen configurations (continued)
Web screen configurations  (continued)

6. Select [Place all certificates in the following store] and click [Browse...].

7. Select [Trusted Root Certification Authorities] and click [OK].

8. Click [Next].

9. Click [Finish].

When importing is finished, the “The import was successful.” screen is displayed.

10. Click [Yes].

Closing the web browser after importing the certificate and reconnecting to it will stop the “Certificate error” screen being displayed.
Maintenance screen [Maintenance]
Among the various maintenance operations performed on this screen are system log checks, system version upgrading and initialization of the unit. The Maintenance screen consists of four settings: [System log], [Product info.], [Default reset] and [Backup].

System log screen [System log]
A maximum of 1000 event logs and a maximum of 32 error logs can be stored in the unit’s internal memory. When this maximum number has been exceeded, the old logs are overwritten successively by the new logs. The logs are cleared when the unit’s power is turned off.

<table>
<thead>
<tr>
<th>No.</th>
<th>Date &amp; Time</th>
<th>Event code</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>2018-01-01 01:00</td>
<td>E012345</td>
<td>System power on</td>
</tr>
<tr>
<td>2</td>
<td>2018-01-01 02:00</td>
<td>E012346</td>
<td>System power off</td>
</tr>
</tbody>
</table>

<NOTE>
• When the system log screen is displayed, the event log is displayed.

System log [Event log, Error log]
Switch the display between event logs and error logs. The event log display is updated when you click the [Execute] button.

<table>
<thead>
<tr>
<th>Type</th>
<th>Display</th>
</tr>
</thead>
<tbody>
<tr>
<td>Event log</td>
<td>Displays the event logs.</td>
</tr>
<tr>
<td>Error log</td>
<td>Displays the error logs.</td>
</tr>
</tbody>
</table>

[Event log]
No.
Displays the log sequence numbers. “1” indicates the latest information, and up to 1000 logs can be saved.

Date & Time
Displays the dates and times when the events occurred. The dates and times when the events occurred are indicated in 24-hour format according to the clock of the unit.

Event code
Displays the event code numbers.

Description
Displays the event descriptions. Display examples:
– <Power> Power on.
– <Stream> H.264 ch1 Play.
– <Stream> H.264 ch1 Stop.
### Product information screen [Product info.]

The versions of the unit’s software can be checked on this screen. The [Model no.], [MAC address], [Serial no.], [Firmware version] and other information about the unit is displayed.

</table>

---

**FPGA**

- Display the FPGA version for communications.

**COM**

- Display the FPGA version for image processing.

**Activation**

- Display information on the activated function.

**Operation time**

- Display the hours the unit has been operating.

**Viewer software installation counter**

- The number of plug-in viewer software applications which have been installed automatically from the unit is displayed by this counter.

**OSS license display**

- When you press the [View] button, the OSS license appears. Press the [Close] button to close the OSS license display screen.

**Firmware file**

- Upgrade the firmware. For details on how to upgrade, see “Upgrading the firmware (Firmware file)” (→ page 139).
Upgrading the firmware (Firmware file)

1. Download the latest software to your personal computer.
   <NOTE>
   • Keep the maximum combined number of characters to be used for the name of the directory in which the software will be stored and for the name of the software which has been downloaded to less than 250 characters.

2. Click the [Select] button, and specify the downloaded software.

3. Click the [Execute] button.
   The software upgrade check screen is displayed.
   After upgrading the software version, be absolutely sure to delete the temporary Internet files.
   <NOTE>
   • An upgrade progress bar appears after you click the [Execute] button, and the process will take about 1 minute.
   • Use the personal computer on the same subnet as the camera to upgrade the software version.
   • Before using the version upgrading software, be absolutely sure to check the precautions to be observed, and follow the instructions.
   • Use the following files specified by Panasonic Corporation as the software used for version upgrading:
     UPDATE.HDC
   • Do not turn off the unit’s power while a software version is being upgraded. (A pop-up screen will appear to indicate that the process is complete.)
   • While a software version is being upgraded, do not attempt to execute any other operations until the version has been upgraded.
   • Close the web browser once after performing a version upgrade.

Reset settings screen

Reset settings screen [Default reset]
The unit’s setting data is initialized and the unit is restarted on this screen.

<table>
<thead>
<tr>
<th>Default reset</th>
</tr>
</thead>
<tbody>
<tr>
<td>Execute</td>
</tr>
<tr>
<td>Reboot</td>
</tr>
<tr>
<td>Execute</td>
</tr>
</tbody>
</table>

Reset to the default (Except the network settings)
When the [Execute] button is clicked, the unit’s settings are returned to their defaults.
When the initialization operation is started, the unit is restarted so no operations can be undertaken for about 2 minutes.

<NOTE>
• The following setting items will not be returned to defaults.
  - [Live page - Automatic installation of viewer software]
  - [Live page - Smoother live video display on the browser(buffering)]
  - All settings under [User mng.]
  - All settings under [Network - Network]
  - [HTTPS - Connection]
  - [HTTPS - HTTPS port]
  - [HTTPS - HTTPS mode]
  - HTTPS: CRT key, server certificate
  - All settings under [UPnP]
  • [AWB] and [ABB] adjustment values will not be returned to defaults.

Reboot
When the [Execute] button is clicked, the unit is rebooted.
After the unit has been rebooted, no operations can be undertaken for about 2 minutes as is the case when the unit’s power is turned on.
## Back up screen [Backup]

On this screen, the unit’s settings can be saved to a personal computer or settings saved in a personal computer can be loaded into the unit for use.

### Download

**Config data type**

CAMERA (ALL), CAMERA (SCENE1) to CAMERA (SCENE4), CAMERA (SYSTEM), NETWORK

Specify the type of configuration data when reflecting the configuration data saved on a personal computer to this unit.

### Upload

**Config data type**

[Camera(ALL), Camera (SCENE1) to Camera (SCENE4), Camera (SCENE ALL), Camera (SYSTEM), Network]

Specify the type of configuration data when reflecting the configuration data saved on a personal computer to this unit.

### Setting value | Content to be saved | Extension of saving file
--- | --- | ---
Camera(ALL) | Settings for Scene 1, 2, 3, 4 Settings for System, Output, Pan/Tilt, Preset (These are saved as one setting file.) | .cal
Camera (SCENE1) | Settings for Scene1 | .cs1
Camera (SCENE2) | Settings for Scene2 | .cs2
Camera (SCENE3) | Settings for Scene3 | .cs3
Camera (SCENE4) | Settings for Scene4 | .cs4
Camera (SCENE ALL) | Settings for Scene 1, 2, 3, 4 (Setting files are saved for each Scene.) | .cs1 .cs2 .cs3 .cs4
Camera (SYSTEM) | Settings for System, Output, Pan/Tilt, Preset | .csy
Network | Settings of the Web screen Network settings | .nal

### Download

Save the unit’s settings onto the personal computer.

When the destination dialog box appears after clicking the [Download] button, specify the destination folder.

**NOTE**

- After the [Download] button is clicked, the amount of time it takes for the destination dialog box to appear is about 50 seconds for a camera settings file and about 10 seconds for a network settings file.
- Depending on the status of the unit, it may not be possible to download configuration files. In this case, the unit automatically restarts.

### Upload

The unit’s setting files, which were saved in the personal computer by the download function, are uploaded.

Click the [Select] button to display the dialog box, and specify the saved file.

When you click the [OK] button in the message dialog box that appears after you click the [Upload] button, uploading starts. Another message dialog box appears after uploading is complete. When you click the [OK] button, the unit will restart automatically.

**NOTE**

- Use the files downloaded by the unit as the data to be used for uploading.
- Do not turn off the unit’s power while downloading or uploading is underway.
- Do not attempt to perform any operations while downloading or uploading is underway. Instead, wait until the downloading or uploading is completed.
- It takes about 3 minutes for the upload complete dialog box to appear for camera settings files.
- When uploading Camera(ALL) or Camera(SYSTEM), the still image (thumbnail) that has been registered in preset memory will be erased. (→ page 68)
Displaying the web screen using a personal computer equipped with a touch panel

1. **Button for displaying the PTZ operation screen for touch panels**
   The screen switches to the one for PTZ operations for touch panels when this button is pressed.

2. **Button for displaying the Preset operation screen for touch panels**
   The screen switches to the one for Preset operations for touch panels when this button is pressed.

3. **Button for displaying the Image Adjust operation screen for touch panels**
   The screen switches to the one for Image Adjust operations for touch panels when this button is pressed.

4. **Button for restoring the screen from the touch panel operation screen**
   Press this button to return to the usual live screen.

5. **Buttons for switching the touch panel operation screen**
   Use these to switch the [PTZ]/[Preset]/[Image adjust] operation screens for touch panels.

6. **PTZ operation area for touch panels**
   This is the area where buttons for operating zoom, focus, pan/tilt, and speed are located that are suitable for use with touch panels.
   The functionality of the operation buttons is the same as the buttons displayed in the usual live screen.

7. **RTMP operation area for touch panels**
   This is the area where RTMP operation buttons are located that are suitable for use with touch panels.
   The functionality of the operation buttons is the same as the buttons displayed in the usual live screen.

8. **Snapshot button for touch panels**
   This snapshot button is suitable for use with touch panels.
   The functionality of the operation buttons is the same as the buttons displayed in the usual live screen.
9. Preset operation area for touch panels
This is the area where buttons for preset operations are located that are suitable for use with touch panels.
The functionality of the operation buttons is the same as the buttons displayed in the usual live screen.

10. Image adjust operation area for touch panels
This is the area where buttons for iris, gain, balance adjustments, shutter, ND filter, and scene operations are located that are suitable for use with touch panels.
The functionality of the operation buttons is the same as the buttons displayed in the usual live screen.

Setup operation area for touch panels
Even when the Setup screen is displayed, it is possible to display a Setup menu that is suitable for use with touch panels.
The functionality of the operation buttons is the same as the buttons displayed in the usual live screen.
Displaying the web screen using a mobile terminal

It is possible to perform operations using a design suited to mobile terminals in the live screen in a web browser.

1. **Access the unit from the mobile terminal.**
   As when accessing the unit from a personal computer, enter [http://IP address/] in the address bar of the web browser on the mobile terminal.
   The screen for mobile terminals is displayed automatically.

2. **Switch the display.**
   The Full Screen mode is engaged and only video is displayed immediately after accessing the unit via a web browser on the mobile terminal.
   Three types of screen are available on the mobile terminal: “Camera Control”, “Full Screen”, and “Touch Operation Select”.

You can switch between Camera Control, Full Screen, and Touch Operation Select by swiping left or right.
When Touch P/T is selected in Touch Operation Select, the middle-click function is enabled in Full Screen mode.
Furthermore, when Touch AF is selected, the Touch AF function is enabled in Full Screen mode.

<NOTE>
• When the button is selected in Touch Operation Select, the screen automatically switches to Full Screen.
• Only images in the M-JPEG format are available for display on mobile terminals.

**Camera control screen [Camera Control]**
1. **Button for displaying the operation menu for the live screen**
   Use this to display the operation menu for the live screen.

2. **Button for switching P/T Speed/Zoom**
   Use this to switch the buttons in the operation area.
   - When this is pressed while [P/T Speed] is being displayed, this displays the speed [Speed] button/slider in the operation area.
   - When this is pressed while [Zoom] is being displayed, this displays the zoom [Zoom] button/slider in the operation area.

3. **P/T Speed/Zoom operation area**
   The [P/T Speed]/[Zoom] button/sliders is displayed.
   Switch between [P/T Speed] and [Zoom] with the button for switching P/T Speed/Zoom.
   - The functionality of the operation buttons is the same as the buttons displayed in the usual live screen.

4. **×1.0 button**
   Use this to adjust the zoom (magnification) to 1.0x.

5. **Home button**
   Move to the preset home position.

6. **Preset thumbnail operation area**
   - When a preset thumbnail is clicked, the camera moves to face towards a preset position that was registered beforehand.
   - By swiping left in the preset thumbnail operation area, preset thumbnails that are not displayed can be displayed.
     - You can select Preset1 to Preset100.

7. **Button for switching the personal computer screen**
   This is used for switching to the live screen display for a personal computer.
   Press the mobile screen display button on the live screen for personal computers to return to the mobile live screen.

8. **Button for switching PTZ/Focus**
   Use this to switch the buttons in the operation area.
   When this is pressed while [PTZ] is being displayed, this displays the control pad buttons in the operation area.
   When this is pressed while [Focus Manual] or [Focus Auto] is being displayed, this displays the [Focus] button/slider in the operation area.

9. **PTZ/Focus operation area**
   The [PTZ]/[Focus] button/slider is displayed.
   Switch between [PTZ] and [Focus] with the button for switching PTZ/ Focus.
   - The functionality of the operation buttons is the same as the buttons displayed in the usual live screen.

10. **Focus (AUTO)/Iris (AUTO) button**
    - When [PTZ] is selected with the button for switching [PTZ]/[Focus], the button for enabling or disabling Iris (Auto) is displayed.
    - When [Focus] is selected, the button for enabling or disabling Focus (Auto) is displayed.

### Control Area
In the Control Area, operations by operation buttons are prioritized.
Scrolling of the screen as a whole can be done with touch operations outside the Control Area.

<NOTE>
- Depending on the mobile terminal you are using, it may be necessary to scroll the screen as a whole to adjust the position of the Control Area.

---

144 Displaying the web screen using a mobile terminal (continued)
This unit comes with settings (referred to as “limiters”) that restrict the panning and tilting movement ranges.

Depending on the installation location, obstacles that may come into contact with the remote camera may exist within its movement range. In such cases, setting the limiters before the obstacles will prevent contact.

The positions of four limiters — namely, the upper, lower, leftmost and right-most limits of the travel range — can be set. Once they have been set, the positions will not be lost even after the power has been turned off.

The limiters can be set or released both by the wireless remote control and controller or web setting screen [Setup]. Whatever was set or released last takes precedence.

For the controller operations, refer to the Operating Instructions of the controller.

The settings of the limiters using the wireless remote control will be described here.
Setting/releasing the limiters

Basic limiter operations

1. Press the <MENU> button.
   Tap the button (rather than pressing it). When it is pressed for 2 seconds, the camera menu will appear.
   If this happens, press the <MENU> button again for 2 seconds to clear the camera menu.
   Then start again from step 1.

2. Press the <↑/↓/←/→> button for 2 seconds while holding down the <PRESET> button.
   The limiter for the upper limit, lower limit, left limit or right limit is set (or released) using these direction buttons, respectively. The tally lamp will blink at this time. When a limiter is set, it blinks once; when a limiter is released, it blinks twice.
   If any other button was operated between steps 1 and 2, start again from step 1.

Setting the limiters

The limiter positions can be set by following the steps below. When the position is set, the tally lamp blinks once.

1. Press one of the <CAM1> to <CAM4> button to select the unit.
   • Setting the upper limit position of the movement range
     Press the <↑> or <↓> button of the wireless remote control to turn the unit as far as the position which will serve as the upper limit.
     Next, perform the steps in “Basic limiter operations”.
     (Press the <MENU> button quickly and then press the <↑> button for 2 seconds while holding down the <PRESET> button.)

   • Setting the lower limit position of the movement range
     Press the <↑> or <↓> button of the wireless remote control to turn the unit as far as the position which will serve as the lower limit.
     Next, perform the steps in “Basic limiter operations”.
     (Press the <MENU> button quickly and then press the <↓> button for 2 seconds while holding down the <PRESET> button.)

   • Setting the left-most limit position of the movement range
     Press the <←> or <→> button of the wireless remote control to turn the unit as far as the position which will serve as the left-most limit.
     Next, perform the steps in “Basic limiter operations”.
     (Press the <MENU> button quickly and then press the <←> button for 2 seconds while holding down the <PRESET> button.)

   • Setting the right-most limit position of the movement range
     Press the <←> or <→> button of the wireless remote control to turn the unit as far as the position which will serve as the right-most limit.
     Next, perform the steps in “Basic limiter operations”.
     (Press the <MENU> button quickly and then press the <→> button for 2 seconds while holding down the <PRESET> button.)

Releasing the limiters

The limiter positions that are set can be released by following the steps below. When the position is released, the tally lamp blinks twice.

1. Press one of the <CAM1> to <CAM4> button to select the unit.

2. Release the limiters by taking the steps below.
   • Releasing the upper limit position of the movement range
     Perform the steps in “Basic limiter operations”.
     (Press the <MENU> button quickly and then press the <↑> button for 2 seconds while holding down the <PRESET> button.)

   • Releasing the lower limit position of the movement range
     Perform the steps in “Basic limiter operations”.
     (Press the <MENU> button quickly and then press the <↓> button for 2 seconds while holding down the <PRESET> button.)

   • Releasing the left-most limit position of the movement range
     Perform the steps in “Basic limiter operations”.
     (Press the <MENU> button quickly and then press the <←> button for 2 seconds while holding down the <PRESET> button.)

   • Releasing the right-most limit position of the movement range
     Perform the steps in “Basic limiter operations”.
     (Press the <MENU> button quickly and then press the <→> button for 2 seconds while holding down the <PRESET> button.)

Resetting the limiters

To reset the limiters, the currently established settings must be released. The limiter positions that are set can be reset by following the steps below.

1. Release the settings of the limiter positions to be reset by following the steps in “Releasing the limiters”.

2. Set the limiter positions by following the steps in “Setting the limiters”.

146
Safe mode

**Concerning the safe mode**

The unit goes into the safe mode when the pan-tilt head is forcibly moved by an external force or when something impedes its rotation. Once the safe mode has been established, some or all of the operations will no longer be acknowledged to ensure safety and prevent equipment damage.

**Detection of equipment trouble**

When the unit has detected trouble, its functions are shut down, then the unit is restarted or the initial setting operation is performed, and the normal condition of the unit is restored after about 30 seconds.

**<NOTE>**

- When trouble is detected, pictures may no longer be output for a while, but they will be restored in 5 seconds to 10 seconds.
## Troubleshooting

### Operation

<tr>
<td><strong>Cannot access from a web browser</strong></td>
<td>• Has a LAN cable of category 5e or above been connected to the LAN connector for IP control &lt;LAN LINK/ACT&gt;?</td>
<td>Installation Instructions → “Connections”</td>
</tr>
</tbody>
</table>
| | • Is the [LINK] LED of the LAN connector for IP control lit?  
→ If it is not lit, it means that something is wrong with the connection to the LAN or that the network at the connection destination is not working properly.  
Check the LAN cable for defective contacts, and check the wiring. | page 15 |
| | • Is the power on?  
→ If the unit’s status display lamp is off or lights up orange, it means that the unit’s power is not on. | page 28 |
| | • Has a valid IP address been set in the unit? | page 123 |
| | • Has the wrong IP address been accessed?  
→ Check the connections by following the steps below.  
For Windows:  
Using the Windows command prompt, execute  
> ping [IP address which has been set in the camera]  
A reply returned from the unit signifies that there are no problems in operation.  
If a reply is not received, try following operation:  
• Reboot the unit, and within 20 minutes change the IP address using the Easy IP Setup Software.  
For Mac:  
Using the macOS terminal, execute  
> ping -c 10 [IP address which has been set in the camera]  
A reply returned from the unit signifies that there are no problems in operation.  
If a reply is not received, try following operation:  
• Reboot the unit, and within 20 minutes change the IP address using the Easy IP Setup Software. | page 15 |
| | • Are you accessing via “http://” while the HTTPS function is enabled?  
→ Perform access via “https://” when using the HTTPS function. Entry of the port number is also required. | page 134 |
| | • Is the same IP address setting being used by another unit?  
→ Check out the IP addresses of the unit, access devices (personal computer, controller, etc.) and any other cameras. | page 71 |
| | • Does the subnet mask setting match the network subnet of the connection destination?  
→ Check out the subnet mask settings of the unit and access devices, and then consult with the network administrator. | page 71 |
| | • Has the “Use a proxy server” setting been selected by the web browser? (When the unit and the personal computer are connected to the same subnet)  
→ If a proxy server has been set using the [proxy setting] of the web browser, it is recommended that a “Don’t use proxy” address be selected as the unit’s IP address setting. | page 15 |
| | • Has the wrong default gateway been set for the unit? (When the unit and personal computer are connected to different subnets)  
→ Check out the default gateway that has been set for the unit, and then consult with the network administrator. | page 71 |

<tr>
<td>Something is wrong with the coloring of the pictures</td>
<td>• Activate the ATW (Auto tracking white adjustment) function.</td>
<td>page 37</td>
</tr>
<tr>
<td></td>
<td>• In some situations, the proper colors may not be reproduced using the ATW function.</td>
<td>pages 36 to 37</td>
</tr>
<tr>
<td></td>
<td>→ In cases like this, proceed with the white balance adjustment.</td>
<td></td>
</tr>
<tr>
<td>The pictures are too light or too dark</td>
<td>• Either select the auto setting for the iris or select the manual setting and adjust the iris manually.</td>
<td>page 34</td>
</tr>
<tr>
<td></td>
<td>• The pictures may be dark if the analog video signal cables are too long because this will cause signal attenuation.</td>
<td>page 36 to 37</td>
</tr>
<tr>
<td>Images are in black and white</td>
<td>• Is the unit in night mode?</td>
<td>page 45, page 109</td>
</tr>
<tr>
<td></td>
<td>→ In night mode, output will be in black and white.</td>
<td></td>
</tr>
<tr>
<td>Auto white balance adjustment (AWB) is not possible</td>
<td>• Is the unit in night mode?</td>
<td>page 45, page 109</td>
</tr>
<tr>
<td></td>
<td>→ Auto white balance adjustment (AWB) is not possible in night mode.</td>
<td></td>
</tr>
<tr>
<td>The screen is too bright in night mode</td>
<td>• The aperture is set to open in night mode to prevent video voyeurism. Adjust the brightness at the light source.</td>
<td>page 34</td>
</tr>
<tr>
<td>The iris does not operate in night mode</td>
<td>• Since this camera uses an MOS imaging device, the pickup timing differs slightly at the top left and bottom right of the screen. This means that if a subject moves quickly across the front of the camera, it may appear slightly distorted. This is not a malfunction.</td>
<td>page 34</td>
</tr>
<tr>
<td>The subjects appear distorted</td>
<td>• With a MOS imaging sensor, the pickup timing differs slightly at the top left and bottom right of the screen. This means that when the flash is fired, the bottom of the screen will become lighter in the field concerned and the top will become lighter in the next field. This is normal and not indicative of any problem.</td>
<td>page 34</td>
</tr>
<tr>
<td>When the flash is fired during shooting, only the top or bottom of the screen becomes lighter</td>
<td>• These phenomena (flicker) may occur under the illumination produced by fluorescent lighting, mercury bulbs or other types of discharge tubes. In such cases, we recommend setting the electronic shutter speed to 1/100 in regions with 50 Hz power supply frequency, and to OFF in regions with 60 Hz power supply frequency.</td>
<td>page 34</td>
</tr>
<tr>
<td>The brightness changes cyclically or the colors change, and horizontal stripes can be seen passing across the screen</td>
<td>• This phenomenon occurs because the pixels are arranged systematically on each image sensor. It is noticeable when the spatial frequency of a subject and the pixel pitch are brought into proximity so change the camera angle or take other action.</td>
<td>page 34</td>
</tr>
<tr>
<td>When fine lines or cyclical patterns are shot, flickering is seen or coloring is added to them</td>
<td>• The following causes are possible.</td>
<td>page 6</td>
</tr>
<tr>
<td></td>
<td>- The camera, switching hub, or peripheral devices are not grounded.</td>
<td></td>
</tr>
<tr>
<td></td>
<td>- Power lines are running nearby.</td>
<td></td>
</tr>
<tr>
<td></td>
<td>- Equipment generating strong electric or magnetic fields (e.g., television and radio antennas, air conditioning motors, power transformers) are located nearby.</td>
<td></td>
</tr>
<tr>
<td></td>
<td>If the problem cannot be resolved via movement of surrounding devices, use a microphone equipped with an amplifier, or connect an audio output with low output impedance.</td>
<td></td>
</tr>

## Troubleshooting (continued)

### Problems with IP images

<table>
<thead>
<tr>
<th>Symptom</th>
<th>Cause and solution</th>
<th>Reference pages</th>
</tr>
</thead>
</table>
| Images are not displayed | For Windows:  
• Is the plug-in viewer software installed?  
  → Install the plug-in viewer software. | page 26 |
| | For Windows:  
• If [Check for newer versions of stored pages] is not set to [Every time I visit the webpage] in the temporary Internet file settings, IP images may not appear in the live screen [Live].  
  → Perform the following.  
  ① Select [Tools] - [Internet Options] in Internet Explorer.  
  ② Click the [General] tab, and click the [Settings] button under [Browsing history].  
  ③ In the [Temporary Internet Files] dialog box, select the [Every time I visit the webpage] option under [Check for newer versions of stored pages].  
  ④ Click the [OK] button. | |
| The images are blurry | • Is the focus properly adjusted?  
  → Check the focus adjustment. | |
| Images are not updated | • The images may not be updated and other problems may occur depending on your web browser and its version.  
• The images may stop depending on the network congestion, the level of access to the unit, etc.  
• If the IP video settings of the unit were changed, the image display may stop temporarily.  
  → Check the level of access to the unit, and stop any unnecessary access.  
  Afterward, check the following.  
  For Windows:  
  Press the [F5] key on the personal computer's keyboard to request that the settings be acquired.  
  For Mac:  
  Press the [Command] + [R] key on the personal computer's keyboard to request that the settings be acquired. | |
| The images do not update or display properly | • Perform the following to delete the temporary Internet files.  
  For Windows:  
  ① Select [Tools] - [Internet Options] in Internet Explorer.  
  ② Click the [General] tab, and click the [Delete] button under [Browsing history].  
  ③ In the [Delete Browsing History] dialog box, select the [Temporary Internet files and website files] checkbox, and then click [Delete].  
  ④ Click the [OK] button.  
  For Mac:  
  ② Click [Empty] in the [Are you sure you want to empty the cache?] pop-up screen.  
  → The unit's ports may be filtered by the firewall or other function of the anti-virus software.  
  → Change the HTTP port number of the unit to a port number that will not be filtered. | |

---

<td>H.264 images are not displayed</td>
<td>• If the “Network Camera View 4S” plug-in viewer software is deleted in an environment where the “Network Camera View 3” plug-in viewer software is installed, display of H.264 images will become impossible. In such cases, delete “Network Camera View 3” before installing “Network Camera View 4S”.&lt;br&gt;• Has the camera been connected to a personal computer via a router (via the Internet, for example)?  ⃰ If UDP port transfer has not been set correctly, H.264 images cannot be displayed.  H.264 can be transferred by HTTP when [Internet mode(Over HTTP)] is set to [On].&lt;br&gt;• Has UDP communication been blocked by security software or a firewall?  ⃰ If [Internet mode(Over HTTP)] is [Off], H.264 is transferred by UDP.  → Change the settings in the security software and firewall, and change the settings to permit communications with your web browser.</td>
<td>page 102</td>
</tr>
<tr>
<td>The images are distorted</td>
<td>• The images may be distorted if the transmission path is congested and proper transmission is not possible.  → Consult your network administrator.&lt;br&gt;• The images may be distorted if video packet shuffling occurs on the transmission path.  → Switching to an identical Internet service provider for both the camera and the personal computer may prevent this problem. Consult your network administrator.</td>
<td>page 107</td>
</tr>
<tr>
<td>When multiple web browsers are running to display H.264 images, images from multiple cameras appear sequentially in a single web browser</td>
<td>For Windows:&lt;br&gt;• This may occur depending on the combination of the personal computer's display adaptor and the driver.  ⃰ If this occurs, update the first display adaptor to the latest version.  If this does not resolve the problem, adjust the hardware accelerator function as follows.&lt;br&gt;  This section describes the procedure for Windows 7 as an example. Changing the settings may not be possible, depending on your environment.&lt;br&gt;①Right-click on the desktop, and select [Screen Resolution] from the menu.&lt;br&gt;②Click [Advanced settings].&lt;br&gt;③Select the [Troubleshoot] tab, and click [Change setting].&lt;br&gt;④If the [User Account Control] dialog box appears, click [Yes]. (When logged on with an account other than an administrator account, enter the password (and user name if necessary), and click [Yes].)&lt;br&gt;⑤Change to [Hardware acceleration] setting to [None] at the far left, and click [OK].</td>
<td>page 107</td>
</tr>
<tr>
<td>Audio is not output for NDI</td>
<td>HX-compatible switchers</td>
<td>• [Audio] may be set to [Off] in the [Audio] audio setting screen.  → Reset the setting to [On].</td>
</tr>
</tbody>
</table>
Troubleshooting (continued)

### Web screen
Depending on the OS installed on the personal computer, the following may occur. Follow the instructions below when the following has occurred. Performing the following solutions will not affect the operation of other applications.

<table>
<thead>
<tr>
<th>Symptom</th>
<th>Cause and solution</th>
<th>Reference pages</th>
</tr>
</thead>
<tbody>
<tr>
<td>Frame dropping is observed in images</td>
<td>• The personal computer may be lacking in performance. → Check the requirements for the personal computer environment.</td>
<td>page 8</td>
</tr>
<tr>
<td></td>
<td>• This phenomenon may be improved by pressing the button for switching real time updating to disable the web browser real time updating function.</td>
<td>page 88</td>
</tr>
</tbody>
</table>

For Windows:
The "information bar" described in the following explanations refers to the message bars that appear in Internet Explorer 11. The information bar appears at the bottom of Internet Explorer.

<table>
<thead>
<tr>
<th>Symptom</th>
<th>Cause and solution</th>
<th>Reference pages</th>
</tr>
</thead>
<tbody>
<tr>
<td>The following message appears in the information bar. &quot;This website wants to run the following add-on: 'WebVideo Module' from 'Panasonic System Networks Co., Ltd.'.&quot;</td>
<td>• Select [Allow].</td>
<td></td>
</tr>
<tr>
<td>The following message appears in the information bar. &quot;This website wants to install the following add-on: 'nwcv4SSetup.exe' from 'Panasonic System Networks Co., Ltd.'.&quot;</td>
<td>• Select [Install]. When the security warning window appears, click the [Install] button.</td>
<td></td>
</tr>
<tr>
<td>An unnecessary status bar or scroll bar is displayed on the pop-up window</td>
<td>• Open the security settings screen for Internet Explorer, and select [Internet]. Click the [Custom level] button, set [Allow script-initiated windows without size or position constraints] to [Enable] under [Miscellaneous], and click the [OK] button. When the warning window appears, click the [Yes] button.</td>
<td></td>
</tr>
<tr>
<td>The IP images do not match the display frames</td>
<td>• Images may not appear correctly if their DPI settings are 120 DPI or higher. → Right-click on the desktop of the personal computer, click [Display settings] - [Change the size of text, apps, and other items], and select [100% (Recommended)].</td>
<td></td>
</tr>
<tr>
<td></td>
<td>• Images may not appear correctly if the magnification level of Internet Explorer's zoom function is not set to 100%. → Select [View] - [Zoom] in the menu bar of Internet Explorer, and click [100%].</td>
<td></td>
</tr>
<tr>
<td>The layout of the screen is distorted, or some buttons on the screen do not operate</td>
<td>• Select [Tools] - [Compatibility View Settings] in the menu bar of Internet Explorer, disable compatibility view for the unit.</td>
<td></td>
</tr>
</tbody>
</table>
Specifications

Power requirements: 12 V DC (10.8 V to 13.2 V) 42 V to 57 V DC (PoE++ power supply)
Current consumption: 4 A (XLR IN connector) 1.2 A (PoE++ power supply)

indicates safety information.

GENERAL
Ambient operating temperature: 0 °C to 40 °C (32 °F to 104 °F)
Storage temperature: –20 °C to 50 °C (–4 °F to 122 °F)
Ambient operating humidity: 20% to 90% (no condensation)
Mass: Approx. 4.2 kg (9.24 lb) (excluding mount bracket)
Dimensions (W × H × D): 213 mm × 267 mm × 219 mm (8-3/8 inches × 10-1/2 inches × 8-5/8 inches) (excluding protrusions, direct ceiling mount bracket)
Controller supported: AW-RP150

INPUT
Input connector: DC 12 V IN, G/L IN (BNC) • BBS (Black Burst Sync), tri-level sync supported

OUTPUT
Video output
HDMI: HDMI type A • HDCP is not supported. • Viera Link is not supported.
12G SDI OUT: SMPTE 2082-1 standard/75 Ω (BNC×1)
3G SDI OUT: SMPTE292/75 Ω (BNC×1) • Level-A/Level-B supported
MONI OUT: SMPTE292/75 Ω (BNC×1)
OPTICAL: SFP+ standard Single Fiber • The signal sent is the same as 12G SDI OUT. • This unit does not support input by optical signals.

INPUT/OUTPUT
Input/Output connector
LAN: LAN connector for IP control (RJ-45)
RS-422: CONTROL IN RS-422A (RJ-45)
MIC/LINE input: ø 3.5 mm stereo mini jack Input impedance: High impedance • During MIC input Supported mic: Stereo mic (plug-in power, on/off switching via menu) Supply voltage: 2.5 V ± 0.5 V Mic input sensitivity: Approx. –40 dBV ± 3 dBV (0 dB=1 V/Pa, 1 kHz) • During LINE input Input level: Approx. –10 dBV ±3 dBV

FUNCTIONS AND PERFORMANCE
[Camera unit]
Imaging sensors: 1-type 4K MOS×1
Lens: Motorized Optical 20× zoom, F2.8 to F4.5 [f=8.8 mm (11/32 inches) to 176.0 mm (6-15/16 inches); 35 mm (1-3/8 inches) equivalent: 24.5 mm (31/32 inches) to 490.0 mm (19-9/32 inches)] Extender-Zoom 1.4×
Conversion lens: Not supported
Angle of view range:
   Horizontal angle of view: 75.1° (wide) to 4.0° (tele)
   Vertical angle of view: 46.7° (wide) to 2.3° (tele)
   Diagonal angle of view: 82.8° (wide) to 4.6° (tele)
Optical filter: Through, 1/4, 1/16, 1/64, IR through (IR through is used as “Night mode”)
Focus: Switching between auto and manual
Focus distance: Entire zooming range: 1000 mm (3.3 ft) Wide end: 100 mm (0.33 ft)
Color separation optical system: 1MOS
Minimum illumination: 2 lx (50 IRE, F2.8, 42 dB, without accumulation)
Standard sensitivity:
   Shooting Mode [Normal] F9, 2000lx
   Shooting Mode [High Sens.] F12, 2000lx
Horizontal resolution: 1600 TV lines Typ (Center area)
Gain selection: Auto, 0 dB to 42 dB (1 dB steps)
Frame mix: 0 dB, 6 dB, 12 dB, 18 dB, 24 dB • This cannot be configured when the format is 2160/29.97p, 2160/23.98p, 2160/24p, 2160/25p, 1080/29.97p, 1080/23.98p(59.94i), 1080/29.97PsF, 1080/23.98PsF, 1080/25p, 1080/25PsF.
Specifications (continued)

Electronic shutter speed:
- 59.94p/59.94i mode
  1/60, 1/100, 1/120, 1/250, 1/500, 1/1000, 1/2000, 1/4000, 1/8000, 1/10000
- 29.97p mode
  1/30, 1/60, 1/100, 1/120, 1/250, 1/500, 1/1000, 1/2000, 1/4000, 1/8000, 1/10000
- 23.98p mode
  1/24, 1/48, 1/60, 1/100, 1/120, 1/250, 1/500, 1/1000, 1/2000, 1/4000, 1/8000, 1/10000
- 50p/50i mode
  1/60, 1/100, 1/120, 1/250, 1/500, 1/1000, 1/2000, 1/4000, 1/8000, 1/10000
- 25p mode
  1/25, 1/50, 1/60, 1/100, 1/120, 1/250, 1/500, 1/1000, 1/2000, 1/4000, 1/8000, 1/10000

Synchro scan:
- 59.94p/59.94i mode
  60.00 Hz to 7200 Hz
- 29.97p mode
  30.00 Hz to 7200 Hz
- 23.98p mode
  24.00 Hz to 7200 Hz
- 50p/50i mode
  50.00 Hz to 7200 Hz
- 25p mode
  25.00 Hz to 7200 Hz

Gamma:
HD/FILMLIKE1/FILMLIKE2/FILMLIKE3/ FILM REC/VIDEO REC 0.30 to 0.75

White balance:
ATW: 3200K, 5600K
AWB: AWB-A/AWB-B
VAR (selectable between 2000K and 15000K by designating a value)

Chroma amount variability:
OFF, –99% to 99%

Scene file:
Scene1, Scene2, Scene3, Scene4

Output format
UHD/FHD SDI:
[4K format] 2160/59.94p, 2160/50p, 2160/29.97p*1, 2160/25p*1, 2160/24p (Just), 2160/23.98p*1
[HD format] 1080/59.94p, 1080/50p, 1080/59.94i, 1080/50i, 1080/29.97p*1, 1080/25p*1, 1080/24p (Just), 1080/23.98p*1, 1080/23.98PsF, 1080/25PsF, 1080/24p (Just), 1080/23.98p*2, 720/59.94p*3, 720/50p*3

UHD/FHD Fiber:
[4K format] 2160/59.94p, 2160/50p, 2160/29.97p*1, 2160/25p*1, 2160/24p (Just), 2160/23.98p*1
[HD format] 1080/59.94p, 1080/50p, 1080/59.94i, 1080/50i, 1080/29.97p*1, 1080/25p*1, 1080/29.97PsF, 1080/25PsF, 1080/24p (Just), 1080/23.98p*1, 720/59.94p*3, 720/50p*3

*1 Native output
*2 OVER 59.94i output (your monitor may recognize the signal as 59.94i).
*3 When 720/59.94p or 720/50p is selected, only 720p is output.

• When selecting formats for UHD SDI, HDMI, and Fiber, it is not possible to select different formats for each of them. Furthermore, the formats for FHD SDI and MONI OUT are fixed to the formatting method selected for UHD SDI and HDMI.

Pan/tilt operation speed:
Maximum speed 60°/s or higher
- Maximum speed is 180°/second or more when quietness and stopping accuracy are ignored.

Panning range: ±175°

Tilting range: –30° to 210°
- Depending on the pan or tilt position, the camera may be reflected in the image.

Quietness:
NC35 or less

The symbols on this product (including the accessories) represent the following:

DC
